UST SEATTLE: Underground Storage Tank (UST) Records ? Residential Listing
Records of Seattle Fire Department (SFD) permits related to decommissioning of a residential heating oil tank, permit code 6103. A record with incomplete tank info indicates that the required follow-up report has not been received by SFD. Please note that SFD records begin in 1996 when state requirement was introduced. Decommissioning of a residential heating oil tank might have occurred prior to 1996, in which SFD will not have a record.

State and tribal institutional control / engineering control registries

INST CONTROL: Institutional Control Site List

The Environmental Covenants Registry is a list of sites that have implemented institutional controls as part of the remedy. Institutional controls are administrative or legal measures used to prevent activities that may compromise the integrity of a cleanup action. They are meant to prevent exposure to contamination remaining on site. Institutional controls may include environmental covenants (also known as "deed restrictions"), zoning restrictions, public health advisories, or other administrative tools. The most common institutional control is an environmental covenant. Environmental covenants are legal recorded documents that typically limit certain uses of the property, such as: Drilling a water supply well on the property. Disturbing pavement covering contaminated areas. Residential use of the property.

PTAP: PTAP Site Listing

A list of sites accepted into the Petroleum Technical Assistance Program. The Petroleum Technical Assistance Program (PTAP) expands the state's ability to respond to the high customer demand to clean up petroleum contaminated sites. Under the PTAP, the Pollution Liability Insurance Agency (PLIA) may provide informal site-specific technical consultations and issue written opinion letters to persons conducting independent remedial actions at qualifying petroleum cleanup sites. PLIA may provide these services under the authority of RCW 70.149.040(9) and the Model Toxics Control Act (MTCA), Chapter 70.149 RCW and Chapter 173-340 WAC.

Lists of state and tribal brownfield sites

BROWNFIELDS: Brownfields Sites Listing

A listing of brownfields sites included in the Confirmed & Suspected Sites Listing. Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

TACOMA/PIERCE COUNTY:

LF TACOMA/PIERCE: Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 11/04/2024
Date Data Arrived at EDR: 11/05/2024
Date Made Active in Reports: 01/27/2025
Number of Days to Update: 83

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association’s annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

South Map:	14878142 PORTLAND, OR
Version Date:	2020

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

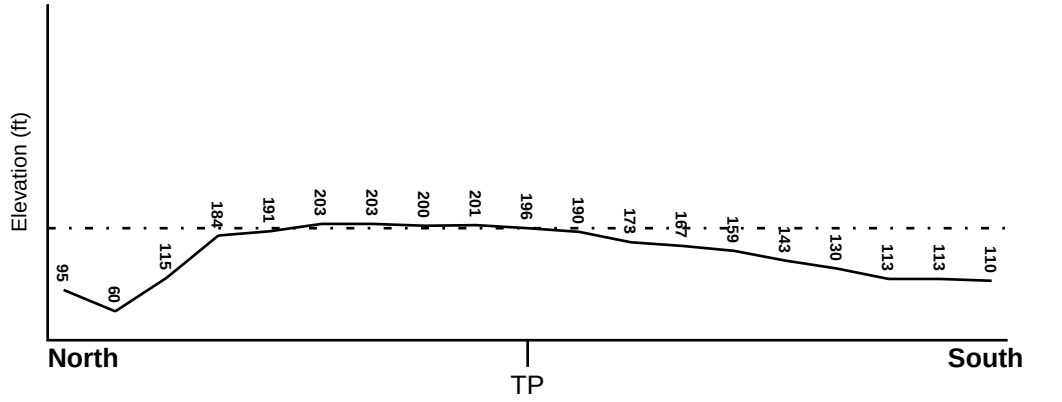
TOPOGRAPHIC INFORMATION

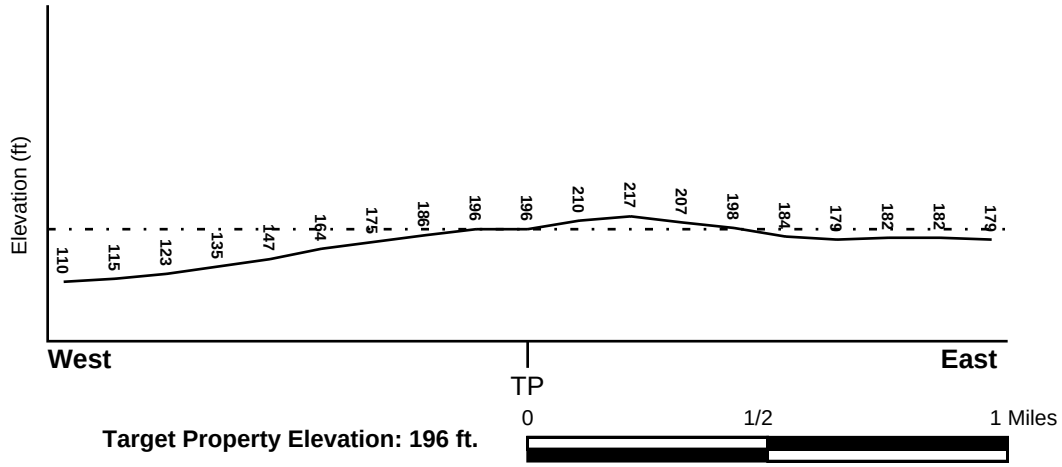
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES





0 1/2 1 Miles

Target Property Elevation: 196 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
53011C0368D	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
53011C0369D	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
VANCOUVER	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

1G	1/2 - 1 Mile ENE	N

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Wind River variant

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity	
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	micro m/sec	Soil Reaction (pH)
1	0 inches	3 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.6
2	3 inches	24 inches	coarse sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.6
3	24 inches	59 inches	loamy coarse sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: Lauren

Soil Surface Texture: gravelly loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.1
2	5 inches	33 inches	very gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 7.3 Min: 6.1

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Ecology
Telephone: 360-407-6121

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Wells
Source: Department of Health
Telephone: 360-236-3148
Group A and B well locations.

Water Well Listing
Source: Public Utility District
Telephone: 206-779-7656
A listing of water well locations in Kitsap County.

Ecology Well Logs
Source: Department of Ecology
Telephone: 360-407-7294
Point geodatabase with a record for each Ecology well report. Points are located by quarter quarter section centroid. Points contain all well report types including water wells, resource protection wells, and decommissioned wells.

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Listing
Source: Department of Natural Resources
Telephone: 360-902-1450
Locations that represent oil and gas test well sites in Washington State from 1890 to present.

RADON

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Parametrix, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Phase I ESA Site Visit Guide

Project: 274.1585.058.AE.Ole.Ole

Subject Property Location

Facility/Name	
Address	2700, 2708, 2714 K Street
Property Description	Residential Homes

Site Layout Description

Parcel#/Building Name 1758L000 1757 0000 1758 0000	Purpose: Residential Homes
Other Structures and Improvements	☐Tanks ☐Railroad tracks/railroad spur ☐Detention/retention pond ☐Storage shed(s) ☐Boneyard/junkyard ☐ Agricultural area ☐ Other: ☐ Other:
Are any areas paved?	If Yes – **Paving Material** **Location** Asphalt P Street Parking Concrete Gravel

Physical Setting

Topography of subject property	Flat
Are there any bodies of water on property?	

Are there any man-made bodies of water on the property?	
Are there any wetlands on the property?	
Are there are any water wells on the property?	

Utilities (meters, transformers, access covers, etc.)

Electricity	
Natural Gas	
Water	
Sanitary sewer	Septic systems? If yes, where?
Storm sewer	
Are there back-up power supplies?	Emergency generator(s)- how many, location? Fuel type: ☐ Batteries ☐ Diesel ☐ Natural Gas

Heating and Cooling (if observed)

Equipment Type	**Area(s)**	**Equipment Type**
☐ Central HVAC		☐ Chillers
☐ Boilers		☐ Cooling Towers
☐ Electric Heaters		☐ Window A/C Units
☐ Other		☐ Refrigeration

Operations

Operation of Property (commercial, residential, etc.)		
What ancillary (support) operations are performed at the property?	☐ Administration (office) ☐ Building Maintenance ☐ Equipment Maintenance ☐ Vehicle Washing	☐ Supply Water Treatment ☐ Wastewater Treatment ☐ Other: ☐ Other:
Are there any outdoor storage areas?	If Yes -	

Aboveground Storage Tanks

Are any ASTs currently located at the property? ☐ Yes (fill out table below) ☐ No

Location	Contents/Tank Mtl	Size	Secondary Containment

* Describe any visual evidence of spills or releases around the AST.

Underground Storage Tanks

Are any USTs currently located at the property? ☐ Yes (fill out table below) ☐ No

Location	Size/Contents	Installation Date	Overfill Protection

Any visible evidence that there were USTs previously on the property that had been removed? ☐ Yes ☐ No

Other Material Handling and Storage

Does any equipment on the property contain hydraulic oil? ☐ Yes ☐ No

Type of Equipment	# of Units/Location	Reservoir Size	Any evidence of spills/releases?
Process Equipment			
Hydraulic Lifts			

Elevators			
Trash Compactors			
Balers (i.e., cardboard)			
Other:			
Other:			

Describe other materials handled and store on property. Consider oils, propane, compressed gases including refrigerants, glycol, maintenance chemicals, boiler chemicals, cleaning products, etc.

