PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Ecology
Telephone: 360-407-6121

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Wells
Source: Department of Health
Telephone: 360-236-3148
Group A and B well locations.

Water Well Listing
Source: Public Utility District
Telephone: 206-779-7656
A listing of water well locations in Kitsap County.

Ecology Well Logs
Source: Department of Ecology
Telephone: 360-407-7294
Point geodatabase with a record for each Ecology well report. Points are located by quarter quarter section centroid. Points contain all well report types including water wells, resource protection wells, and decommissioned wells.

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Listing
Source: Department of Natural Resources
Telephone: 360-902-1450
Locations that represent oil and gas test well sites in Washington State from 1890 to present.

RADON

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Parametrix, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

CERTIFICATION

The technical material and data contained in this document were prepared under the supervision and direction of the undersigned. We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the *all appropriate inquiries* in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

Parametrix was retained by the Washington State Department of Transportation (WSDOT) to conduct a Phase I Environmental Site Assessment (ESA) on the developed property located at 3605 I Street in Vancouver, Washington (Figure 1). This property is known as IBR-14765000. Based on the findings of this investigation, Parametrix concluded the following:

1. The subject property is located at 3605 I Street in Vancouver, Washington, and is identified as Clark County parcel 14765000. The subject property is owned by Shareece and Marcus Davis and is occupied by a single-family residential building. The property includes an attached garage and outbuilding. Clark County records indicate that the current building was constructed in 1955. The vicinity of the subject property is developed with residential properties to the north, west, and south and an Interstate 5 (I-5) onramp and I-5 across E. Frontage Road to the east.
2. A review of historic aerial photographs shows that the current building was present by at least 1960 (other records indicated a 1955 construction date). The vicinity area transitioned from primarily undeveloped rural land to residential between 1935 and 1951. No evidence of recognized environmental conditions (RECs) was identified on the subject property during the historical photograph and Sanborn map review.
3. Based on the age of the building (1955), there is a potential that hazardous building materials (asbestos-containing materials [ACM], lead-based paint [LBP], and/or polychlorinated biphenyls [PCBs]) are present in the building materials.
4. The subject property is not listed on any regulatory database that would indicate a past or current release or storage of hazardous materials. A review of regulatory information indicated that several nearby sites were identified in the regulatory record databases. However, based on the information reviewed, none of the sites identified represent a REC to the subject property.
5. No evidence of significant use or storage of hazardous substances and/or petroleum products was noted on or near the subject property. No evidence of distressed vegetation, spills or releases, dry wells, or other indications of environmental concern was identified during the site examination from public right of way.
6. An on-site reconnaissance and interview were not conducted with a property representative to identify any potential environmental conditions and to address information data gaps during the Phase I ESA process. The lack of a property owner or representative interview and the lack of a full on-site reconnaissance represent data gaps in accordance with ASTM Standard E1527-21. However, the information obtained for the Phase I ESA, including regulatory database and historical documentation, was deemed sufficient to draw conclusions of potential environmental issues with the subject property.

Based upon the conclusions of this investigation of the subject property, Parametrix offers the following recommendations:

1. If the building is to be demolished, a hazardous building materials survey should be completed. If hazardous materials (ACM, LBP, or PCBs) are found, they should handled, managed, and disposed of in accordance with local, state, and federal regulations.
2. No further assessment of environmental conditions on the subject property is recommended at this time.

1. INTRODUCTION

Parametrix was retained by the Washington State Department of Transportation (WSDOT) to perform a Phase I Environmental Site Assessment (ESA) on the developed property located at 3605 I Street in Vancouver, Washington (herein referred to as the *subject property*) (Figure 1). The subject property consists of tax parcel 14765000 in Clark County, Washington. It is our understanding that WSDOT may pursue acquisition of the subject property as part of the Interstate Bridge Replacement (IBR) Program. The subject property is identified as IBR-14765000 (Figure 2).

This Phase I ESA includes a review of available documentation pertaining to the subject property, a site reconnaissance, and a review of pertinent public agency documents. The Phase I ESA consisted of two distinct tasks: (1) a review of documents and of oral information (if available), and (2) a site examination. Conclusions and recommendations within this report are based solely on observed evidence and data collected during the performance of this assessment.

1.1 Purpose

The Phase I ESA was conducted in general accordance with American Society for Testing Materials (ASTM) Standard E1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, which defines the generally accepted industry practices and procedures currently applicable at the time and place of this study (ASTM 2021). The Phase I ESA is intended to permit the user to satisfy the requirements to qualify for the bona fide prospective purchaser limitation under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), and as such constitutes "all appropriate inquiries in the previous ownership and uses of the property consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601 (35)(B).

The purpose of this Phase I ESA is to identify recognized environmental conditions (RECs) on or near the subject property. The term *recognized environmental conditions* is defined in ASTM Standard E1527-21 as:

> "…(1) the presence of *hazardous substances* or *petroleum products* in, on, or at the *subject property* due to a *release* to the *environment*; (2) the likely presence of *hazardous substances* or *petroleum products* in, on, or at the *subject property* due to a *release* or likely *release* to the *environment*; or (3) the presence of *hazardous substances* or *petroleum products* in, on, or at the *subject property* under conditions that pose a *material threat* of a future *release* to the *environment*."

In accordance with ASTM Standard E1527-21, some RECs may be further defined as historical recognized environmental conditions (HRECs) or controlled recognized environmental conditions (CRECs).

An HREC is defined as:

> "…*a past release* of any *hazardous substances* or *petroleum products* that has occurred in connection with the *property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *property* to any required controls."

A CREC is defined as:

> "…*a recognized environmental condition* resulting from a past *release of hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority, with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls."

This Phase I ESA endeavors to identify RECs, HRECs, and/or CRECs at the subject property.

1.2 Significant Assumptions

This assessment was conducted in accordance with generally accepted industry practices and procedures within the scope of work authorized at the time and place of this study. Parametrix's observations are limited to those areas to which it had access on the subject property.

Phase I ESA methodology included viewing accessible areas of the subject property from public right of way, as on-site access was not available. In addition, an interview was not able to be conducted with a property representative to identify any potential environmental conditions during the Phase I ESA process. Unless otherwise stated, no other exceptions to the guidelines presented in ASTM E1527-21 were made during completion of this Phase I ESA.

1.3 Limitations

The findings, conclusions, and recommendations presented in this report are based on site conditions and the best available information known or made available by regulators, other consultants, or other sources at the time of the investigation. Parametrix conducted a diligent search and investigation in compliance with prevailing standards of the profession; however, certain adverse conditions may exist at the site not detected at the time of the investigation.

The services provided under this contract, as described in this report, include professional opinions and judgments based on data collected. These services have been provided according to generally accepted engineering practices. The opinions and conclusions contained in this report are typically based on information obtained from the following:

- Observations and measurements made by Parametrix field staff.
- Contacts and discussions with regulatory agencies and others.
- Review of available hazardous substance or solid waste lists.
- Opinions and judgments of Parametrix based on the information available.

In the professional judgment of Parametrix, the services performed pursuant to the scope of services are an adequate basis to collect data for a preliminary evaluation of the site and upon which to draw the conclusions stated in this report.

2. SUBJECT PROPERTY DESCRIPTION

The following sections summarize the location, characteristics, and physical setting of the subject property.

2.1 Location

The subject property is an approximately 0.11-acre parcel located at 3605 I Street in Vancouver, Washington. It is located to the west of E. Frontage Road and the 39th Street southbound onramp to Interstate 5 (I-5), north of East 36th Street, south of East 37th Street, and east of I street. Based on Clark County Tax Assessment records, Shareece and Marcus Davis are the current owners of the subject property. The subject property is shown on Figure 1. The boundary of the subject property and key features are shown on Figure 2.

2.2 Site and Vicinity Characteristics

The subject property includes a 1,380-square-foot residential building with an attached 294-square-foot garage, a driveway, and a shed in the backyard near the eastern property boundary. Clark County records indicate that the residential building was constructed in 1955.

The vicinity of the subject property is developed for residential use with commercial properties approximately 0.25 miles to the west. Properties in the direct vicinity are residential use with I-5 to the east (Figure 2).

2.3 Physical Setting

The subject property is located in the Portland Basin, which marks the northern terminus of the Willamette Lowland in Oregon (DNR n.d.). The northern portion of the basin is known for its low topographic relief, with the subject property at an elevation of approximately 214 feet above mean sea level. The Portland Basin is bound by the Cascade Range to the east and the Coast Range to the west.

Geologic processes in the Portland Basin consist of volcanism, sedimentation, and cataclysmic flood deposits in both fluvial and marine depositional environments. The subject property lies on what is mapped as coarse-grained Missoula flood deposits, cobbly, sandy gravel deposited by the Missoula floods (Wells et al. 2020). Surface soils consist of sandy loam.

The topography in the vicinity of the subject property is a consistent slope, rising with distance from the Columbia River. The anticipated groundwater gradient is to the south toward the Columbia River. Based upon regional data, groundwater is anticipated to be 22 feet below ground surface at the subject property (Swanson and McCarley 1995).

2.4 Current Use of the Subject Property

The primary building on the subject property is currently used as a single-family residence.

2.5 Descriptions of Improvements on the Subject Property

Based on Clark County property assessment records, the subject property includes one Clark County parcel totaling 0.11 acres. The subject property includes a 1,380-square-foot single story residential building with a 294-square-foot attached garage building with slab on grade foundation constructed in 1955; an outbuilding to the rear of the residence; a concrete walkway between the building and the street, and a concrete driveway between the street and the garage. Power, water, and sewer are supplied to the building by local utilities and municipalities.

2.6 Environmental Liens

An environmental lien is defined by ASTM as a charge, security, or encumbrance upon title to a property to secure the payment of a cost, damage, obligation, or duty arising out of response actions, cleanup, or other remediation of hazardous substances or petroleum products. No evidence of environmental liens was identified during the course of the Phase I ESA process. However, a formal title search was not completed as part of the scope of work.

3. RECORDS REVIEW

The purpose of the records review task was to gather environmental data on the subject property prior to the site examination. The information review consisted of two subtasks: (1) a review of regulatory databases to find sites, including and close to the subject property, listed by federal and State of Washington agencies and (2) a compilation of historical uses of the subject property and site vicinity properties to determine if past operations pose an environmental risk to the subject property.

Information for agency database review is based, in part, on a report provided by Environmental Data Resources (EDR). The EDR report (EDR 2023a)is a summary of state and federal database searches for sites of possible environmental concern and is included in Appendix A. Historical information is based on review of historical Sanborn Fire Insurance Maps (EDR 2023b; Appendix B) and historical aerial photos (EDR 2023c; Appendix C).