Material	**Contain Capacity**	**Container Type**	**Material Purpose/Use**	**Storage Location(s)**	**Secondary Containment**	**Evidence of Spills/Releases**
Process Equipment						
Hydraulic Lifts						
Elevators						
Trash Compactors						
Balers (i.e., cardboard)						
Other:						
Other:						

Air Emissions

Are there any sources of air emissions at the property? (e.g., natural gas and oil-fired boilers and ovens, other combustion equipment, welding, coating and painting operations, solvent use)

Source (equipment or process)	**Pollutants**	**Emissions control device(s)**

Hazardous Waste

Does the property generate any hazardous waste? Consider waste products, pharmacy wastes, off-spec chemicals, maintenance chemicals, solvent wastes, and others.

Does the property have an RCRA identification number? ☐ Yes ☐ No

Waste Material	Generating Process	Container Size and Type, Condition	Amounts Present

Does the property accumulate hazardous waste in a central accumulation area (aka 90-day or 180-day accumulation area? ☐ Yes (describe condition of area and containers) ☐ No

Does the property accumulate hazardous wastes in any satellite accumulation areas?
☐ Yes (describe condition of area and containers) ☐ No

Other Regulated Waste

Universal Waste? Tax lot 17S8E20D00	☐ Lamps ☐ Batteries ☐ Mercuy-containment equipment ☐ Pesticides ☐ Aerosol cans ☐ Other – _____ Partially dismantled car
Location of Universal Waste	
Does facility generate used oil?	☐ Yes ☐ No Yes – describe type, size, location:

Other Regulated Wastes? (e.g., medical waste, PCB, laboratory, etc.)	☐ Yes ☐ No Yes – describe type, generation process, container sizes, location:

Non-hazardous Wastes

Consider non-hazardous parts washer solvent, oily rags, scrap metal, empty containers, wood, paper and cardboard, and general refuse.

Waste Material	Container Size and Type, Condition	Accumulation Location

Wastewater

Are there any wastewater features such as sumps, pits, ponds, or lagoons on the property? ☐ Yes ☐ No

Are there any oil-water separators, grease traps? ☐ Yes ☐ No

Is there evidence of septic tanks systems or drain fields at the property? ☐ Yes ☐ No

If yes, describe feature, location, wastewater discharged, an destination (if known):

Stormwater

Describe stormwater runoff and where it appears to flow (Consider features such as roof drains, catch basins, storm drains, drainage	

ditches, ponds, containment structures, and dry wells)	
Are any materials stored outside?	☑ Vehicles or trailers tax lot 17S8E000 has partially dismantled car parked on side of property ☐ Pallets or packaging ☐ Scrap metal ☐ Uncovered dumpsters ☐ Other: ☐ Other:

Per-and Polyfluoroalkyl Substances (PFAS)

Does the property have a fire suppression systems? What type(s)? Please write down the type of foam or chemicals present in any chemical system, if on a nameplate or sticker on the equipment.	☐ Aqueous Film Forming Foam (AFFF) ☐ Wet sprinkler system (uses water) ☐ Dry pipe system (uses air or nitrogen under pressure) ☐ Dry chemical system (uses dry chemicals under pressure) ☐ Carbon Dioxide (typically in places where people aren't present) ☐ Fire extinguishers ☐ No fire suppression system is present ☐ Unknown

Appendix F. Staff Resumes

Kelly Carini

SCIENTIST

Years of Experience: 10 ■ Years with Parametrix: 6 ■ Education: Bachelor of Arts, Environmental Studies, UNC Chapel Hill, 2009

Kelly is an environmental scientist with the ability to address a broad range of environmental site and subsurface investigation tasks. She is proficient in regulatory compliance and due diligence, with experience conducting Phase I and II ESAs, visual site inspections, and sampling and analysis of subsurface soil and groundwater. She also has experience with climate change analysis, state and federal level permit documentation, and species surveys that support NEPA and Endangered Species Act work.

Select Project Experience

Interstate Bridge Replacement Program | Portland, OR–Vancouver, WA

Oregon/Washington Department of Transportation

Kelly conducted Phase I environmental site assessments in accordance with ASTM E1527-21 and regulatory guidelines. The work required specialized historic research, regulatory database reviews, site reconnaissance, and environmental risk evaluation to identify potentially recognized environmental concerns.

Data Centers | Eastern OR

Confidential Client

Kelly conducted this Phase I environmental site assessment as part of due diligence efforts for large tracts of land being considered for future development. Additionally, she completed soil sampling to assess the presence of pesticides because of historical agricultural activity on the site. The investigation included collecting soil samples using a direct-push probe and hand auguring. Kelly also performed air corrosion testing to assess the amount of corrosive materials in the ambient air onsite.

Southwest Corridor Final EIS Phase 2 | Portland, OR

Metro Regional Government

Kelly performed hazardous materials surveys and contributed to the hazardous materials technical report for the final EIS. She assessed impacts of the project on existing soil and groundwater contamination in the area, as well as the risk of property acquisition, based on historical use of each full or partial property acquisition for the project.

Earthquake Ready Burnside Bridge NEPA | Portland, OR

Multnomah County

Kelly performed hazardous materials surveys for properties in Oregon and contributed to the hazardous materials technical report for the draft EIS. The impacts of the project on existing soil and groundwater contamination in the area and how the impacts differed by alternative were assessed. In addition, Kelly assessed potential climate change impacts of various alternatives and summarized them in a technical report.

TCE Cleanup Project | Vancouver, WA

Port of Vancouver

As a project scientist, Kelly has performed an array of tasks including sampling (soil, groundwater), data collection and analysis, remedial system maintenance, and performance assessment and reporting.

Phase 1 ESA Chevron | Portland, OR

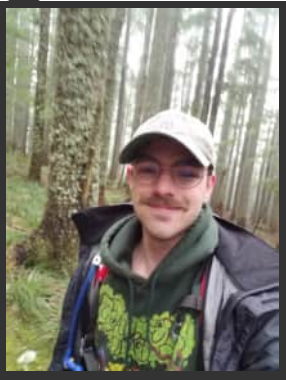
TriMet

Kelly performed a Phase I ESA for completion of due diligence a high-risk developed property for acquisition. Kelly assessed the risk associated with the acquisition of the property based on historical land use, environmental database research, and on-site reconnaissance and developed a plan for subsurface investigation.

Phase I Environmental Assessments | Covington, WA

City of Covington

Kelly performed Phase I ESAs for completion of due diligence for several tracts of land for future development. Kelly assessed the risk associated with the acquisition of the properties based on historical land use, environmental database research, and on-site reconnaissance.



Kevin Kuester

SCIENTIST I

Years of Experience: 4 ■ Years with Parametrix: 1 ■ Education: BA, Biology, University of Portland, 2021

Kevin is a biologist and wetland scientist with 4 years of experience in environmental sciences. His work has included environmental monitoring of various sites, including manufacturing, distribution, transportation, and mining facilities. He has conducted environmental sampling of both groundwater and air to monitor environmental compliance.

Selected Project Experience

Interstate Bridge Replacement Program | Portland, OR–Vancouver, WA

Oregon/Washington Department of Transportation

Kevin conducted Phase I environmental site assessments in accordance with ASTM E1527-21 and regulatory guidelines. The work required specialized expertise in historic research, regulatory database reviews, site reconnaissance, and environmental risk evaluation to identify potentially recognized environmental concerns.

Wetland Delineation

City of Troutdale, OR

Kevin conducted an on-site wetland delineation to comply with United States Army Corps of Engineers guidelines. He prepared all relevant reports for submittal to state and federal agencies, and prepared similar reports for other clients in Washington and Oregon.

Stormwater Monitoring

Confidential Clients

Kevin conducted on-site stormwater compliance assessments for various sites throughout Oregon. He tested stormwater discharge for environmental compliance, applying his certification as erosion and sedimental control lead for the states of Washington and Oregon.

Emissions Testing

Confidential Clients

Kevin conducted emissions testing to maintain manufacturing air quality standards in the states of Oregon and New Mexico.

Groundwater Monitoring

Various Clients

At various contaminated sites throughout Oregon, Kevin conducted groundwater sampling. He prepared reports with contamination levels for submittal to state and federal agencies.

Biological Surveys

Various Clients

Kevin conducted baseline biological surveys to assess the presence of state and federally listed species in the states of Oregon, Washington, Arizona, and Nevada. He prepared reports for submittal to federal and state agencies.

Marissa Ward

Environmental Planner II

Years of Experience: 5 ■ Years with Parametrix: 1 ■ Education: Environmental Studies, Boise State University, 2019 ■ Licenses and Certifications: 40-Hour HAZWOPER, Basic Wetland Delineation, Highway Traffic Noise: Basic Acoustics - National Highway Institute

Marissa is an experienced NEPA professional. She specializes in compliance regulations, traffic noise analysis, wetland delineations, GIS mapping, GPS operations, technical writing, and conducting field surveys including research, sampling, photography, and documentation. Marissa also coordinates with local, state, and federal agencies. Her project experience includes public infrastructure, including the Washington Department of Transportation Department, Idaho Transportation Department, and local highway districts, as well as private enterprise.

Selected Project Experience

Interstate Bridge Replacement Program | Portland, OR–Vancouver, WA
Oregon/Washington Department of Transportation
Marissa conducted Phase I environmental site assessments in accordance with ASTM E1527-21 and regulatory guidelines. This work required specialized expertise in historic research, regulatory database reviews, site reconnaissance, and environmental risk evaluation to identify potentially recognized environmental concerns.

Airport Way Phase 2-2 | Kitsap County, WA
Port of Bremerton
Marissa completed a categorical exclusion for this new roadway construction project for the Washington Department of Transportation (WSDOT). She oversaw all figures, documented agency coordination, and ensured that technical reports and related materials were well-organized and prepared for submission to WSDOT. Additionally, Marissa conducted a hazardous materials assessment following WSDOT guidelines. This included completing historic and regulatory database reviews and performing an environmental risk evaluation to identify potential recognized environmental concerns.

SH-44 Corridor Preservation Study | Ada County, ID
Idaho Transportation Department
Marissa collaborated with a team to complete a categorical exclusion for improvements along a 5.6-mile corridor. Her responsibilities included managing all figures, documenting coordination with agencies, and ensuring that the technical reports and related materials were organized and ready for submission to the Idaho Transportation Department.

Access to Opportunity | Ada County, ID
Idaho Transportation Department
Collaborating with a team, Marissa completed a categorical exclusion for roadway and pedestrian improvements along 12 roads. Her specific responsibilities included field survey and wetland delineation documentation. She also oversaw all figures, documented coordination with agencies, and ensured that the technical reports and related materials were organized and ready for submission to the Idaho Transportation Department.

Bennett Road Landfill | Elmore County, ID
Elmore County, Idaho
Marissa collaborated with a team to complete a conditional use permit as well as a SEPA checklist reviewing the existing environmental conditions at an expanding landfill within the Elmore County area.

Eastside Arterial Progressive Design-Build Improvements | Deschutes County, OR
City of Redmond, OR
This project is developing alternatives and final design of a new arterial road to increase connectivity and safety for expected future growth. The route traverses an area alongside Redmond's airport. Marissa prepared documentation for a NEPA categorical exclusion that met Federal Aviation Administration requirements.

Ustick; Can ADA to Owyhee Storm | Canyon County, ID
City of Nampa
Marissa completed an environmental scan memo for a document reviewing the National Wetland Inventory, Underground Storage Tank Database, Idaho National Register of Historic Places, and current Threatened and Endangered Species list. A memo will be prepared to document the results of the scan and identify any potential concerns.

Marty Marrs

STAFF ROLE

Years of Experience: 3 ■ Years with Parametrix: 1 ■ Education: BS, Natural Resource, 2022 | AS, Business Administration, 2007 ■ Certifications: Certified Erosion and Sediment Control Lead, 40-Hour HAZWOPER

Marty believes that everyone, regardless of socioeconomic status, should have access to clean water. To live this passion through her work, she pursued a degree in natural resources, choosing a focus on the human dimensions of natural resource management. This includes considering both how socioeconomic factors influence our natural resources, and how our natural resources play a role in the lives of individuals from different backgrounds. Marty's passion for clean water has led to a career focus in stormwater management and permitting. Her superpower is her ability to step back and truly listen to her clients to understand their "why" – how they see the issue at hand – and collaborating with them to develop solutions that empower them. For example, when a client is fined by a governing body, Marty helps the client consider options that are within their control. She helps clients and regulators find common ground and meet in the middle. Another way that Marty applies her passion for balancing the needs of people and nature is by addressing environmental justice during NEPA- and SEPA-related analyses.

Select Project Experience

Interstate Bridge Replacement Program | Portland, OR–Vancouver, WA

Washington State Department of Transportation

This bi-state program will result in a new I-5 bridge across the Columbia River between Washington and Oregon and includes multiple connected transportation facilities. Marty is assisting with writing environmental site assessment phase II reports and public comment coding, which involves replying to comments related to hazardous material concerns.

South Fork Avenue Extension | North Bend, WA

City of North Bend

For this roadway extension project, Parametrix evaluated the potential for the project to encounter hazardous materials during construction. Marty wrote the hazardous materials technical report for this project, summarizing field findings and complying with applicable regulatory requirements.

Tillamook Co Stormwater Compliance

County of Tillamook

The Parametrix team is providing support for the county's stormwater 1200Z permit requirements. Marty communicates directly with the client on stormwater-related issues, assists in sampling coordination events, and ensures project discharge monitoring reports (DMRs) are submitted on time.

Data Center Siting Study | Eastern OR

Confidential Client

The Parametrix team is providing technical due diligence services for a number of data center siting studies across the western US. Marty is working as part of the team that is preparing Phase I environmental site assessments for this client.

Stormwater Management for Shipping Centers | Various OR Locations

Confidential Client

In previous employment, Marty served as the Oregon State stormwater lead for her firm's major confidential shipping client. She communicated directly with the client on stormwater-related issues and ensured the project discharge monitoring reports, or DMRs, complied with Oregon DEQ requirements.

NEPA and FERC Resource Reports | Various North America Locations

Confidential Client

In previous employment, Marty assisted in writing various resource reports for NEPA and FERC clients. Her experience includes resource reporting for both Socioeconomics and Land Use.

Monitoring and Engineering for Closed Landfill | Tillamook, OR

Tillamook County

Parametrix has been providing monitoring and reporting services to the county for more than 10 years to support solid waste and stormwater permits. Since joining Parametrix, Marty has focused on the stormwater permitting aspects of the project, including data management, reporting to the Oregon DEQ, and writing the Scope of Practice, or SOP, for the state's 1200-Z stormwater permit. Marty also helped facilitate communications between the county and DEQ. She met with the DEQ representative to let them know that the county is working with us to meet permit requirements and to find out what DEQ needs to see in upcoming actions and documentation.

Shira DeGrood, RG

PHASE I/PHASE II ENVIRONMENTAL SITE ASSESSMENTS

Years of Experience: 20 ■ Years with Parametrix: 2 ■ Education: BS, Microbiology, MS, Soils and Biogeochemistry ■ Registrations: Registered Geologist, ID, OR ■ Certifications: 40-hour OSHA, Transportation Worker Identification Credential

Shira is experienced in environmental work and project management including due diligence (Phase I and Phase II assessments), contaminated site assessment and remediation. She has provided technical allocation for complex sediment superfund sites and has performed assessment, source control, and remediation of soil, groundwater, and sediment. Shira has diverse experience in project and site management of remedial investigations in soil, groundwater, and sediment, soil vapor characterization, in-situ and ex-situ remediation of soil and groundwater, feasibility studies, storm water/sediment source control evaluations, aquifer flow tests, and NPDES permitting.

Select Project Experience

Interstate Bridge Replacement Program | Portland, OR–Vancouver, WA)

Oregon/Washington Department of Transportation

Shira led a team in performing Phase I environmental site assessments (ESAs) for 136 properties to support the proposed replacement of the I-5 bridge. She performed assessments and delivered reports within 2 months of kick-off. This programmatic effort included development of site-specific templates, standardization of practices between authors, technical review of reports, and consistency review between reports, health and safety planning, and site access planning. Each Phase I ESA included a site visit, review of environmental databases and historical records, assessments of previous site investigation/remediation activities, and owner interviews.

Data Center Technical Due Diligence | Boardman, OR

Confidential Client

Shira provided technical review and oversight of the Phase I ESA for this project. The ESA involved a site visit, a review of environmental databases and historical records, and an owner interview.

Data Center Campus | Hermiston, OR

Kimley-Horn and Associates

Shira provided technical review and oversight of the Phase I ESA for this project. Work included a site visit, review of environmental databases and historical records, historical air quality review and owner interview. Shira also provided additional review and oversight related to adjacent sites with gravel quarries and unknown surface impacts.

Lakeland Hills Pump Station Facility Replacement | Auburn, WA

King County

Shira provided technical oversight of a Phase I ESA for a pump station expansion. The ESA involved a site visit, a review of environmental databases and historical records, and an owner interview.

Remedial System Evaluation and Further Site Investigation at Former Bulk Terminal | McMinnville, OR

Confidential Client

Shira led technical services on this former bulk. As the primary contact with the ODEQ project manager, she implemented a 5-year review to evaluate the current remedial action. Site investigation activities included drilling using MIHPT and UVOST technologies and groundwater monitoring. Shira identified that LNAPL was still present in areas outside of the treatment area and developed a conceptual site model to assess direct contact and vapor intrusion risks to adjacent residential properties. She identified an adjacent site as a source of remaining LNAPL in the western portion of the site.