The information review enabled Parametrix personnel to characterize the types of activities performed at the site and identify data gaps prior to the site examination, and it facilitated recognition of discrepancies between reported and observed data. Data gaps identified during the document review were addressed by interviewing knowledgeable personnel, by making observations during the site examination, or by additional detailed investigation.

It should be noted that the information supplied by EDR is reported as Parametrix received it. EDR, in turn, reports information as it is provided in various government databases. It is not possible for either Parametrix or EDR to verify the accuracy or completeness of information contained in these databases. However, the use of and reliance on this information is a generally accepted practice in the conduct of environmental due diligence. The following sections present information from the document review.

3.1 Standard Environmental Record Sources

The following section summarizes information collected from records maintained by the U.S. Environmental Protection Agency (EPA) and the Washington State Department of Ecology (Ecology). The information includes details on sites identified in regulatory databases within recommended ASTM search distances. A complete listing of the databases reviewed is included in the EDR Radius Map™ Report (Appendix A).

3.1.1 Review of Washington State Department of Ecology Databases

The following sections summarize the most relevant information obtained from the EDR report regarding sites identified within the ASTM E1527-21 search radii from the following databases. Additional information regarding these sites was reviewed on Ecology's Integrated Site Information System (ISIS) website to supplement data gaps in the EDR report. Relevant database listings from Ecology include the following:

- Underground Storage Tank (UST) List
- Leaking Underground Storage Tank (LUST) List

- Confirmed and Suspected Cleanup Site List (CSCSL)
- Confirmed and Suspected Cleanup Site List – No Further Action (CSCSL-NFA)
- SPILLS
- Voluntary Cleanup Program (VCP)
- Independent Cleanup Report (ICR)
- Landfill and/or Solid Waste Disposal Site Lists (SWF/LF)
- Brownfields

3.1.1.1 Underground Storage Tank List

The Ecology UST List identifies registered USTs, which are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data were obtained from Ecology's online Cleanup and Tank Search database. When unregulated USTs were included in Ecology's regulated tank documents, these USTs were included in this report.

Information contained in the EDR report indicates that the subject property is not listed as a UST site and no UST sites are located within 0.125 miles of the subject property.

Four UST sites were included in the EDR report within 0.5 miles of the subject property. Parametrix identified a fifth UST site, which is included in the list below

- ARCO #5739 site (3817 Main Street) is located approximately 0.3 miles north-northwest of the subject property and is listed in Ecology's Regulated UST database. Four USTs are identified as operational. Six USTs have been removed. No release of petroleum from a UST has been reported at this site.
- The Main Street Chevron site, formally 76 24-hour Food Mart (3901 Main Street), is located approximately 0.3 miles north-northwest of the subject property. Two USTs are identified as operational.
- The First United Methodist Church site (401 East 33rd Av.) is located approximately 0.3 miles west-southwest of the subject and is listed in the UST database. One UST was identified as Closed in Place. No release of petroleum from a UST has been reported at this site. Ecology was unable to provide any other information about this UST.
- The Memorial Urgent Care/Vancouver Memorial Hospital site (3400 Main Street) is located approximately 0.3 miles west-southwest of the subject property. According to Ecology, one regulated UST is listed as operational. Two unregulated heating oil USTs are also on the site; the status of these two USTs is identified as "Exempt."
- The Vancouver District Site 40001D site (4200 Main Street) is located approximately 0.4 miles northwest of the subject property and is listed in Ecology's Regulated UST database. Two vehicle fuel USTs are identified as operational. Eight USTs have been removed (see Section 3.1.1.3 below for cleanup status).

- Unless otherwise noted, the presence of a UST near a site does not, in itself, constitute a REC. Where available, other information was reviewed regarding the presence of a UST, including the age of the facility, proximity to the subject property, and known releases or spills. UST sites which have had known releases are discussed in Section 3.1.1.2 below.

3.1.1.2 Leaking Underground Storage Tank List

The LUST Incident Report contains an inventory of reported leaking UST incidents. The data were obtained from Ecology's LUST Database List. The subject property is not listed as a LUST site.

Two LUST sites were identified within 0.5 miles of the subject property:

- The Main Street Chevron site, formally 76 24-hour Food Mart (3901 Main Str.), is located approximately 0.3 miles north-northwest of the subject property and is listed in the LUST, UST, CSCSL, VCP, ICR, and CSCSL-NFA databases. Two USTs are identified as operational, see Section 3.1.1.1 above. Six USTs have been removed. A petroleum release was identified on the property and remediated. The facility received a No Further Action (NFA) determination from Ecology dated September 18, 1998. Based on the distance and regulatory status of the site, this facility does not represent a potential REC to the subject property.
- The Memorial Urgent Care/Vancouver Memorial Hospital site (3400 Main Street) is located approximately 0.3 miles west-southwest of the subject property and is listed in the CSCSL, LUST, and UST databases. A petroleum release from a UST was identified on the property in 1992. Soil was the only reported contaminated media. The current status of the LUST is Cleanup Started. Based on the distance from the subject property, lack of groundwater contamination reported, and the regulatory status of the site, the facility does not represent a potential REC to the subject property.

Based on the distance from the subject property (over 0.5 miles from the subject property), remediation, and regulatory status (NFA determinations), the remainder of the LUST sites do not represent potential RECs to the subject property.

3.1.1.3 Confirmed and Suspected Contaminated Sites List

The state hazardous waste sites records are the states' equivalent to the Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS). These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data were obtained from Ecology's CSCSL.

A subset of the CSCSL Is the CSCSL-NFA. The database contains information about sites previously on the CSCSL that have received an NFA determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead, a No Further Action code is entered based upon the type of NFA determination the site received.

Thirteen CSCSL sites were identified within 1 mile of the subject property. Of those none are located within 0.25 miles of the subject property.

Three CSCSL/CSCSL-NFA sites are reported within approximately 0.5 miles of the subject property:

- The Main Street Chevron site, formally 76 24-hour Food Mart (3901 Main Street), is located approximately 0.3 miles north-northwest of the subject property and is listed in the LUST, UST, CSCSL, VCP, ICR and CSCSL-NFA databases. The facility received an NFA determination from Ecology dated September 18, 1998. Based on the distance from the subject property, no reported groundwater contamination, and the regulatory status of the site, this facility does not represent a potential REC to the subject property.
- The Memorial Urgent Care site (3400 Main Street) is located approximately 0.3 miles west-southwest of the subject property and is listed in the CSCSL, LUST, and UST databases. A petroleum release from a UST was identified on the property in 1992. Soil was the only reported contaminated media. The current status of the LUST is Cleanup Started. Based on the distance from the subject property, no report of groundwater contamination, and the regulatory status of the site, the facility does not represent a potential REC to the subject property.
- WSDOT District 4 Facility (4200 Main Street) is located approximately 0.4 miles northwest of the subject property and is listed in the CSCSL and RCRA NonGen/NLR databases. The site had confirmed contamination of groundwater. An NFA was issued in 1996; however, it appears that in 2003 the site was reopened and cleanup has started. Based on the distance from the subject property, cross-gradient groundwater flow, and the regulatory status of the site, the facility does not represent a potential REC to the subject property.

Based on the distance from subject property, continued cleanup efforts, and NFA determinations, none of the identified sites appear to represent RECs to the subject property, unless specifically noted otherwise in another section.

3.1.1.4 SPILLS Database

This database provides a comprehensive list of reported spills. The subject property is not listed as a SPILLS site.

3.1.1.5 Voluntary Cleanup Program

This database provides a listing of sites that have entered either the VCP or its predecessor, the Independent Remedial Action Program.

The subject property is not listed as a VCP site. No VCP sites are listed within 0.125 miles of the subject property.

One VCP site is reported within 0.5 miles of the subject property:

- The Main Street Chevron site, formally 76 24-hour Food Mart (3901 Main Street), is located approximately 0.3 miles north-northwest of the subject property and is listed in the LUST,

UST, CSCSL, VCP, ICR and CSCSL-NFA databases. Ecology lists the site as a "cancelled" VCP site. An NFA was issued by Ecology for the site September 18, 1998. Refer to the LUST List in Section 3.1.1.2 above for more details.

The site does not represent a REC to the subject property based on cleanup actions, regulatory status, and distance from the subject property.

3.1.1.6 Independent Cleanup Report

These are remedial action reports that Ecology has received from either the owner or operator of the site. These actions have been conducted without department oversight or approval and are not under an order or decree.

The subject property is not listed as an ICR site. No ICR sites are listed within 0.125 miles of the subject property. Two ICR sites, Main Street Chevron and Vancouver Memorial Hospital (3400 Main Street and 3910 Main Street), are reported within 0.5 miles of the subject property and are discussed in the LUST Section 3.1.1.2 above.

These sites do not represent a REC to the subject property based on distance and regulatory status.

3.1.1.7 Solid Waste Facilities/Landfill

The SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data were obtained from Ecology's Solid Waste Facilities Database.

The subject property is not listed as a SWF/LF site. No SWF/LF sites were reported within 0.5 miles of the subject property. SWF/LF sites do not appear to represent a REC to the subject property.

3.1.1.8 Brownfields List

The Brownfields List is a database of sites that Ecology considers brownfields or that have received financial or technical assistance for assessment and/or cleanup. A brownfield is "a real property where expansion or redevelopment is complicated by actual or perceived environmental contamination." The subject property is not listed as a brownfield site, and there are no sites listed within 0.5 miles of the subject property.

3.1.2 Environmental Protection Agency Databases

The EPA administers several programs designed to protect the environment and monitor the generation, storage, treatment, and disposal of hazardous substances. The following sections summarize the most relevant information obtained from the EDR report regarding sites identified within the ASTM E1527-21 search radii from the following databases:

- National Priorities List (NPL)
- Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) List

- Corrective Action Report (CORRACTS) List
- RCRA
- Resource Conservation and Recovery Act Information (RCRAInfo) List
- Emergency Response Notification System (ERNS) List
- U.S. Brownfields List

3.1.2.1 National Priorities List

The NPL identifies priority hazardous waste sites for remedial actions under the EPA Superfund program. Information contained in the EDR report indicates that the subject property is not listed as an NPL site. Two NPL sites were identified within 1 mile of the subject property.