Reeder Road Culvert Replacement Services | Portland, OR

Multnomah County

Shira performed a clean fill determination and a hazardous material corridor survey for a road reconstruction/culvert replacement project. She reviewed construction documents and coordinated with engineers to develop decision units, a sampling plan, and an analytical program. She collected samples from each unit and coordinated with the laboratory. Shira also assessed laboratory and field data and wrote a memorandum describing methods, results, conclusions, and recommendations.

Source Identification of Sediment Contamination | Portland, OR

Confidential Clients

Shira wrote expert reports to support allocation of cleanup efforts in the Willamette River. The reports assessed potential sources of contamination, such as current and previous site ownership and operations, potential contaminants associated with the site operations, pathways for contaminants to reach river sediments, and mass balance calculations. Also performed fingerprinting of PCBs, dioxins/furans, and co-contaminants using multivariate statistics to provide another line of evidence of contamination sources.

Whitney Withrow, PMP

Senior Planner

Years of Experience: 11 ■ Years with Parametrix: 1 ■ Education: BA, Environmental Biology, William Penn University, 2009 | Military Geological Engineering (Grad Cert), Missouri University of Science and Technology, 2017 ■ Licenses and Certifications: Project Management Professional (PMP), OSHA-30 Construction Safety, 40-Hour HAZWOPER, eRailSafe, DOT/IATA Hazmat Shipping

Whitney is an environmental and project management professional (PMP) with over 11 years of experience in project management, process improvement, and environmental compliance. She possesses a strong background in technical requirement identification, statistical analysis, and interagency coordination, actively maintaining partnerships with local, state, federal, and international organizations. Drawing from her extensive military experience, she offers expertise in operational planning, organizational change management, and strategic development. Her environmental qualifications include in-depth knowledge of the National Environmental Policy Act (NEPA) process, as well as conducting Phase I and Phase II environmental site assessments (ESAs) and environmental assessments (EAs).

Selected Project Experience

Interstate Bridge Replacement Program | Portland, OR–Vancouver, WA)

Oregon/Washington Department of Transportation

Whitney is the task manager responsible for leading and coordinating a technical team through the Phase I ESA process, ensuring compliance with ASTM E1527-21 and relevant regulatory guidelines. She has provided technical review, feedback, and support to maintain quality and consistency throughout the assessment process.

Phase II Site Investigations | Multiple Locations in the U.S.

Private Clients

Whitney managed drilling subcontractors during subsurface investigations using Direct Push Technology (DPT), overseeing the collection and field screening of continuous-core soil samples for volatile organic compounds (VOCs), as well as groundwater and soil-gas sampling. She provided technical guidance and on-site supervision for vapor pin installations and sub-slab assemblies to support TO-15 indoor/ambient air sampling and acrylate (PV2011/PV2026) air and sub-slab sampling. Whitney also conducted senior-level review of a site management plan for a Point of Entry Treatment (POET) system, with an emphasis on PFAS analysis and adherence to regulatory compliance standards.

Incident Response and Recovery Team | Multiple Locations in the U.S.

Private Clients

Whitney contributed to emergency response operations for train derailments, oil spills, and pipeline releases. She documented incident details, coordinated on-site activities, managed contractors, and oversaw first responder operations. Whitney also ensured regulatory compliance through waste tracking and safety oversight. Additional responsibilities included installing monitoring wells and collecting soil and groundwater samples for environmental assessment.

CERCLA Project Coordinator / On-Site Field Operations Manager | Stibnite, ID

Perpetua Resources

Whitney led field operations under the Administrative Settlement Agreement and Order on Consent for TCRA Round 1, overseeing remediation activities at four project sites during the summer of 2023. She managed project submittal schedules to ensure compliance with directives from the U.S. Environmental Protection Agency (EPA) and U.S. Forest Service (USFS). Whitney directed removal actions involving the excavation and on-site disposal of over 350,000 tons of contaminated sediment and mine waste from streambanks and floodplains to reduce environmental risks and restore impacted areas.

FERC Pipeline Relocation | NV

Private Client

As deputy project manager, Whitney oversaw coordination between subcontractors and team leads throughout the FERC Section 7(c) application process. She managed a detailed project schedule and task tracker to ensure timely deliverables. She also served as a key liaison with Naval Air Station Fallon in support of the Fallon Range Training Complex modernization initiative. Finally, Whitney conducted senior-level reviews of resource reports and led stakeholder meetings to align project goals and regulatory requirements.

Community Water Storage Project EA | Ashburn, VA

Private Client

Whitney led a multidisciplinary team of technical experts through the FEMA

NEPA process to obtain a Finding of No Significant Impact (FONSI) for the transformation of a decommissioned rock quarry into a raw water storage reservoir and the construction of a high-capacity pumping station capable of storing over 1 billion gallons of water offline from the Potomac River. She oversaw the update and reissuance of outdated permits through the Joint Permit Application process, ensuring full regulatory compliance and supporting continued project progression.

Sewer Service Area Pump Station EAs | Norfolk, VA

Private Client

Whitney led and coordinated multiple teams through the Virginia Department of Environmental Quality (VDEQ) EA process, including the preparation of EA documentation, Coastal Zone Management Act (CZMA) Consistency Certification, and Endangered Species Act (ESA) consultation. She oversaw public involvement efforts, including organizing outreach activities and managing responses to public comments, ensuring regulatory compliance and effective stakeholder engagement throughout the review process.

CERTIFICATION

The technical material and data contained in this document were prepared under the supervision and direction of the undersigned. We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the *all appropriate inquiries* in conformance with the standards and practices set forth in 40 CFR Part 312. Copies of resumes for Parametrix staff involved in the preparation of this report are included in Appendix F.

EXECUTIVE SUMMARY

Parametrix was retained by the Interstate Bridge Replacement (IBR) Program to perform a Phase I Environmental Site Assessment (ESA) on 22 contiguous commercial and residential properties located generally to the east of Interstate 5 (I-5) and north of Fort Vancouver National Historic Site in Vancouver, Washington (Figure 1). The Phase I ESA focused on partial areas of the properties that may be acquired by the IBR Program. The subject property consists of the parcels identified as IBR-38279911, IBR-38279940, IBR-38279941, IBR 38279942, IBR-38279943, and IBR-38279944, IBR-38279945, IBR 38279946, IBR 38279947, IBR 38279948, IBR 38279949, IBR 38279950, IBR 38279951, IBR-38279952, IBR 38279953, IBR 38279954, IBR 38279955, IBR 38279956, IBR 38279957, IBR 38279958, IBR-38279959, and IBR 38279960. Based on the findings of this investigation, Parametrix concluded the following:

1. The subject property includes 22 separate Clark County tax lots: 38279911, 38279940, 38279941, 38279942, 38279943, 38279944, 38279945, 38279946, 38279947, 38279948, 38279949, 38279950, 38279951, 38279952, 38279953, 38279954, 38279955, 38279956, 38279957, 38279958, 38279959, and 38279960. It currently includes multiple historic buildings renovated both residential homes, commercial offices, paved parking area, and sidewalks. The vicinity of the subject property is additional areas associated with historic Fort Vancouver. No buildings are located within the partial areas of the parcels that may be acquired by the IBR Program.
2. Review of the Certified Sanborn Map Report showed that the subject property is within an unmapped property area. During site visit conducted from public right-of-way, historical markers were observed indicating the first buildings were constructed beginning in 1884.
3. A review of historical aerial photographs indicated that the subject property was an active army base prior to 1935. Buildings constructed prior to 1935 remain present.
4. Based on the age of the buildings, hazardous building materials (asbestos, lead-based paint, or polychlorinated biphenyls) are potentially present in some buildings. However, none of the buildings are located within the partial areas of the properties that may be acquired as part of the IBR Program.
5. The subject property is not listed on any regulatory database that would indicate a past or current release or storage of hazardous materials. A review of regulatory information indicated that several nearby sites were identified in the regulatory record databases. However, based on regulatory status and distance from the subject property, none of the sites identified represent a recognized environmental condition (REC) to the subject property.
6. A review of regulatory information indicated that several nearby sites are identified in the regulatory record databases. However, based on regulatory status and distance from the subject property, none of the sites identified appear to present a REC to the subject property.

7. No evidence of significant use or storage of hazardous substances and/or petroleum products was noted on or near the subject property. No evidence of distressed vegetation, spills or releases, dry wells, or other indications of environmental concern was identified during the site reconnaissance. Several *de minimis* conditions were identified, but they are not considered RECs for the subject property.
8. An on-site reconnaissance and interview were not conducted with a property representative to identify potential environmental conditions and to address information data gaps during the Phase I ESA process. The lack of a property owner or representative interview and the lack of a full on-site reconnaissance represent data gaps in accordance with ASTM Standard E1527-21. However, the information obtained for the Phase I ESA, including regulatory database and historical documentation, was deemed sufficient.

Based upon the conclusions of this investigation of the subject property, Parametrix offers the following recommendations:

1. No further assessment of environmental conditions on the subject property, including the partial areas of the parcels that may be acquired by the IBR Program, is recommended at this time.