- The Bonneville Power Administration Ross Complex site (5411 NE Highway 99) is located approximately 1 mile north of the subject property. Soil and groundwater on the site were contaminated with hazardous chemicals by improper handling of materials and wastes. The site was added to the NPL list in 1989 and delisted from the NPL in 1996 following cleanup. The EPA confirmed that the site is closed.
- The Vancouver Water Station #1 site (E Reserve and NE Fourth Plain Boulevard) is a City of Vancouver drinking water well located approximately 1 mile southeast of the subject property. In 1988, tetrachloroethylene (PCE) was detected in well water. Following remedial actions, the site was de-listed from the NPL in 2018 following cleanup. Ecology confirmed that the site is closed.

Based on the distance from the subject property and regulatory status, neither of the sites discussed above represent a REC to the subject property.

3.1.2.2 CERCLIS List

The EPA's CERCLIS List identifies sites that may potentially pose a threat to the environment or the health of the general public.

Information contained in the EDR report indicates that the subject property is not listed as a CERCLIS site. No CERCLIS sites were listed within 0.5 miles of the subject property.

The EPA also publishes the CERCLIS-NFRAP List that identifies CERCLIS sites that have been designated "no further remedial action planned" (NFRAP) and that have been removed from the CERCLIS List. Information contained in the EDR report indicates that the subject property is not listed as a CERCLIS-NFRAP site. No CERCLIS-NFRAP sites were listed within 0.5 miles of the subject property.

3.1.2.3 Corrective Action Reports List

The CORRACTS List identifies hazardous waste handlers with a history of RCRA corrective action activity. This list shows which corrective action events have occurred for every hazardous waste handler that has had corrective action activity due to improper procedures or handling.

Information contained in the EDR report indicates that the subject property is not listed as a CORRACTS site. One CORRACTS site (Bonneville Power Administration Ross Complex site) was listed within 1 mile of the subject property. Information about this site is provided in Section 3.1.2.1.

3.1.2.4 RCRA Generators List

RCRAInfo is EPA's comprehensive information system, providing access to data supporting RCRA and the Hazardous and Solid Waste Amendments of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by RCRA.

Conditionally exempt small quantity generators generate less than 100 kilograms (kg) of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Very small quantity generators generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators generate more than 1,000 kg of hazardous waste, or more than 1 kg of acutely hazardous waste per month. Non-generators/No Longer Regulated (NonGen/NLR) do not presently generate hazardous waste.

Information contained in the EDR report indicates that the subject property is not listed in any RCRA database.

One RCRA NonGen NLR site (Goodwin Acid Drum) is listed within 0.25 miles of the subject property. However, the location for the site appears to be an EDR mapping error; 2100 Goodwin Road in Vancouver, Washington 98660 is located approximately 10 miles east of the subject property, outside the area of assessment. Therefore, this site is not a REC to the subject property.

The EPA also regulates the management of hazardous waste at transportation, storage, and disposal facilities (TSDF). Information contained in the EDR report indicates the subject property is not listed as a TSDF site. No TSDF sites were identified within 0.5 miles of the subject property.

3.1.2.5 Emergency Response Notification System List

The ERNS List is a national database containing information from spill reports made to federal authorities. Information contained in the EDR report indicates that no ERNS sites are listed within 1 mile of the subject property.

3.1.2.6 U.S. Brownfields List

The EPA's U.S. Brownfields List identifies brownfield properties addressed by Cooperative Agreement Recipients or by Targeted Brownfields Assessments. The EDR report indicates the subject property is not listed as a U.S. Brownfields site. One U.S. Brownfields site was listed within 0.5 miles of the subject property.

- The CRC site (3600 O Street) is located approximately 0.3 miles east of the subject property. The City of Vancouver used an EPA Brownfields Assessment grant to perform Phase I and II ESAs of the site. Based upon distance from the subject property, the site does not represent a REC to the subject property.

3.1.3 Other Databases

The following sections include other databases identified in the EDR report that may be relevant to assessing potential environmental liability or environmental issues at the subject property.

3.1.3.1 Environmental Data Resources Proprietary Databases

EDR has conducted research on the occurrence of historical business practices that may constitute a REC to properties. The database was developed from data found in historical city directories and contains information on over 100,000 former gas stations, manufactured gas plants, and dry cleaners. Due to the nature of these businesses, the sites have the potential for soil and groundwater contamination to have occurred.

EDR Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. The listings reviewed include, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, and/or service station.

A review of the EDR Historical Auto Stations list, as provided by EDR, indicated that there are no EDR Historical Auto Stations sites within 0.125 miles of the subject property.

EDR Manufactured Gas List

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800s to 1950s to produce a gas that could be distributed and used as fuel. Many of the by-products of the gas production, such as coal tar (oily waste containing volatile and nonvolatile chemicals), sludges, oils, and other compounds, are potentially hazardous to human health and the environment. The by-products from this process were frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

No manufactured gas sites are listed within 1 mile of the subject property.

EDR Historical Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry-cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to, dry cleaners, cleaners, laundries, laundromats, cleaning/laundry businesses, wash and/or dry businesses.

A review of the EDR Historical Dry Cleaner list, as provided by EDR, has revealed that there are no Historical Dry Cleaner sites within 0.125 miles of the subject property.

3.1.4 Orphan Site List

Orphan sites are those for which mapping information is not detailed enough to plot the location of the site, or for which there is no known responsible party, or whose responsible party is unwilling or unable to pay for cleanup. Based on a review of the information for and location of the orphan sites, none appear to represent a potential REC to the subject property.

3.1.5 Vapor Encroachment

ASTM Standard E1527-21 defines vapor migration as "the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface." The recognition of vapor migration as a possible REC may require incorporation of new types of controls and restrictions to address this contamination pathway.

The subject property and adjacent sites were reviewed in an effort to determine if vapor migration has, or has the potential to have, occurred at the site, and/or from adjacent properties. Based on the information reviewed, the subject property is not identified as a potential vapor intrusion site. There is no known presence of USTs, volatile organic compound contamination, or other conditions on the subject property nor adjacent properties that would be expected to result in potential vapor migration issues.

3.2 Historical Use Information

The objective of the historical use information review is to develop a history of the previous uses of the subject property and surrounding area to help identify the likelihood that past uses have led to RECs in connection with the subject property. Parametrix researched the historical land use, occupancy, and ownership of the subject property and adjacent properties to evaluate historical uses that are known to be associated with RECs. Historical records reviewed include the EDR Certified Sanborn® Map Report and the EDR Aerial Photo Decade Package.

3.2.1 Certified Sanborn® Map Report

Parametrix requested Certified Sanborn Fire Insurance maps from EDR to help identify past uses of the subject property and adjacent parcels. Copies of the 1928, 1949, and 1966 Certified Sanborn Maps are included in Appendix B. Observations are provided below.

1928 The subject property and adjacent and vicinity parcels are depicted as undeveloped.

1949 The subject property is depicted as undeveloped. Dwellings are depicted on the parcels to the north, east, and south of the subject property.

1966 A dwelling with an attached garage is depicted on the subject property. Dwellings are depicted on the adjacent and vicinity parcels.

3.2.2 Historical Aerial Photograph Review

Historical aerial photographs of the subject property area were obtained from EDR in the EDR Aerial Photo Decade Package. Aerial photographs for the years 1935, 1948, 1951, 1960, 1970, 1975, 1981, 1990, 1994, 2000, 2006, 2011, 2015, and 2019 were examined. Copies of the aerial photographs are included in Appendix C. Observations are listed below.

1935	The subject property and adjacent properties appear vacant and with no trees visible on the subject property and adjacent properties. The vicinity is primarily vacant and rural residential, with several houses visible to the south, north and west of the subject property. Roads are visible to the north, west, east, and south of the subject property.
1948	The area surrounding the subject property is partially developed with houses visible on adjacent properties to the north, south, east, and west.
1951	Houses are visible on most properties near the subject property.
1960	A residential building is visible on the subject property. I-5 is visible east of the parcel east of the subject property. Except for I-5, the vicinity appears to remain residential.
1970–1975	The subject property and surrounding areas appear similar to the previous aerial photograph.
1981	The extension of the 39th Street southbound onramp to I-5 is visible to the east of the subject property. The eastern half of the block was razed to facilitate construction of the onramp. E. Frontage Road east of the subject property is visible, separating the subject property and the I-5 39th Street onramp extension.
1990–2000	The subject property and adjacent areas appear similar to the previous photograph.
2006	The subject property and adjacent areas appear similar to the previous photograph. A shed is visible in the backyard adjacent to E. Frontage Rd. at the subject property.
2011–2019	The subject property and adjacent areas appear similar to the previous photograph.

Based on the aerial photographic history, the subject property was vacant until developed in the 1950s. In an aerial photograph from 1960, a residential building is visible on the subject property. The residential building is visible in subsequent aerial photographs. The shed appears to have been constructed between 2000 and 2006.

The area appears to have remained residential use since developed, with no significant changes except for the construction of I-5 between 1951 and 1960 and, later, the extension of the 39th Street southbound I-5 onramp between 1975 and 1981. No evidence of RECs was identified on the subject property during the historical photograph review.

3.2.3 Local Agency Records

Information from local agencies was reviewed for environmental significance as described in the following sections.

3.2.3.1 Clark County

Based on information from the Clark County Property Information Center, the subject property comprises tax parcel 14765000 and is approximately 0.11 acres. The subject property is currently owned by Shareece and Marcus Davis and is used as a residence.

Clark County property records indicate that the current building on the property was built in 1955. A review of available permits for environmental significance (i.e., septic tank, stormwater, dry wells, and/or USTs or aboveground storage tanks [ASTs]) was completed. No permits of environmental significance were identified.

3.3 Additional Environmental Information

The following sections provide a summary of additional environmental information obtained for the site.

3.3.1 Asbestos

The manufacture of most asbestos-containing materials (ACM) was banned by the EPA by 1979. Prior to this, asbestos was a common constituent of numerous building materials, including floor and ceiling tiles, caulking, pipe insulation, roofing materials, and exterior siding.

Based on the age of the building (constructed in 1955), there is potential for ACM to have been used in the construction of the building.

3.3.2 Lead-Based Paint

Before 1977, paint commonly contained lead, which is considered to cause human health problems if inhaled when disturbed and/or ingested. Based on the age of the building (constructed in 1955), there is potential for lead-based paint (LBP) to have been used in the construction of the building.

3.3.3 Polychlorinated Biphenyls

Polychlorinated biphenyl (PCB) production was banned in the United States in 1979. Transformers can potentially contain PCBs. No transformers are currently located on the property.