1. INTRODUCTION

Parametrix was retained by the Interstate Bridge Replacement (IBR) Program to perform a Phase I Environmental Site Assessment (ESA) on 22 contiguous residential and commercial properties located generally east of Interstate 5 (I-5) and north of Fort Vancouver National Historic Site in Vancouver, Washington (Figure 1). The subject property is located in Clark County, Washington, and is comprised of 22 parcels included in the IBR Program. The property identifiers, tax lot IDs, and street addresses for each of the 22 parcels are listed below, and the configuration of the properties is shown in Figure 2.

- IBR-38279911 Address unknown
- IBR-38279940 701 Officers Row
- IBR-38279941 601 Officers Row
- IBR-38279942 650 Officers Row
- IBR-38279943 750 Officers Row
- IBR-38279944 800 Officers Row
- IBR 38279945 850 Officers Row
- IBR 38279946 901 Officers Row
- IBR 38279947 951 Officers Row
- IBR 38279948 1001 Officers Row
- IBR 38279949 1051 Officers Row
- IBR 38279950 1101 Officers Row
- IBR 38279951 1151 Officers Row
- IBR 38279952 1201 Officers Row
- IBR 38279953 1251 Officers Row
- IBR 38279953 1251 Officers Row
- IBR 38279954 1301 Officers Row
- IBR 38279955 1351 Officers Row
- IBR 38279956 1401 Officers Row
- IBR 38279957 1451 Officers Row
- IBR 38279958 1501 Officers Row
- IBR 38279959 1551 Officers Row
- IBR 38279960 1601 Officers Row

It is our understanding that the IBR Program may pursue acquisition of a portion of the parcels making up the subject property. The proposed acquisition areas are shown on Figure 2. The Phase I ESA focused primarily on the partial areas of each parcel that may be acquired by the IBR Program and assessed the potential for environmental conditions on the acquisition areas from the larger property and adjacent or nearby properties.

This Phase I ESA includes a review of available documentation pertaining to the subject property, a site reconnaissance, and a review of pertinent public agency documents. The Phase I ESA consisted of two distinct tasks: (1) a review of documents and of oral information (if available), and (2) a site examination. Conclusions and recommendations within this report are based solely on observed evidence and data collected during the performance of this assessment.

1.1 Purpose and Methodology

This Phase I ESA has been prepared at the request of the Federal Transit Administration (FTA) to follow guidance provided in Standard Operating Procedure (SOP) 19, *Consideration of Contaminated Properties including Brownfields.* SOP 19 applies to "property being considered for acquisition for FTA-funded projects, with an emphasis on property that is or may be contaminated, and is limited to the property considerations taking place during the environmental review process conducted pursuant to the National Environmental Policy Act (NEPA)" (FTA 2016). The primary objective of the SOP 19 is to provide guidelines for environmental review of the property proposed for acquisition prior to approval of the final environmental impact statement.

This assessment follows the regulatory records search and evaluation standards set forth in the ASTM International (ASTM) Standard E1527-21, Standard Practice for Environmental Site Assessments. The search radius for regulatory databases was conducted in accordance with ASTM guidelines. The goal of the Phase I ESA process is to identify recognized environmental conditions (RECs), historical recognized environmental conditions (HRECs), and controlled recognized environmental conditions (CRECs) associated with the subject property as defined by ASTM E1527-21 and summarized below:

- Recognized environmental condition (REC): (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. A *de minimis* condition is not a recognized environmental condition.
- Historical recognized environmental condition (HREC): a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted

use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations, or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition.

- Controlled recognized environmental condition (CREC): recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).

1.2 Scope

The Phase I ESA process identifies potential environmental contamination on a property, helps establish a defense to liability under CERCLA should the property be acquired by the IBR Program, and includes a review of current and historical site use, ownership, regulatory records, and a site reconnaissance performed by a qualified environmental professional. If the current property owner refuses to grant right-of-entry and state law does not allow for limited right-of-entry, the property may be visually inspected from a public right-of-way or off-site vantage point, or from overhead.

The scope of services for this Phase I ESA was as follows:

- A public right-of-way site reconnaissance.
- Property Owner Questionnaire.
- A review of tax assessor's office records.
- A review of local, state and federal regulatory agency documents which aid in identifying RECs for the subject property.
- A review of available historical records to establish previous site land uses that may have led to RECs for the subject property.
- A report summarizing the above activities.

The following services were attempted but could not be completed at the time of publication due to lack of owner permission. Additional attempts will be made prior to final acquisition of the subject property:

- A right-of-entry and visual reconnaissance of the entirety of the acquisition area.
- An interview with the owner's representative.
- Property Owner Questionnaire.

Additional (beyond the ASTM 1527-21 Standard) services performed for this Phase I ESA include the following:

- Review the age of improvements on the subject property to evaluate the potential presence of asbestos-containing materials, lead-based paint (LBP), and polychlorinated biphenyls (PCB)-containing materials. A summary of this review is provided in Section 3.3.
- Review available state or federal radon information for indoor air quality risks. A summary of this review is provided in Section 3.3.4.

1.3 Significant Assumptions

Parametrix has assumed that all provided documentation, records, and data sources are accurate, complete, and reliable, unless otherwise stated. This Phase I ESA is based on visual observations conducted from the public right-of-way of accessible areas of the subject property and adjoining properties. The conclusions and recommendations are based on information gathered during the execution of the scope of work described above.

1.4 Limitations

The findings, conclusions, and recommendations presented in this report are based on site conditions and the best available information known or made available by regulators, other consultants, or other sources at the time of the investigation. Parametrix conducted a diligent search and investigation in compliance with prevailing standards of the profession; however, certain adverse conditions may exist at the site not detected at the time of the investigation.

The services provided under this contract, as described in this report, include professional opinions and judgments based on data collected. These services have been provided according to generally accepted engineering practices. The opinions and conclusions contained in this report are typically based on information obtained from the following:

- Observations and measurements made by Parametrix field staff.
- Contacts and discussions with regulatory agencies and others.
- Review of available hazardous substance or solid waste lists.
- Opinions and judgments of Parametrix based on the information available.

In the professional judgment of Parametrix, the services performed pursuant to the scope of services are an adequate basis to collect data for a preliminary evaluation of the site and upon which to draw the conclusions stated in this report.

2. SUBJECT PROPERTY DESCRIPTION

The following sections summarize the location, characteristics, and physical setting of the subject property.

2.1 Location

The subject property includes 22 contiguous residential and commercial parcels located generally to the east of I-5 and north of the Fort Vancouver National Historic Site in Vancouver, Washington. The Phase I ESA focused on the subject property that may be acquired by the IBR Program. The site location is shown on Figure 1, the Site Vicinity Map. The boundary of the subject property is shown on Figure 2.

2.2 Site and Vicinity Characteristics

Characteristics of the subject property, including the partial areas of the parcels that may be acquired by the IBR Program, are summarized in this section. Although the 22 parcels encompass separate addresses, the Clark County Assessor's office identifies these as overlapping parcels (Clark County 2025; see summary provided in Appendix E). The tax lot identifiers and addresses are provided in Section 1. The combined tax lots encompass 14.9 acres. The potential acquisition area is 418 square feet.

The tax lots are owned by the City of Vancouver and consist of renovated historic buildings that are currently used as residential homes and commercial offices.

The subject property is bounded to the north by Clark Public Utilities and VITA Elementary School, to the east by E Reserve Street and residential homes and apartments, the south by E Evergreen Boulevard and Fort Vancouver National Historic Site, and to the west by I-5 (see Figure 2).

2.3 Physical Setting

The subject property is located in the Portland Basin, which marks the northern terminus of the Willamette Lowland in Oregon (WDNR 2025). The northern portion of the basin is known for its low topographic relief, with the subject property at an elevation of approximately 110 feet above mean sea level. The Portland Basin is bound by the Cascade Range to the east and the Coast Range to the west.

Geologic processes in the Portland Basin consist of volcanism, sedimentation, and cataclysmic flood deposits in both fluvial and marine depositional environments. The subject property lies on what is

mapped as coarse-grained Missoula flood deposits, cobbly, sandy gravel deposited by the Missoula floods (Wells et al. 2020). Surface soils consist of gravelly loam.

The topography in the vicinity of the subject property is a consistent slope, rising with distance from the Columbia River. The anticipated groundwater gradient is to the south toward the Columbia River. Depth to groundwater at the subject property was approximately 90 feet below ground surface (Swanson and McCarley 1995).

2.4 Environmental Liens

An environmental lien is defined by ASTM as a charge, security, or encumbrance upon title to a property to secure the payment of a cost, damage, obligation, or duty arising out of response actions, cleanup, or other remediation of hazardous substances or petroleum products. No evidence of environmental liens was identified during the course of the Phase I ESA process. However, a formal title search was not completed as part of the scope of work.

3. RECORDS REVIEW

The purpose of the records review task was to gather environmental data on the subject property prior to the site examination. The information review consisted of two subtasks: (1) a review of regulatory databases to find sites, including and close to the subject property, listed by federal and State of Washington agencies and (2) a compilation of historical uses of the subject property and site vicinity properties to determine if past operations pose an environmental risk to the subject property.

The Environmental Data Resources (EDR) report is a summary of state and federal database searches for sites of possible environmental concern. The information review enabled Parametrix personnel to characterize the types of activities performed at the site, identify data gaps prior to the site examination, and facilitate recognition of discrepancies between reported and observed data. Data gaps identified during the document review were addressed by interviewing knowledgeable personnel, observations made during the site examination, or by conducting additional detailed investigation.

It should be noted that the information supplied by EDR is reported as Parametrix received it. EDR, in turn, reports information as it is provided in various government databases. It is not possible for either Parametrix or EDR to verify the accuracy or completeness of information contained in these databases. However, the use of and reliance on this information is a generally accepted practice in the conduct of environmental due diligence. The following sections present information from the document review.

3.1 Standard Environmental Record Sources

The following section summarizes information collected from records maintained by the U.S. Environmental Protection Agency (EPA) and the Washington State Department of Ecology (Ecology). The information includes details on sites identified in regulatory databases within recommended ASTM search distances. A complete listing of the databases reviewed is included in the EDR Radius Map Report (Appendix A).

3.1.1 Review of Washington State Department of Ecology Databases

The following sections summarize the most relevant information obtained from the EDR report regarding sites identified within the ASTM E1527-21 search radii from the following databases. Additional information regarding these sites was reviewed on Ecology's Integrated Site Information

System (ISIS) website to supplement data gaps in the EDR report. Relevant database listings from Ecology include the following:

- Underground Storage Tank (UST) List
- Leaking Underground Storage Tank (LUST) List
- Confirmed and Suspected Cleanup Site List (CSCSL)
- Confirmed and Suspected Cleanup Site List – No Further Action (CSCSL-NFA)
- SPILLS
- Voluntary Cleanup Program (VCP)
- Independent Cleanup Report (ICR)
- Landfill and/or Solid Waste Disposal Site Lists (SWF/LF)
- Brownfields

3.1.1.1 Underground Storage Tank List

The Ecology UST List identifies registered USTs, which are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data were obtained from Ecology's UST Site/Tank Report database.

Information contained in the EDR report indicates that the subject property is not listed as a UST site. Twelve UST sites are located within 0.5 miles of the subject property. The following UST sites are located adjacent to the subject property:

- The Washington State Police Vancouver Headquarters (605 East Evergreen; Facility ID 63563679) is located 0.02 miles southwest of the southwestern corner of the subject property. The facility is listed on the UST, and RCRA NONGEN/NLR databases. Based on the current regulatory status of the site, the facility is not a REC to the subject property.
- The Clark County Public Utility District (1200 Fort Vancouver Way; Facility ID 64513172) is located 0.05 miles northwest of the western portion of the subject property. The facility is listed on the UST database. Based on the current regulatory status of the site, the facility is not considered a REC to the subject property.
- Fort Vancouver National Park Service (612 East reserve Street; Facility ID 72375531) is located 0.08 miles southeast of the southeastern portion of the subject property. The facility is listed on the UST database. Based on the current regulatory status of the site, the facility is not considered a REC to the subject property.
- Fort Vancouver Regional Library (1007 East Mill Plain Blvd; Facility ID 51369737) is located 0.1 miles northwest of the western portion of the subject property. The facility is listed on the

UST database. Based on the current regulatory status of the site, the facility is not considered a REC to the subject property.

- Vancouver Sub-Installation (Vancouver Barracks Building, 638; Facility ID 82215111) is located 0.1 miles southwest of the western portion of the subject property. The facility is listed on the UST database. Based on the current regulatory status of the site, the facility is not considered a REC to the subject property.

Unless otherwise noted, the mere presence of a UST near a site does not, in itself, constitute a REC. Where available, other information was reviewed regarding the presence of a UST including the age of the facility, proximity to the subject property, and known releases or spills. UST sites which have had known releases are discussed in Section 3.1.1.2.

3.1.1.2 Leaking Underground Storage Tank List

The LUST Incident Report contains an inventory of reported leaking UST incidents. The data were obtained from Ecology's LUST Database List. The subject property is not listed as a LUST site.

Seven LUST sites were identified within 0.5 miles of the subject property. One LUST site is located within 0.25 miles of the subject property:

- The Vancouver Barracks (Hathaway Road Building 404; Facility ID 46955582) is located 0.2 miles southwest of the southwest corner of the subject property. The facility is listed on the LUST, UST, and CSCSL NFA databases. A LUST listing was issued in 2002 for leaking petroleum products. Ecology issued an NFA determination on August 20, 2012 (Appendix E). Due to the regulatory status of this site and its location downgradient of the subject property, the facility is not considered a REC.

Based on the distance from the subject property (over 0.3 miles from the subject property), remediation, and regulatory status (NFA determinations), the remainder of the LUST sites do not represent potential RECs to the subject property, including the partial areas of the parcels that may be acquired by the IBR Program.

3.1.1.3 Confirmed and Suspected Contaminated Sites List

The state hazardous waste sites records are the states' equivalent to the Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS). These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data were obtained from Ecology's Confirmed and Suspected Contaminated Sites List (CSCSL).

Twenty-four CSCSL sites were identified within 1 mile of the subject property. Of the 24 sites, one is located within 0.25 miles of the subject property. The remainder of the sites do not represent potential RECs for the subject property based on distance from the subject property, understood extent of contamination, and/or regulatory status of the site.

- The Aeon Apartments (313 East 12th Street; Facility ID 100000699) is located 0.2 miles west of the western portion of the subject property. In September 2024, Ecology sent an Early Notice Letter Regarding the Release of Hazardous Substances. The facility's status is listed as cleanup started. Based on distance from the subject property, gradient (cross gradient) and elevation in relation to the subject property (lower), this facility is not considered a REC to the subject property.

A subset of the CSCSL is the CSCSL-NFA. The database contains information about sites previously on the CSCSL that have received an NFA determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead, a no further action code is entered based upon the type of NFA determination the site received.

- Three CSCSL-NFA sites were identified within 0.25 miles of the subject property. One is listed in Section 3.1.1.2. Bill Copps Inc (901 C Street; Facility ID 62651667) is located 0.13 miles southwest of the western portion of the subject property. Petroleum products have been remediated from a soil contamination occurrence in 2011. Ecology issued an NFA determination on July 2011 (Appendix E). Based on the elevation (lower) from the subject property and regulatory status, this facility is not considered a REC.
- 400 Mill Plain Center (400 East Mill Plain Blvd; Facility ID 8223776) is located 0.2 miles northwest of the western portion of the subject property. Arsenic, lead, mercury, and other metals were reported in both soil and groundwater from a March 2009 assessment. Ecology issued an NFA determination in 2017 (Appendix E). Based on the elevation (lower) from the subject property and regulatory status, this facility is not considered a REC.

Eleven additional CSCSL-NFA sites are reported within approximately 0.5 miles of the subject property. Based on the distance from subject property, continued cleanup efforts, and NFA determinations, these sites do not appear to represent RECs to the subject property, including the partial areas of the parcels that may be acquired by the IBR Program, unless specifically noted otherwise in another section.

3.1.1.4 SPILLS Database

This database provides a comprehensive list of reported spills. The subject property is not listed as a SPILLS site.

3.1.1.5 Voluntary Cleanup Program

This database provides a listing of sites that have entered either the VCP or its predecessor, the Independent Remedial Action Program.

Four VCP sites are reported within approximately 0.5 miles of the subject property. Based on a review of regulatory status, investigation and cleanup actions conducted, and/or distance from the subject property, the VCP sites do not represent a REC to the subject property.

3.1.1.6 Independent Cleanup Report

These are remedial action reports Ecology has received from either the owner or operator of the site. These actions have been conducted without department oversight or approval and are not under an order or decree.

The subject property is not listed as an ICR site. Four ICR sites are reported within approximately 0.5 miles of the subject property and are either discussed above in other sections or do not represent a REC to the subject property based on distance and regulatory status.

3.1.1.7 Solid Waste Facilities/Landfill

The Solid Waste Facilities/Landfill (SWF/LF) records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data were obtained from Ecology's Solid Waste Facilities Handbook.

The subject property is not listed as a SWF/LF site. Two SWF/LF sites were reported within 0.5 miles of the subject property, and based on a review of regulatory status, investigation and cleanup actions conducted, and/or distance from the subject property, none of the SWF/LF sites appear to represent a REC to the subject property.

3.1.1.8 Brownfields List

The Brownfields List is a database of sites that Ecology considers brownfields or that have received financial or technical assistance for cleanup. A brownfield is "a real property where expansion or redevelopment is complicated by actual or perceived environmental contamination." The subject property is not listed as State Brownfields site. No State Brownfields sites were reported within 0.5 miles of the subject property.

3.1.2 Environmental Protection Agency Databases

The EPA administers several programs designed to protect the environment and monitor the generation, storage, treatment, and disposal of hazardous substances. The following sections summarize the most relevant information obtained from the EDR report regarding sites identified within the ASTM E1527-21 search radii from the following databases:

- National Priorities List (NPL)
- Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) List
- Corrective Action Report (CORRACTS) List
- Resource Conservation and Recovery Act (RCRA)
- Resource Conservation and Recovery Act Information (RCRAInfo) List
- Emergency Response Notification System (ERNS) List
- U.S. Brownfields List

3.1.2.1 National Priorities List

The NPL identifies priority hazardous waste sites for remedial actions under the EPA Superfund program. Information contained in the EDR report indicates that the subject property is not listed as an NPL site. No NPL sites are listed within 1 mile of the subject property.