Based on the age of the building (constructed in 1955), there is potential for PCBs to have been used in the construction of the building (primarily used in lighting and electrical equipment).

3.3.4 Radon

Radon is a naturally occurring radioactive gas formed by the decay of uranium in some rocks and soil. The risk of adverse health effects associated with radon gas depend upon various factors such as the concentration of the gas and exposure duration. The potential concentration of radon gas within a

building depends on subsurface soil conditions, the integrity of the building's foundation, the existence of a basement or crawl space (primary areas of concern), and the building's ventilation.

Clark County is located in Federal EPA Radon Zone 1. Based on this limited information, radon may represent an environmental concern at the subject property.

4. FILE REVIEW

In accordance with ASTM Standard E1527-21, inquiries and review of previous investigations for the subject property and a review of regulatory files for the subject property or adjacent properties may be conducted to further evaluate environmental conditions on the property or adjacent properties and to fill in data gaps where applicable. Previous investigations and file reviews are summarized below.

4.1 Previous Investigations

Based on regulatory information from EDR and Ecology, the subject property is not listed on any regulatory database. No previous investigations of the subject property were identified during the course of this Phase I ESA.

4.2 Adjacent and Nearby Properties File Review

Several nearby properties were listed on environmental databases, as described in Section 3. Sufficient site-specific information was available through review of the EDR report, as well as online Ecology files, to develop an opinion on the potential for these properties to have affected the subject property. Therefore, a specific file review (physical review at Ecology) was not required beyond those completed during the course of this Phase I ESA. Specific information on the nature of release, types of contaminants, media impacted, and the potential to have affected the subject property or otherwise caused environmental concern is provided in Section 3.

5. SITE EXAMINATION

Parametrix conducted a site examination of the subject property from public right of way on September 21, 2023. The site examination consisted of observing the areas immediately surrounding the subject property, providing observations of the general environmental conditions on the subject property, and visually assessing the subject property and adjacent properties for evidence of hazardous materials. Photographs of the subject property taken during the site walk are included in Appendix D.

5.1 Subject Property

The subject property is Clark County tax parcel 14765000 and is approximately 0.11 acres in area. The subject property is owned by Shareece and Marcus Davis and is occupied by a single-family residential building with an attached garage. There is also a detached outbuilding in backyard. Clark County records indicate that the current residential building was constructed in 1955. The current building appears to have been the first development on the subject property.

All observations were taken from the public right of way. No evidence of USTs, ASTs, or other indications of environmental significance were observed on the exterior portions of the property. In addition, no evidence of significant storage or spills of hazardous substances and/or petroleum products was observed on the subject property. No evidence of staining, adverse odors, or other indications of potential releases was observed. In general, no RECs or other adverse environmental conditions were identified associated with the subject property.

The lack of access to the subject property and a full site examination represents a data gap in accordance with ASTM Standard E1527-21.

5.2 Adjacent and Nearby Properties

The vicinity of the subject property is developed for residential use for approximately a 0.25-mile radius. I-5 and the 39th Street onramp are directly to the east across E. Frontage Road from the subject property (Figure 2).

Adjacent properties were examined from public right-of-way areas for the presence of environmental conditions that have the potential to impact the subject property. Based on the limited observations made from the public right of way, no evidence of significant use or storage of hazardous substances or petroleum products, distressed vegetation, surface staining, or other RECs on adjacent properties was observed.

6. INTERVIEW

An interview was not able to be conducted with a property representative to identify any potential environmental conditions and to address information data gaps during the Phase I ESA process. The lack of a property owner or representative interview represents a data gap in accordance with ASTM Standard E1527-21.

7. CONCLUSIONS

Based on the findings of this investigation, Parametrix concluded the following:

1. The subject property is located at 3605 I Street in Vancouver, Washington, and is identified as Clark County parcel 14765000. The subject property is owned by Shareece and Marcus Davis and is occupied by a single-family residential building. The property includes an attached garage and outbuilding. Clark County records indicate that the current building was constructed in 1955. The vicinity of the subject property is developed with residential properties to the north, west, and south and an I-5 onramp and I-5 across E. Frontage Road to the east.
2. A review of historic aerial photographs shows that the current building was present by at least 1960 (other records indicated a 1955 construction date). The vicinity area transitioned from primarily undeveloped rural land to residential between 1935 and 1951. No evidence of RECs was identified on the subject property during the historical photograph and Sanborn map review.
3. Based on the age of the building (1955), there is a potential that hazardous building materials (ACM, LPB, and/or PCBs) are present in the building materials.
4. The subject property is not listed on any regulatory database that would indicate a past or current release or storage of hazardous materials. A review of regulatory information indicated that several nearby sites were identified in the regulatory record databases. However, based on the information reviewed, none of the sites identified represent a REC to the subject property.
5. No evidence of significant use or storage of hazardous substances and/or petroleum products was noted on or near the subject property. No evidence of distressed vegetation, spills or releases, dry wells, or other indications of environmental concern was identified during the site examination from public right of way.
6. An on-site reconnaissance and interview were not conducted with a property representative to identify any potential environmental conditions and to address information data gaps during the Phase I ESA process. The lack of a property owner or representative interview and the lack of a full on-site reconnaissance represent data gaps in accordance with ASTM Standard E1527-21. However, the information obtained for the Phase I ESA, including regulatory database and historical documentation, was deemed sufficient to draw conclusions of potential environmental issues with the subject property.

8. RECOMMENDATIONS

Based upon the conclusions of this investigation of the subject property, Parametrix offers the following recommendations.

1. If the building is to be demolished, a hazardous building materials survey should be completed. If hazardous materials (ACM, LBP, or PCBs) are found, they should handled, managed, and disposed of in accordance with local, state, and federal regulations.
2. No further investigation of environmental conditions on the subject property is recommended at this time.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal Delisted NPL sites

Delisted NPL: The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may deleted from the NPL where no further response is appropriate.

A review of the Delisted NPL list, as provided by EDR, and dated 04/26/2023 has revealed that there are 2 Delisted NPL sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

EPA ID:: WAD988519708
Site ID:: 1001733

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/06/2023 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lists of state- and tribal (Superfund) equivalent sites

HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

A review of the HSL list, as provided by EDR, and dated 02/23/2023 has revealed that there is 1 HSL site within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the CSCSL list, as provided by EDR, and dated 04/10/2023 has revealed that there are 12 CSCSL sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: The EPA's listing of Brownfields properties from the Cleanups in My Community program, which provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

A review of the US BROWNFIELDS list, as provided by EDR, and dated 04/06/2023 has revealed that there is 1 US BROWNFIELDS site within approximately 0.5 miles of the target property.

CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the CSCSL NFA list, as provided by EDR, and dated 04/10/2023 has revealed that there is 1 CSCSL NFA site within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/06/2023 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

GOODWIN RD ACID DRUM (Continued) **1000199877**

corrective action activities required under RCRA.

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

WA DOT VANCOUVER (Continued) **1000394626**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Waste Description:	Chromium
Waste Code:	D008
Waste Description:	Lead
Waste Code:	D009
Waste Description:	Mercury
Waste Code:	D011
Waste Description:	Silver
Waste Code:	D018
Waste Description:	Benzene
Waste Code:	D019
Waste Description:	Carbon Tetrachloride
Waste Code:	D022
Waste Description:	Chloroform
Waste Code:	D029
Waste Description:	1,1-Dichloroethylene
Waste Code:	D035
Waste Description:	Methyl Ethyl Ketone
Waste Code:	D037
Waste Description:	Pentachlorophenol
Waste Code:	D039
Waste Description:	Tetrachloroethylene

US DOE BPA ROSS COMPLEX (Continued) **1000994664**

Waste Code: D040
Waste Description: Trichlorethylene

Waste Code: D043
Waste Description: Vinyl Chloride

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F021
Waste Description: Wastes (Except Wastewater And Spent Carbon From Hydrogen Chloride Purification) From The Production Or Manufacturing Use (As A Reactant, Chemical Intermediate, Or Component In A Formulating Process) Of Pentachlorophenol, Or Of Intermediates Used To Produce Derivatives.

Waste Code: F027
Waste Description: Discarded Unused Formulations Containing Tri-, Tetra-, Or Pentachlorophenol Or Discarded Unused Formulations Containing

US DOE BPA ROSS COMPLEX (Continued) **1000994664**

Compounds Derived From These Chlorophenols. (This Listing Does Not Include Formulations Containing Hexachlorophene Synthesized From Prepurified 2,4,5-Trichlorophenol As The Sole Component.)

Waste Code: U226
Waste Description: Ethane, 1,1,1-Trichloro- (Or) Methyl Chloroform

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/26/2023

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 03/26/2023

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

State and tribal institutional control / engineering control registries

INST CONTROL: Institutional Control Site List

The Environmental Covenants Registry is a list of sites that have implemented institutional controls as part of the remedy. Institutional controls are administrative or legal measures used to prevent activities that may compromise the integrity of a cleanup action. They are meant to prevent exposure to contamination remaining on site. Institutional controls may include environmental covenants (also known as "deed restrictions"), zoning restrictions, public health advisories, or other administrative tools. The most common institutional control is an environmental covenant. Environmental covenants are legal recorded documents that typically limit certain uses of the property, such as: Drilling a water supply well on the property. Disturbing pavement covering contaminated areas. Residential use of the property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/16/2022

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

3605 I ST
VANCOUVER, WA 98663

TARGET PROPERTY COORDINATES

Latitude (North):	45.647511 - 45° 38' 51.04''
Longitude (West):	122.662598 - 122° 39' 45.35''
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	526292.0
UTM Y (Meters):	5054722.5
Elevation:	214 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	14842111 VANCOUVER, WA
Version Date:	2020