3.1.2.2 CERCLIS List

The EPA's CERCLIS List identifies sites that may potentially pose a threat to the environment or the health of the general public.

Information contained in the EDR report indicates that the subject property is not listed as a CERCLIS site. One CERCLIS site (USPS Federal Way Facility, 32829 Pacific Hwy South) was identified within 0.5 miles of the subject property; however, based on a review of regulatory status, investigation and cleanup actions conducted, and distance from the subject property, the CERCLIS site does not represent a REC to the subject property.

The EPA also publishes the CERCLIS-NFRAP List that identifies CERCLIS sites that have been designated "no further remedial action planned" (NFRAP) and that have been removed from the CERCLIS List. Information contained in the EDR report indicates that the subject property is not listed as a CERCLIS-NFRAP site. One CERCLIS-NFRAP site was identified within 0.5 miles of the subject property; however, based on a review of regulatory status, investigation and cleanup actions

conducted, and distance from the subject property, the site does not represent a REC to the subject property.

3.1.2.3 CORRACTS List

The CORRACTS List identifies hazardous waste handlers with a history of RCRA corrective action activity. This list shows which corrective action events have occurred for every hazardous waste handler that has had corrective action activity due to improper procedures or handling.

Information contained in the EDR report indicates that the subject property is not listed as a CORRACTS site. Two CORRACTS sites are listed within 1 mile of the subject property but do not represent a REC to the subject property due to distance and because the facilities are downgradient of the subject property.

3.1.2.4 RCRA Generators List

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by RCRA.

Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Very small quantity generators (VSQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate more than 1,000 kg of hazardous waste, or more than 1 kg of acutely hazardous waste per month. Non-generators (NonGen/NLR) do not presently generate hazardous waste.

Information contained in the EDR report indicates that the subject property is not listed in any RCRA database.

One RCRA Large Quantity Generator is located at the adjacent Fort Vancouver National Historic Site. There are no violations associated with this handler. Therefore, this facility does not represent a REC to the subject property.

Twelve RCRA NonGen NLR sites and two RCRA-VSQG site are listed within 0.25 miles of the subject property. None of these sites are adjacent to the subject property, and based on a review of the regulatory status of these sites, none of these sites represent RECs to the subject property.

EPA also regulates the management of hazardous waste at transportation, storage, and disposal facilities (TSDF). Information contained in the EDR report indicates the subject property is not listed as a TSDF site. No TSDF sites were identified within 0.5 miles of the subject property.

3.1.2.5 ERNS List

The ERNS List is a national database containing information from spill reports made to federal authorities. Information contained in the EDR report indicates that no ERNS sites are listed within 1 mile of the subject property.

3.1.2.6 U.S. Brownfields List

The EPA's U.S. Brownfields List identifies brownfield properties addressed by Cooperative Agreement Recipients or by Targeted Brownfields Assessments. The EDR report indicates the subject property is not listed as a U.S. Brownfields site. No U.S. Brownfields sites are listed within 0.5 miles of the subject property.

3.1.3 Other Databases

The following sections include other databases identified in the EDR report that may be relevant to assessing potential environmental liability or environmental issues at the subject property.

3.1.3.1 EDR Proprietary Databases

EDR has conducted research on the occurrence of historical business practices that may constitute a REC to properties. The database was developed from data found in historical city directories and contains information on over 100,000 former gas stations, manufactured gas plants, and dry cleaners. Due to the nature of these businesses, the sites have the potential for soil and groundwater contamination to have occurred.

EDR Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. The listings reviewed include, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, and/or service station.

No historical auto station sites were identified within 0.125 miles of the subject property.

EDR Manufactured Gas List

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800s to 1950s to produce a gas that could be distributed and used as fuel. Many of the by-products of the gas production, such as coal tar (oily waste containing volatile and

nonvolatile chemicals), sludges, oils, and other compounds, are potentially hazardous to human health and the environment. The by-products from this process were frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

One manufactured gas site is listed within 1 mile of the subject property:

- Vancouver Gas Manufacturing site (9th and Lincoln Street) is located 0.6 miles northwest of the subject property. No additional information is available.

Based on the lack of reported releases and its distance from the subject property, this site is not considered a REC.

EDR Historical Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry-cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to, dry cleaners, cleaners, laundries, laundromats, cleaning/laundry businesses, wash and/or dry businesses.

No historical dry cleaner sites were identified within 0.125 miles of the subject property.

3.1.4 Orphan Site List

Orphan sites are those for which mapping information is not detailed enough to plot the location of the site, or for which there is no known responsible party, or the responsible party is unwilling or unable to pay for cleanup. Based on a review of the information for and location of the orphan sites, none appear to represent a potential REC to the subject property.

3.1.5 Vapor Encroachment

ASTM Standard E1527-21 defines vapor migration as "the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface." The recognition of vapor migration as a possible REC may require incorporation of new types of controls and restrictions to address this contamination pathway.

The subject property and adjacent sites were reviewed in an effort to determine if vapor migration has, or has the potential to have, occurred at the site, from adjacent properties. Based on the information reviewed, the subject property is not identified as a potential vapor intrusion site. There is no known presence of USTs on the subject property.

3.2 Historical Use Information

The objective of the historical use information review is to develop a history of the previous uses of the subject property and surrounding area to help identify the likelihood that past uses have led to RECs in connection with the subject property. Parametrix researched the historical land use, occupancy, and ownership of the subject property and adjacent properties to evaluate historical uses that are known to be associated with RECs. Historical records reviewed include the EDR Certified Sanborn Map Report and the EDR Aerial Photo Decade Package.

3.2.1 Certified Sanborn Map Report

Fire insurance maps in the EDR Certified Sanborn Map Report showing the vicinity of the subject property were requested to establish historical business operations at the subject property and adjacent properties. This report (Appendix B) certifies that the complete holdings of the Sanborn Library, LLC collection were searched based on client-supplied target property information, and fire insurance maps covering the target property were not found.

3.2.2 Historical Aerial Photograph Review

Historical aerial photographs of the subject property area were obtained from EDR in the EDR Aerial Photo Decade Package. Aerial photographs for the years 1935, 1948, 1951, 1955, 1960, 1963, 1970, 1975, 1981, 1984, 1990, 1994, 2000, 2006, 2011, 2015, and 2019 were examined. Copies of the aerial photographs are included in Appendix C. Observations are listed below.

- 1935–1951 The earliest historical aerial photograph (1935) shows the Officers Row historic buildings present. The properties in the vicinity of the subject property consist of open grassland, trees, and smaller buildings (potentially additional housing). The Fort Vancouver National Historic Site is located south of the subject property is also present.
- 1955 The majority of the subject property remains unchanged. The addition of I-5 can be found west of the subject property. Residential housing is developing to the east of the subject property.
- 1960 Little to no change is evident on the subject property or surrounding properties.
- 1963 Little to no change is evident on the subject property. Development of commercial buildings and recreational fields is present north of the subject property.
- 1970–2019 The subject property and the Fort Vancouver National Historic Site remains unchanged and appears very similar to present day aerial photographs. Areas north of the subject property also remain similar site usage.

Based on the aerial photograph history of the subject property, the majority of the subject property has remained unchanged since development of the officer housing. The addition of I-5 was observed in the 1955 historical aerial photograph. No evidence of RECs was identified on the subject property, including the partial areas of the parcels that may be acquired by the IBR Program, during the historical photograph review.

3.2.3 Local Agency Records

Information from local agencies was reviewed for environmental significance as described in the following sections.

3.2.3.1 Clark County

Based on information from the Clark County Tax Assessor's Office, the subject property consists of the following tax lots. The Assessor's office identifies each of these parcels as co-located within the same property boundary (see summary in Appendix E).

- IBR-38279911 Address unknown
- IBR-38279940 701 Officers Row
- IBR-38279941 601 Officers Row
- IBR-38279942 650 Officers Row
- IBR-38279943 750 Officers Row
- IBR-38279944 800 Officers Row
- IBR 38279945 850 Officers Row
- IBR 38279946 901 Officers Row
- IBR 38279947 951 Officers Row
- IBR 38279948 1001 Officers Row
- IBR 38279949 1051 Officers Row
- IBR 38279950 1101 Officers Row
- IBR 38279951 1151 Officers Row
- IBR 38279952 1201 Officers Row
- IBR 38279953 1251 Officers Row
- IBR 38279953 1251 Officers Row
- IBR 38279954 1301 Officers Row

- IBR 38279955 1351 Officers Row
- IBR 38279956 1401 Officers Row
- IBR 38279957 1451 Officers Row
- IBR 38279958 1501 Officers Row
- IBR 38279959 1551 Officers Row
- IBR 38279960 1601 Officers Row

The subject property is currently owned by the City of Vancouver and is used for both residential and commercial offices.