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

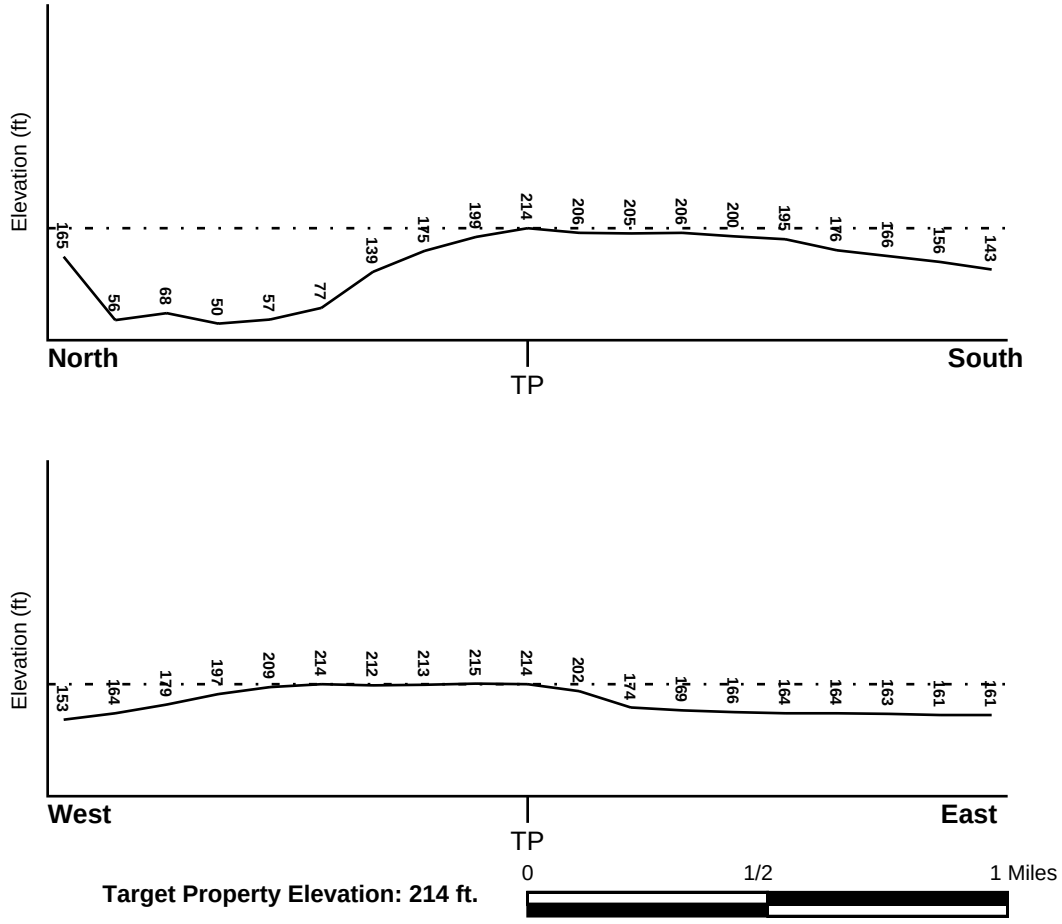
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
53011C0368D	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type

53011C0369D	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
VANCOUVER	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
AM618	1/2 - 1 Mile East	N
1G	1/2 - 1 Mile East	N

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Wind River variant

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	3 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.6
2	3 inches	24 inches	coarse sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.6
3	24 inches	59 inches	loamy coarse sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.6

Soil Map ID: 2

Soil Component Name: Wind River variant

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 5.6
2	7 inches	35 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 5.6
3	35 inches	48 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 5.6
4	48 inches	59 inches	sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 5.6

Soil Map ID: 4

Soil Component Name: Wind River variant

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat excessively drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Ecology
Telephone: 360-407-6121

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Wells
Source: Department of Health
Telephone: 360-236-3148
Group A and B well locations.

Water Well Listing
Source: Public Utility District
Telephone: 206-779-7656
A listing of water well locations in Kitsap County.

Ecology Well Logs
Source: Department of Ecology
Telephone: 360-407-7294
Point geodatabase with a record for each Ecology well report. Points are located by quarter quarter section centroid. Points contain all well report types including water wells, resource protection wells, and decommissioned wells.

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Listing
Source: Department of Natural Resources
Telephone: 360-902-1450
Locations that represent oil and gas test well sites in Washington State from 1890 to present.

RADON

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Parametrix, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

CERTIFICATION

The technical material and data contained in this document were prepared under the supervision and direction of the undersigned. We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the *all appropriate inquiries* in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

Parametrix was retained by the Washington State Department of Transportation (WSDOT) to conduct a Phase I Environmental Site Assessment (ESA) on the developed property located at 3609 I Street in Vancouver, Washington (Figure 1). This property may be acquired as part of the Interstate Bridge Replacement (IBR) Program and is known as IBR-14766000. Based on the findings of this investigation, Parametrix concluded the following:

1. The subject property is located at 3609 I Street in Vancouver, Washington, Clark County; it is parcel 14766000. The subject property is owned by Aaron Cheyney. The subject property encompasses an area of 0.11 acres including one residential building, a detached garage, and a shed. The vicinity of the subject property is developed residential properties, with an Interstate 5 on-ramp located across E. Frontage Road, east of the subject property.
2. A review of historic aerial photographs indicates that the residential building was built between 1935 and 1948 and that the garage behind the residential building was built between 1960 and 1970. The construction date for the shed is unknown. The current residential building appears to have been the first development on the subject property. The vicinity of the subject property is developed with residential properties to the north, west, and south and an I-5 onramp and I-5 across E. Frontage Road directly to the east. No evidence of recognized environmental conditions (RECs) was identified on the subject property during the historical photograph and Sanborn Map review.
3. The residential building was constructed by 1948 and the garage was constructed by 1970. Based on the age of the buildings, there is a potential that hazardous building materials (asbestos-containing materials, lead-based paint, and/or polychlorinated biphenyls) are present in the building materials.
4. The subject property is not listed on any regulatory database that would indicate a past or current release or storage of hazardous materials. A review of regulatory information indicated that several nearby sites were identified in the regulatory record databases. However, based on regulatory status and/or distance from the subject property, none of the sites identified represent a REC to the subject property.
5. No evidence of significant use or storage of hazardous substances or petroleum products was noted on or near the subject property. No evidence of distressed vegetation, spills or releases, dry wells, or other indications of environmental concern was identified during the limited site reconnaissance.
6. An on-site reconnaissance and interview were not conducted with a property representative to identify any potential environmental conditions and to address information data gaps during the Phase I ESA process. The lack of a property owner or representative interview and the lack of a full on-site reconnaissance represent data gaps in accordance with ASTM Standard E1527-21. However, the information obtained for the Phase I ESA, including regulatory database and historical documentation, was deemed sufficient to draw conclusions of potential environmental issues with the subject property.

Based upon the conclusions of this investigation of the subject property, Parametrix offers the following recommendations:

1. If the buildings are to be demolished, a hazardous building materials survey should be completed. If hazardous materials (asbestos, lead-based paint, and/or polychlorinated biphenyls) are found, they should be handled, managed, and disposed of in accordance with local, state, and federal regulations.
2. No further assessment of environmental conditions on the subject property is recommended at this time.

1. INTRODUCTION

Parametrix was retained by the Washington State Department of Transportation (WSDOT) to perform a Phase I Environmental Site Assessment (ESA) on the developed property located at 3609 I Street in Vancouver, Washington (herein referred to as the *subject property*) (Figure 1). The subject property consists of Tax Lot ID# 14766000 (Figure 2) in Clark County Washington. It is our understanding that WSDOT may pursue acquisition of the subject property as part of the Interstate Bridge Replacement (IBR) Program.

This Phase I ESA includes a review of available documentation pertaining to the subject property, a site reconnaissance, and a review of pertinent public agency documents. The Phase I ESA consisted of two distinct tasks: (1) a review of documents and of oral information (if available), and (2) a site examination. Conclusions and recommendations within this report are based solely on observed evidence and data collected during the performance of this assessment.

1.1 Purpose

The Phase I ESA was conducted in general accordance with American Society for Testing Materials (ASTM) Standard E1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, which defines the generally accepted industry practices and procedures currently applicable at the time and place of this study (ASTM 2021). The Phase I ESA is intended to permit the user to satisfy the requirements to qualify for the bona fide prospective purchaser limitation under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), and as such constitutes "all appropriate inquiries in the previous ownership and uses of the property consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601 (35)(B).

The purpose of this Phase I ESA is to identify recognized environmental conditions (RECs) on or near the subject property. The term *recognized environmental condition* is defined in ASTM Standard E1527-21 as:

> "…(1) the presence of *hazardous substances* or *petroleum products* in, on, or at the *subject property* due to a *release* to the *environment*; (2) the likely presence of *hazardous substances* or *petroleum products* in, on, or at the *subject property* due to a *release* or likely *release* to the *environment*; or (3) the presence of *hazardous substances* or *petroleum products* in, on, or at the *subject property* under conditions that pose a *material threat* of a future *release* to the *environment*."

In accordance with ASTM Standard E1527-21, some RECs may be further defined as historical recognized environmental conditions (HRECs) or controlled recognized environmental conditions (CRECs).

An HREC is defined as:

> "…*a past release* of any *hazardous substances* or *petroleum products* that has occurred in connection with the *property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *property* to any required controls."

A CREC is defined as:

> "…*a recognized environmental condition* resulting from a past *release of hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority, with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls."

This Phase I ESA endeavors to identify RECs, HRECs, and/or CRECs at the subject property.

1.2 Significant Assumptions

This assessment was conducted in accordance with generally accepted industry practices and procedures within the scope of work authorized at the time and place of this study. Parametrix's observations are limited to those areas to which it had access on the subject property.

Phase I ESA methodology included viewing accessible areas of the subject property from public right of way because on-site access was not available. In addition, an interview was not able to be conducted with a property representative to identify any potential environmental conditions during the Phase I ESA process. Unless otherwise stated, no other exceptions to the guidelines presented in ASTM E1527-21 were made during completion of this Phase I ESA.

1.3 Limitations

The findings, conclusions, and recommendations presented in this report are based on site conditions and the best available information known or made available by regulators, other consultants, or other sources at the time of the investigation. Parametrix conducted a diligent search and investigation in compliance with prevailing standards of the profession; however, certain adverse conditions may exist at the subject property not detected at the time of the investigation.

The services provided under this contract, as described in this report, include professional opinions and judgments based on data collected. These services have been provided according to generally accepted engineering practices. The opinions and conclusions contained in this report are typically based on information obtained from the following:

- Observations and measurements made by Parametrix field staff.
- Contacts and discussions with regulatory agencies and others.
- Review of available hazardous substance or solid waste lists.
- Opinions and judgments of Parametrix based on the information available.

In the professional judgment of Parametrix, the services performed pursuant to the scope of services are an adequate basis to collect data for a preliminary evaluation of the site and upon which to draw the conclusions stated in this report.

2. SUBJECT PROPERTY DESCRIPTION

The following sections summarize the location, characteristics, and physical setting of the subject property.

2.1 Location

The subject property is an approximately 0.11-acre parcel located at 3609 I Street in Vancouver, Washington. It is located to the west of E. Frontage Road adjacent to the 39th Street southbound onramp to Interstate 5 (I-5), north of East 36th Street, south of East 37th Street, and east of I street. Based on Clark County Tax Assessment records, Aaron Cheyney is the current owner of the subject property. The subject property is shown on Figure 1. The boundary of the subject property and key features are shown on Figure 2.

2.2 Site and Vicinity Characteristics

The subject property includes a 540-square-foot residential building. Based upon a review of historic aerial photographs and Sanborn maps, the residential building was constructed between 1935 and 1948, and a detached garage was constructed between 1960 and 1970.

The vicinity of the subject property is developed for residential use with commercial properties approximately 0.25 miles to the west. Properties in the direct vicinity are residential with I-5 to the east (Figure 2).

2.3 Physical Setting

The subject property is located in the Portland Basin, which marks the northern terminus of the Willamette Lowland in Oregon (DNR n.d.). The northern portion of the basin is known for its low topographic relief, with the subject property at an elevation of approximately 215 feet above mean sea level. The Portland Basin is bounded by the Cascade Range to the east and the Coast Range to the west.

Geologic processes in the Portland Basin consist of volcanism, sedimentation, and cataclysmic flood deposits in both fluvial and marine depositional environments. The subject property lies on what is mapped as coarse-grained Missoula flood deposits—cobbly, sandy gravel (Wells et al. 2020). Surface soils consist of sandy loam.

The topography in the vicinity of the subject property is a consistent slope, rising with distance from the Columbia River. The anticipated groundwater gradient is to the south toward the Columbia River. Based upon regional data, groundwater is anticipated to be 22 feet below ground surface at the subject property (Swanson and McCarley 1995).

2.4 Current Use of the Subject Property

Based on Clark County property assessment records, the subject property includes one Clark County parcel totaling 0.11 acres. The building on the subject property is currently used as a single-family residence with a detached garage.

2.5 Descriptions of Improvements on the Subject Property

The subject property includes a 540-square-foot single story residential building with a detached 253-square-foot garage. There is a small outbuilding (shed) located in the backyard near the south property line. A concrete walkway extends between the I Street and the front steps of the residential building. Power, water, and sewer are supplied by local utilities and municipalities.

2.6 Environmental Liens

An environmental lien is defined by ASTM as a charge, security, or encumbrance upon title to a property to secure the payment of a cost, damage, obligation, or duty arising out of response actions, cleanup, or other remediation of hazardous substances or petroleum products. No evidence of environmental liens was identified during the course of the Phase I ESA process. However, a formal title search was not completed as part of the scope of work.

3. RECORDS REVIEW

The purpose of the records review task was to gather environmental data on the subject property prior to the site examination. The information review consisted of two subtasks: (1) a review of regulatory databases to find sites, including and close to the subject property, listed by federal and State of Washington agencies and (2) a compilation of historical uses of the subject property and site vicinity properties to determine if past operations pose an environmental risk to the subject property.

Information for agency database review is based, in part, on a report provided by Environmental Data Resources (EDR). The EDR report (EDR 2023a) is a summary of state and federal database searches for sites of possible environmental concern and is included in Appendix A. Historical information is based on review of historical Sanborn Fire Insurance Maps (EDR 2023b; Appendix B) and aerial photos (EDR 2023c; Appendix C).

The information review enabled Parametrix personnel to characterize the types of activities performed at the site and identify data gaps prior to the site examination, and it facilitated recognition of discrepancies between reported and observed data. Data gaps identified during the document review were addressed by interviewing knowledgeable personnel, by making observations during the site examination, or by performing additional detailed investigation.

It should be noted that the information supplied by EDR is reported as Parametrix received it. EDR, in turn, reports information as it is provided in various government databases. It is not possible for either Parametrix or EDR to verify the accuracy or completeness of information contained in these databases. However, the use of and reliance on this information is a generally accepted practice in the conduct of environmental due diligence. The following sections present information from the document review.

3.1 Standard Environmental Record Sources

The following section summarizes information collected from records maintained by the U.S. Environmental Protection Agency (EPA) and the Washington State Department of Ecology (Ecology). The information includes details on sites identified in regulatory databases within recommended ASTM search distances. A complete listing of the databases reviewed is included in the EDR Radius Map™ Report (Appendix A).

3.1.1 Review of Washington State Department of Ecology Databases

The following sections summarize the most relevant information obtained from the EDR report regarding sites identified within the ASTM E1527-21 search radii from the databases listed below. Additional information regarding these sites was reviewed on Ecology's Integrated Site Information System website to supplement data gaps in the EDR report. Relevant database listings from Ecology include the following:

- Underground Storage Tank (UST) List
- Leaking Underground Storage Tank (LUST) List

- Confirmed and Suspected Cleanup Site List (CSCSL)
- CSCSL – No Further Action (NFA)
- SPILLS
- Voluntary Cleanup Program (VCP)
- Independent Cleanup Report (ICR)
- Landfill and/or Solid Waste Disposal Site Lists (SWF/LF)
- Brownfields

3.1.1.1 Underground Storage Tank List

The Ecology UST List identifies registered USTs, which are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data were obtained from Ecology's online Cleanup and Tank Search database. When unregulated USTs were included in Ecology's regulated tank documents, these USTs were included in this report.

Information contained in the EDR report indicates that the subject property is not listed as a UST site and no UST sites are located within 0.125 miles of the subject property.

Four UST sites were included in the EDR report within 0.5 miles of the subject property. Parametrix identified a fifth UST site and is included in list below:

- ARCO #5739 site (3817 Main Street) is located approximately 0.266 miles north-northwest of the subject property and is listed in Ecology's Regulated UST database. Four USTs are identified as operational. Six USTs have been removed. No release of petroleum from a UST has been reported at this site.
- The Main Street Chevron site, formally 76 24-hour Food Mart (3901 Main Street) is located approximately 0.285 miles north-northwest of the subject property. Two USTs are identified as operational.
- The First United Methodist Church site (401 East 33rd Avenue) is located approximately 0.346 miles west-southwest of the subject property and is listed in the UST database. One UST was identified as "Closed in Place." Ecology was unable to provide any other information about this UST. No release of petroleum from a UST has been reported at this site.
- The Memorial Urgent Care/Vancouver Memorial Hospital site (3400 Main Street) is located approximately 0.346 miles west-southwest of the subject property. Three USTs are listed as operational. One is a regulated UST and two are unregulated USTs (e.g., heating oil USTs).
- The Vancouver District Site 40001D site (4200 Main Street) is located approximately 0.4 miles northwest of the subject property and is listed in Ecology's Regulated UST database. Two vehicle fuel UST are identified as operational. Eight USTs have been removed (see Section 3.1.1.3 below for cleanup status).

Unless otherwise noted, the presence of a UST near a site does not, in itself, constitute a REC. Where available, other information was reviewed regarding the presence of a UST including the age of the

facility, proximity to the subject property, and known releases or spills. UST sites that have had known releases are discussed in Section 3.1.1.2 below.

3.1.1.2 Leaking Underground Storage Tank List

The LUST Incident Report contains an inventory of reported LUST incidents. The data were obtained from Ecology's LUST Database List. The subject property is not listed as a LUST site.

Two LUST sites were identified within 0.5 miles of the subject property:

- The Main Street Chevron site, formally 76 24-hour Food Mart, site (3901 Main Street) is located approximately 0.285 miles north-northwest of the subject property and is listed in the LUST, UST, CSCSL, VCP, ICR, and CSCSL-NFA databases. Two USTs are identified as operational. Six USTs have been removed. A petroleum release was identified on the property and remediated. The facility received an NFA determination from Ecology dated September 18, 1998. Based on the distance and gradient (cross-gradient) from the subject property and the regulatory status of the site, this facility does not represent a potential REC to the subject property.
- The Memorial Urgent Care site (3400 Main Street) is located approximately 0.346 miles west-southwest of the subject property and is listed in the CSCSL, LUST, and UST databases. Three USTs are listed as operational, see Section 3.1.1.1 above. One is a regulated UST and two are unregulated USTs. A petroleum release from a UST was identified on the property in 1992. Soil was the only identified contaminated media. The current status of the LUST is "Cleanup Started." Based on the distance from the subject property, lack of groundwater contamination reported, and the regulatory status of the site, the facility does not represent a potential REC to the subject property.

3.1.1.3 Confirmed and Suspected Contaminated Sites List

The state hazardous waste sites records are the states' equivalent to the Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS). These sites may or may not already be listed on the federal CERCLIS List. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data were obtained from Ecology's CSCSL.

A subset of the CSCSL is the CSCSL-NFA. The database contains information about sites previously on the CSCSL that have received an NFA determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead, an NFA code is entered based upon the type of NFA determination the site receives.

Thirteen CSCSL sites were identified within 1 mile of the subject property. Of those sites, none are located within 0.25 miles of the subject property.

Three CSCSL/CSCSL-NFA sites are reported within approximately 0.5 miles of the subject property:

- The Main Street Chevron site, formally 76 24-hour Food Mart, (3901 Main Street) is located approximately 0.3 miles north-northwest of the subject property and is listed in the LUST, UST, CSCSL, VCP, ICR, and CSCSL-NFA databases. The facility received an NFA determination from Ecology dated September 18, 1998. Based on the distance from the subject property, no reported groundwater contamination, and the regulatory status of the site, this facility does not represent a potential REC to the subject property.
- The Memorial Urgent Care/ Vancouver Memorial Hospital site (3400 Main Street) is located approximately 0.35 miles west-southwest of the subject property and is listed in the CSCSL, LUST, and UST databases. A petroleum release from a UST was identified on the property in 1992. Soil was the only reported contaminated media. The current status of the LUST is Cleanup Started. Based on the distance from the subject property, no report of groundwater contamination, and the regulatory status of the site, the facility does not represent a potential REC to the subject property.
- WSDOT District 4 Facility (4200 Main Street) is located approximately 0.4 miles northwest of the subject property and is listed in the CSCSL, RCRA Non-Generating/No Longer Regulated (NonGen/NLR), FINDS, ECHO and Manifest databases. The site had confirmed contamination of groundwater. An NFA was issued in 1996. Based on the distance from the subject property, cross-gradient groundwater flow, and the regulatory status of the site, the site does not represent a potential REC to the subject property.

Based on the distance from subject property and NFA determinations, none of the identified sites appear to represent RECs to the subject property, unless specifically noted otherwise in another section.

3.1.1.4 SPILLS Database

This database provides a comprehensive list of reported spills. The subject property is not listed as a SPILLS site.

3.1.1.5 Voluntary Cleanup Program

This database provides a listing of sites that have entered either the VCP or its predecessor, the Independent Remedial Action Program.

The subject property is not listed as a VCP site. No VCP sites are listed within 0.125 miles of the subject property.

One VCP site is reported within 0.5 miles of the subject property:

- The Main Street Chevron site, formally 76 24-hour Food Mart, (3901 Main Street) is reported approximately 0.291 miles north-northwest of the subject property and is listed in the LUST, UST, CSCSL, VCP, ICR and CSCSL-NFA databases. Ecology lists the site as a “canceled” VCP site. A NFA was issued by Ecology for the site September 18, 1998. Refer to LUST List in Section 3.1.1.2 above for more details.

The site does not represent a REC to the subject property based on cleanup actions, regulatory status, and distance from the subject property.

3.1.1.6 Independent Cleanup Report

These are remedial action reports that Ecology has received from either the owner or the operator of the site. These actions have been conducted without department oversight or approval and are not under an order or decree.

The subject property is not listed as an ICR site. No ICR sites are listed within 0.125 miles of the subject property. Two ICR sites, Main Street Chevron and Vancouver Memorial Hospital (3400 Main Street and 3910 Main Street), are reported within 0.5 miles of the subject property and are discussed in Section 3.1.1.2 above.

These sites do not represent a REC to the subject property based on distance and regulatory status.

3.1.1.7 Solid Waste Facilities/Landfill

The SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data were obtained from Ecology's Solid Waste Facilities Database.

The subject property is not listed as a SWF/LF site. No SWF/LF sites were reported within 0.5 miles of the subject property. SWF/LF sites do not appear to represent a REC to the subject property.

3.1.1.8 Brownfields List

The Brownfields List is a database of sites that Ecology considers brownfields or that have received financial or technical assistance for assessment and/or cleanup. A brownfield is a real property where expansion or redevelopment is complicated by actual or perceived environmental contamination. The subject property is not listed as a Brownfield site and there are no sites listed within 0.5 miles of the subject property.

3.1.2 Environmental Protection Agency Databases

The EPA administers several programs designed to protect the environment and monitor the generation, storage, treatment, and disposal of hazardous substances. The following sections summarize the most relevant information obtained from the EDR report regarding sites identified within the ASTM E1527-21 search radii from the following databases:

- National Priorities List (NPL)
- CERCLIS List
- Corrective Action Report (CORRACTS) List
- RCRA
- Resource Conservation and Recovery Act Information (RCRAInfo) List
- Emergency Response Notification System (ERNS) List

- U.S. Brownfields List

3.1.2.1 NPL List

The NPL identifies priority hazardous waste sites for remedial actions under the EPA Superfund program. Information contained in the EDR report indicates that the subject property is not listed as an NPL site. One NPL sites was identified within 1 mile of the subject property.

- Bonneville Power Administration Ross Complex site (5411 NE Hwy 99) is located approximately 1 mile north of the subject property. Soil and groundwater on the site was contaminated with hazardous chemicals by improper handling of materials and wastes. The site was added to the NPL list in 1989 and delisted in 1996 following cleanup. The EPA confirmed that the site is closed.

Based on distance and regulatory status, this site does not represent a REC to the subject property.

3.1.2.2 CERCLIS List

The EPA's CERCLIS List identifies sites that may potentially pose a threat to the environment or the health of the general public.

Information contained in the EDR report indicates that the subject property is not listed as a CERCLIS site. No CERCLIS sites were listed within 0.5 miles of the subject property.

The EPA also publishes the CERCLIS no further remedial action planned (NFRAP) List that identifies CERCLIS sites that have been designated NFRAP and that have been removed from the CERCLIS List. Information contained in the EDR report indicates that the subject property is not listed as a CERCLIS-NFRAP site. No CERCLIS-NFRAP sites were listed within 0.5 miles of the subject property.

3.1.2.3 CORRACTS List

The CORRACTS List identifies hazardous waste handlers with a history of RCRA corrective action activity. This list shows which corrective action events have occurred for every hazardous waste handler that has had corrective action activity due to improper procedures or handling.

Information contained in the EDR report indicates that the subject property is not listed as a CORRACTS site. One CORRACTS site (Bonneville Power Administration Ross Complex site) was listed within 1 mile of the subject property. Information about this site is provided in Section 3.1.2.1.

3.1.2.4 RCRA Generators List

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the RCRA and the Hazardous and Solid Waste Amendments of 1984. The database includes selective information on sites that generate, transport, store, treat, and/or dispose of hazardous waste as defined by RCRA.

Conditionally exempt small quantity generators generate less than 100 kilograms (kg) of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Very small quantity generators generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators generate more than 1,000 kg of hazardous waste, or more than 1 kg of acutely hazardous waste per month. NonGen/NLRs do not presently generate hazardous waste.

Information contained in the EDR report indicates that the subject property is not listed in any RCRA database.

One RCRA NonGen NLR site (Goodwin Acid Drum) is listed within 0.25 miles of the subject property. However, the location for the site appears to be an EDR mapping error; 2100 Goodwin Rd. in Vancouver, Washington, is located approximately 10 miles east of the subject property, outside the area of assessment. Therefore, this site is not a REC to the subject property.

The EPA also regulates the management of hazardous waste at transportation, storage, and disposal facilities (TSDF). Information contained in the EDR report indicates the subject property is not listed as a TSDF site. No TSDF sites were identified within 0.5 miles of the subject property.

3.1.2.5 ERNS List

The ERNS List is a national database containing information from spill reports made to federal authorities. Information contained in the EDR report indicates that no ERNS sites are listed within 1 mile of the subject property.

3.1.2.6 U.S. Brownfields List

The EPA's U.S. Brownfields List identifies brownfield properties addressed by Cooperative Agreement Recipients or by Targeted Brownfields Assessments. The EDR report indicates the subject property is not listed as a U.S. Brownfields site. One U.S. Brownfields site was listed within 0.5 miles of the subject property.

- The CRC site (3600 O Street) is located approximately 0.3 miles east of the subject property. The City of Vancouver used an EPA Brownfields Assessment grant to perform Phase 1 and 2 ESAs of the site. Based upon distance from the subject property, the site does not represent a REC to the subject property.

3.1.3 Other Databases

The following sections include other databases identified in the EDR report that may be relevant to assessing potential environmental liability or environmental issues at the subject property.

3.1.3.1 EDR Proprietary Databases

EDR has conducted research on the occurrence of historical business practices that may constitute a REC to properties. The database was developed from data found in historical city directories and contains information on over 100,000 former gas stations, manufactured gas plants, and dry cleaners.

Due to the nature of these businesses, the sites have the potential for soil and groundwater contamination.

EDR Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. The listings reviewed include, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, and/or service station.

A review of the EDR Historical Auto Stations list, as provided by EDR, indicated that there are no EDR Historical Auto Stations sites within 0.125 miles of the subject property.

EDR Manufactured Gas List

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800s to 1950s to produce a gas that could be distributed and used as fuel. Many of the by-products of gas production, such as coal tar (oily waste containing volatile and nonvolatile chemicals), sludges, oils, and other compounds, are potentially hazardous to human health and the environment. The by-products from this process were frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

No manufactured gas sites are listed within 1 mile of the subject property.

EDR Historical Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to, dry cleaners, cleaners, laundries, laundromats, cleaning/laundry businesses, wash and/or dry businesses.

A review of the EDR Historical Dry Cleaner list, as provided by EDR, has revealed that there are no Historical Dry Cleaner sites within 0.125 miles of the subject property.

3.1.4 Orphan Site List

Orphan sites are those for which mapping information is not detailed enough to plot the location of the site, or for which there is no known responsible party, or whose responsible party is unwilling or unable to pay for cleanup. Based on a review of the information for and location of the orphan sites, none appear to represent a potential REC to the subject property.

3.1.5 Vapor Encroachment

ASTM Standard E1527-21 defines vapor migration as "the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface." The recognition of vapor migration as a possible REC may require incorporation of new types of controls and restrictions to address this contamination pathway.

The subject property and adjacent sites were reviewed in an effort to determine if vapor migration has, or has the potential to have, occurred at the site, from adjacent properties. Based on the information reviewed, the subject property is not identified as a potential vapor intrusion site. There is no known presence of USTs, volatile organic compound contamination, or other conditions on the subject property nor adjacent properties that would be expected to result in potential vapor migration issues.

3.2 Historical Use Information

The objective of the historical use information review is to develop a history of the previous uses of the subject property and surrounding area to help identify the likelihood that past uses have led to RECs in connection with the subject property. Parametrix researched the historical land use, occupancy, and ownership of the subject property and adjacent properties to evaluate historical uses that are known to be associated with RECs. Historical records reviewed include the EDR Certified Sanborn® Map Report and the EDR Aerial Photo Decade Package.

3.2.1 Certified Sanborn® Map Report

Fire insurance maps in the EDR Certified Sanborn Map Report showing the vicinity of the subject property were requested to establish historical business operations at the subject property and adjacent properties. Copies of the 1928, 1949, and 1966 Certified Sanborn maps are included in Appendix B. No current or historical business operations were depicted in the Sanborn maps at or adjacent to the subject property. Observations are listed below.

1928	The subject property and adjacent and vicinity parcels are all depicted as undeveloped.
1949	Dwellings are depicted on the subject property and the parcels to the east and west. The parcels to the north and south are depicted as undeveloped.
1966	Dwellings are depicted on the subject property and all of the adjacent and vicinity parcels.

3.2.2 Historical Aerial Photograph Review

Historical aerial photographs of the subject property area were obtained from EDR in the EDR Aerial Photo Decade Package. Aerial photographs for the years 1935, 1948, 1951, 1960, 1970, 1975, 1981,

1990, 1994, 2000, 2006, 2011, 2015, and 2019 were examined. Copies of the aerial photographs are included in Appendix C. Observations are listed below.

1935	The subject property and adjacent properties appear vacant and with no trees visible on the subject or adjacent properties. The vicinity is primarily vacant land, with several houses visible to the south, north, and west of the subject property. Roads are visible to the north, west, east, and south of the subject property.
1948	A building is visible in the aerial photograph of the subject property (the 1949 Sanborn Map identifies the building as a dwelling). The area surrounding the subject property is partially developed, with houses visible on adjacent properties to the west and east. Adjacent properties to the south and north are still undeveloped.
1951	Residential buildings are visible in previously undeveloped areas near the subject property.
1960	Residential buildings are visible on the adjacent properties to the north and south. I-5 is visible to the east of the adjacent property east of the subject property. Except for I-5, the vicinity appears to remain residential.
1970	A detached garage is visible in the aerial photograph of the subject property. The surrounding area appears similar to the previous aerial photograph.
1975	The subject property and adjacent areas appears similar to the previous aerial photograph.
1981	The extension of the 39th Street southbound onramp to I-5 is visible to the east of the subject property. The eastern half of the block was razed to facilitate construction of the onramp. E. Frontage Road is visible and separates the subject property and the 39th Street I-5 onramp extension.
1990–2019	The subject property and adjacent areas appear similar to the previous photograph.

Based on the aerial photographic history, the subject property was vacant with no visible trees until developed. In an aerial photograph from 1948, a building is visible on the subject property (the 1949 Sanborn Map identifies the building as a dwelling). The residential building on the subject property is visible in all subsequent aerial photographs. In the 1970 aerial photograph, a detached garage is visible behind the residential building, near E. Frontage Road.

The area appears to have remained residential use since developed, with no significant changes except for the construction of I-5 between 1951 and 1960 and, later, the extension of the 39th Street southbound I-5 onramp between 1975 and 1981. No evidence of RECs was identified on the subject property during the historical photograph review.

3.2.3 Local Agency Records

Information from local agencies was reviewed for environmental significance as described in the following sections.

3.2.3.1 Clark County

Based on information from the Clark County Property Information Center, the subject property comprises tax lot 14766000 and is approximately 0.11 acres in size. The subject property is currently owned by Aaron Cheyney and is used as a residence.

A review of permits for environmental significance (i.e., septic tank, stormwater, dry wells, and/or USTs or aboveground storage tanks) was completed. No permits of environmental significance were identified.

3.3 Additional Environmental Information

The following sections provide a summary of additional environmental information obtained for the site.

3.3.1 Asbestos

The manufacture of most asbestos-containing materials (ACM) was banned by the EPA by 1979. Prior to this, ACM was a common constituent of numerous building materials, including floor and ceiling tiles, caulking, pipe insulation, roofing materials, and exterior siding.

Based on the age of the buildings (constructed prior to 1979), there is potential for ACM to have been used in the construction of the building.

3.3.2 Lead-Based Paint

Before 1977, paint commonly contained lead, which is considered to cause human health problems if inhaled and/or ingested. Based on the age of the buildings (constructed prior to 1977), there is potential for lead-based paint to have been used in the construction of the building.

3.3.3 Polychlorinated Biphenyls

Polychlorinated biphenyls (PCB) production was banned in the United States in 1979. Based on the age of the buildings (constructed before 1979), there is potential for PCBs to have been used in the construction of the building (primarily used in lighting and electrical equipment).

3.3.4 Radon

Radon is a naturally occurring radioactive gas formed by the decay of uranium in some rocks and soil. Adverse health effects associated with radon gas depend upon various factors such as the concentration of the gas and exposure duration. The potential concentration of radon gas within a building depends on subsurface soil conditions, the integrity of the building's foundation, the existence of a basement or crawl space (primary areas of concern), and the building's ventilation.

Clark County is located in federal EPA Radon Zone 1. Based on this limited information, radon may represent an environmental concern at the subject property.

4. FILE REVIEW

In accordance with ASTM Standard E1527-21, inquiries and review of previous investigations for the subject property and a review of regulatory files for the subject property or adjacent properties may be conducted to further evaluate environmental conditions on the property or adjacent properties and to fill in data gaps where applicable. Previous investigations and file reviews are summarized below.

4.1 Previous Investigations

Based on regulatory information from EDR and Ecology, the subject property is not listed on any regulatory database. No previous investigations of the subject property were identified during the course of this Phase I ESA.

4.2 Adjacent and Nearby Properties File Review

Several nearby properties were listed on environmental databases, as described in Section 3. Sufficient site-specific information was available through review of the EDR report, as well as online Ecology files, to develop an opinion on the potential for these properties to have affected the subject property. Therefore, a specific file review (physical review at Ecology) was not required beyond those completed during the course of this Phase I ESA. Specific information on the nature of release, types of contaminants, media impacted, and the potential to have affected the subject property or otherwise caused environmental concern is provided in Section 3.

5. SITE EXAMINATION

Parametrix conducted a site examination of the subject property from public right of way on September 21, 2023. The site examination consisted of observing the areas immediately surrounding the subject property, providing observations of the general environmental conditions on the subject property, and visually assessing the subject property and adjacent properties for evidence of hazardous materials. Photographs of the subject property taken during the site walk are included in Appendix D.

5.1 Subject Property

The subject property is Clark County tax parcel 14766000 and is approximately 0.11 acres in area. The subject property is owned by Aaron Cheyney and is occupied by a single-family residential building with a detached garage. There is also a detached outbuilding (shed) in the backyard. A review of historic aerial photographs indicates that the residential building was constructed between 1935 and 1948 and that the detached garage behind the residential building was built between 1960 and 1970. The current residential building appears to have been the first development on the subject property.

All observations were taken from the public right of way. No evidence of USTs, aboveground storage tanks, or other indications of environmental significance were observed on the exterior portions of the property. In addition, no evidence of significant storage or spills of hazardous substances or petroleum products was observed on the subject property. No evidence of staining, adverse odors, or other indications of potential releases was observed. In general, no RECs or other adverse environmental conditions were identified associated with the subject property.

The lack of access to the subject property and a full site examination represents a data gap in accordance with ASTM Standard E1527-21.

5.2 Adjacent Properties

The vicinity of the subject property is developed for residential use for approximately a 0.25-mile radius. I-5 and the 39th Street onramp are across E. Frontage Road to the east. (Figure 2).

Adjacent properties were examined from public right of way areas for the presence of environmental conditions that have the potential to impact the subject property. A utility pole with a transformer is located immediately adjacent to the subject property on E. Frontage Rd. The transformer appeared to be in good condition with no obvious signs of leakage.

Based on the limited observations made from the public right of way, no evidence of significant use or storage of hazardous substances or petroleum products, distressed vegetation, surface staining or other RECs on adjacent properties was observed.

6. INTERVIEW

An interview was not able to be conducted with a property representative to identify any potential environmental conditions and to address information data gaps during the Phase I ESA process. The lack of a property owner or representative interview represents a data gap in accordance with ASTM Standard E1527-21.

7. CONCLUSIONS

Based on the findings of this investigation, Parametrix concluded the following:

1. The subject property is located at 3609 I Street in Vancouver, Washington, Clark County; it is parcel 14766000. The subject property is owned by Aaron Cheyney. The subject property encompasses an area of 0.11 acres including one residential building, a detached garage, and a shed. The vicinity of the subject property is developed residential properties, with an Interstate 5 on-ramp located across E. Frontage Road, east of the subject property.

1. A review of historic aerial photographs indicates that the residential building was built between 1935 and 1948 and that the garage behind the residential building was built between 1960 and 1970. The construction date for the shed is unknown. The current residential building appears to have been the first development on the subject property. The vicinity of the subject property is developed with residential properties to the north, west, and south and an I-5 onramp and I-5 across E. Frontage Road directly to the east. No evidence of RECs was identified on the subject property during the historical photograph and Sanborn Map review.

2. The residential building was constructed by 1948 and the garage was constructed by 1970. Based on the age of the buildings, there is a potential that hazardous building materials (ACM, lead-based paint, and/or PCBs) are present in the building materials.

3. The subject property is not listed on any regulatory database that would indicate a past or current release or storage of hazardous materials. A review of regulatory information indicated that several nearby sites were identified in the regulatory record databases. However, based on regulatory status and/or distance from the subject property, none of the sites identified represent a REC to the subject property.

4. No evidence of significant use or storage of hazardous substances or petroleum products was noted on or near the subject property. No evidence of distressed vegetation, spills or releases, dry wells, or other indications of environmental concern was identified during the limited site reconnaissance.

5. An on-site reconnaissance and interview were not conducted with a property representative to identify any potential environmental conditions and to address information data gaps during the Phase I ESA process. The lack of a property owner or representative interview and the lack of a full on-site reconnaissance represent data gaps in accordance with ASTM Standard E1527-21. However, the information obtained for the Phase I ESA, including regulatory database and historical documentation, was deemed sufficient to draw conclusions of potential environmental issues with the subject property.

8. RECOMMENDATIONS

Based upon the conclusions of this investigation of the subject property, Parametrix offers the following recommendations.

1. If the buildings are to be demolished, a hazardous building materials survey should be completed. If hazardous materials (ACM, lead-based paint, or PCBs) are found, they should be handled, managed, and disposed of in accordance with local, state, and federal regulations.
2. No further investigation of environmental conditions on the subject property is recommended at this time.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL ---------- National Priority List
Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY ---------- Federal Facility Site Information listing
SEMS ---------- Superfund Enterprise Management System

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE ---------- Superfund Enterprise Management System Archive

Lists of Federal RCRA TSD facilities

RCRA-TSDF ---------- RCRA - Treatment, Storage and Disposal

Lists of Federal RCRA generators

RCRA-LQG ---------- RCRA - Large Quantity Generators
RCRA-SQG ---------- RCRA - Small Quantity Generators
RCRA-VSQG ---------- RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

Federal institutional controls / engineering controls registries

LUCIS ---------- Land Use Control Information System
US ENG CONTROLS ---------- Engineering Controls Sites List
US INST CONTROLS ---------- Institutional Controls Sites List

Federal ERNS list

ERNS ---------- Emergency Response Notification System

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF ---------- Solid Waste Facility Database

Lists of state and tribal leaking storage tanks

INDIAN LUST ---- Leaking Underground Storage Tanks on Indian Land

Lists of state and tribal registered storage tanks

FEMA UST ---- Underground Storage Tank Listing

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal Delisted NPL sites

Delisted NPL: The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may deleted from the NPL where no further response is appropriate.

A review of the Delisted NPL list, as provided by EDR, and dated 04/26/2023 has revealed that there is 1 Delisted NPL site within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/06/2023 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

Lists of state- and tribal (Superfund) equivalent sites

HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

A review of the HSL list, as provided by EDR, and dated 02/23/2023 has revealed that there is 1 HSL site within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the CSCSL list, as provided by EDR, and dated 04/10/2023 has revealed that there are 12 CSCSL sites within approximately 1 mile of the target property.

CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the CSCSL NFA list, as provided by EDR, and dated 04/10/2023 has revealed that there is 1 CSCSL NFA site within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/06/2023 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

GOODWIN RD ACID DRUM (Continued) **1000199877**

corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