Clark County property records do not indicate a year built. Historical placards on the property state that the first buildings were constructed in the late 1800s. A review of permits for environmental significance (i.e., septic tank, stormwater, dry wells, and/or USTs or ASTs) was completed. No permits of environmental significance were identified.

3.3 Additional Environmental Information

The following sections provide a summary of additional environmental information obtained for the site.

3.3.1 Asbestos

The manufacture of most asbestos-containing materials was banned by the EPA by 1979. Prior to this, asbestos was a common constituent of numerous building materials, including floor and ceiling tiles, caulking, pipe insulation, roofing materials, and exterior siding.

Based on the age of the buildings (constructed in the 1800s), there is potential for asbestos-containing materials to have been used in the construction of the buildings. However, none of the buildings are located within the partial areas of the parcels that may be acquired by the IBR Program.

3.3.2 Lead-Based Paint

Before 1977, paint commonly contained lead which is considered to cause human health problems if ingested. Based on the age of the buildings (constructed in the 1800s), there is potential for lead-based paint to have been used in the construction of the buildings. However, none of the buildings are located within the partial areas of the parcels that may be acquired by the IBR Program.

3.3.3 Polychlorinated Biphenyls

PCBs were commercially manufactured from 1929 until PCBs were banned in 1979. PCBs were present in a range of materials where thermal stability was necessary, such as PCB-containing oils in transformers and capacitors. Based on the age of the buildings (constructed in the late 1800s with the potential for remodeling between 1929 and 1979), there is some potential for PCBs to be present in building materials . However, none of the buildings are located within the partial areas of the parcels that may be acquired by the IBR Program.

3.3.4 Radon

Radon is a naturally occurring radioactive gas formed by the decay of uranium in some rocks and soil. The adverse health effects associated with radon gas depends upon various factors such as the concentration of the gas and exposure duration. The potential concentration of radon gas within a building depends on subsurface soil conditions, the integrity of the building's foundation, the existence of a basement or crawl space (primary areas of concern), and the building's ventilation.

Clark County ZIP code 98661 is located in the Federal EPA Radon Zone 1, indicating that the indoor average radon level is greater than 4 picocuries per liter. The Washington Department of Health has identified the radon risk in the area of the subject property as high. Based on this limited information, there is a high potential that radon is an environmental concern at the property. However, none of the buildings are located within the partial areas of the parcels that may be acquired by the IBR Program.

4. FILE REVIEW

In accordance with ASTM Standard E1527-21, inquiries and review of previous investigations for the subject property and a review of regulatory files for the subject property or adjacent properties may be conducted to further evaluate environmental conditions on the property or adjacent properties and to fill in data gaps where applicable. Previous investigations and file reviews are summarized below.

4.1 Previous Investigations

Based on regulatory information from EDR and Ecology, the subject property is not listed on any regulatory database. No previous investigations of the subject property, including the partial areas of the parcels that may be acquired by the IBR Program, were identified during the course of this Phase I ESA.

4.2 Adjacent and Nearby Properties File Review

Several adjacent and nearby properties were listed on environmental databases, as described in Section 3. Sufficient site-specific information was available through review of the EDR report, as well as online Ecology files, to develop an opinion on the potential for these properties to have affected the subject property. Therefore, a specific file review (physical review at Ecology) was not required beyond those completed during the course of this Phase I ESA. Specific information on the nature of release, types of contaminants, media impacted, and the potential to have affected the subject property or otherwise caused environmental concern is provided in Section 3.

5. SITE EXAMINATION

Parametrix conducted a site examination of the subject property from public right-of-way on February 17, 2025. The site examination consisted of observing the areas immediately surrounding the subject property, providing observations of the general environmental conditions on the subject property, and visually assessing the subject property and adjacent properties for evidence of hazardous materials. The site examination focused on partial areas of the parcels that may be acquired by the IBR Program. Photographs of the subject property taken during the site walk are included in Appendix D.

5.1 Subject Property

The subject property includes multiple historic buildings, currently used as residential and commercial offices, and asphalt parking lots. Hardscaping such as sidewalks and an asphalt parking lot border the buildings to the south and far west. The partial areas of the parcels that may be acquired by the IBR Program are limited to paved and landscaped areas.

All observations were taken from the public right of way.

No evidence of USTs, ASTs, or other indications of environmental significance were observed on the exterior portions of the property. In addition, no evidence of significant storage or spills of hazardous substances and/or petroleum products was observed on the subject property. No evidence of staining, adverse odors, or other indications of potential releases was observed. In general, no RECs or other adverse environmental conditions were identified associated with the subject property. Table 1 summarizes the observed conditions.

The lack of access to the subject property and a full site examination represents a data gap in accordance with ASTM Standard E1527-21.

Table 1. Subject Property Observed Conditions

IBR ID	Address	Current Use (determined through visual observation)	Site Examination Observations
IBR 38279911	Unknown	Unmarked paved road leading to parking in back of buildings	Paved one-way road.
IBR-38279940	701 Officers Row	Office	Commercial office building.
IBR-38279941	601 Officers Row	Office	Commercial offices.

IBR ID	Address	Current Use (determined through visual observation)	Site Examination Observations
IBR-38279942	650 Officers Row	Offices	Commercial offices. Also houses 652, 654, and 656.
IBR-38279943	750 Officers Row	Offices	Commercial offices. Also houses 752, 754, and 756.
IBR-38279944	800 Offers Row	Offices	Commercial offices. Also houses 802, 804, and 806.
IBR-38279945	850 Officers Row	Columbia Land Trust	Commercial offices.
IBR-38279946	901 Offers Row	Offices	Commercial offices. Also houses 902–905.
IBR-38279947	951 Officers Row	Offices	Commercial offices. Also houses 952–955.
IBR-38279948	1001 Officers Row	Offices	Commercial offices. Also houses 1002–1009.
IBR-38279949	1051 Officers Row	Offices	Commercial offices. Also houses 1052–1059.
IBR-38279950	1101 Officers Row	Willful Wine at The Grant House	Commercial property.
IBR-38279951	1151 Officers Row	Residential townhomes	Residential property. Also houses 1153, 1155, 1157, 1161, 1163, 1165, and 1167.
IBR-38279952	1201 Officers Row	Residential townhomes	Residential property. Also houses 1203, 1205, 1207, and 1209.
IBR-38279953	1251 Officers Row	Pointnorth Consulting	Commercial offices. Also houses 1252–1255.
IBR-38279954	1301 Officers Row	The Marshall House	Historical house. Also houses 1302–1325.
IBR-38279955	1351 Officers Row	Commercial	Commercial offices. Also houses 1352–1353.
IBR-38279956	1401 Officers Row	Residential townhomes	Residential property. Also houses 1403, 1405, and 1407

IBR ID	Address	Current Use (determined through visual observation)	Site Examination Observations
IBR-38279957	1451 Officers Row	Residential townhomes	Residential property. Also houses 1453, 1455, and 1457.
IBR-38279958	1501 Officers Row	Residential townhomes	Residential property. Also houses 1503, 1505, 1507.
IBR-38279959	1551 Officers Row	Residential townhomes	Residential property. Also 1553, 1555, 1557, 1561, 1563, 1565, 1567.
IBR-38279960	1601 Officers Row	Fort Vancouver Investment Management, Vancouver Business Journal, Counseling Offices, Westby Associates, Inc.	Commercial offices. Also houses 1602–1607.

5.2 Adjacent Properties

The vicinity of the subject property is historically developed with recreational properties and commercial buildings. Adjacent properties were examined from public areas for the presence of environmental conditions which have the potential to impact the subject property.

The subject property is bounded to the north by local school property, to the west by I-5, and to the south by the Fort Vancouver National Historic Site. No evidence of significant staining or stressed vegetation was noted on the ground surface on assessable properties adjacent to the site. No evidence of the storage of chemical or hazardous materials was identified on visible areas of adjacent properties.

6. INTERVIEW

An interview was not able to be conducted with a property representative to identify potential environmental conditions and to address information data gaps during the Phase I ESA process. The lack of a property owner or representative interview represents a data gap in accordance with ASTM Standard E1527-21.

7. CONCLUSIONS

Based on the findings of this investigation, Parametrix concluded the following:

1. The subject property includes 22 separate Clark County tax lots: 38279911, 38279940, 38279941, 38279942, 38279943, 38279944, 38279945, 38279946, 38279947, 38279948, 38279949, 38279950, 38279951, 38279952, 38279953, 38279954, 38279955, 38279956, 38279957, 38279958, 38279959, and 38279960. It currently includes multiple historic buildings renovated both residential homes, commercial offices, paved parking area, and sidewalks. The vicinity of the subject property is additional areas associated with historic Fort Vancouver. No buildings are located within the partial areas of the parcels that may be acquired by the IBR Program.
2. Review of the Certified Sanborn Map Report showed that the subject property is within an unmapped property area. During the site visit conducted from public right-of-way, historical markers were observed indicating the first buildings were constructed beginning in 1884.
3. A review historical aerial photographs indicated that the subject property was an active army base prior to 1935. Buildings constructed prior to 1935 remain present.
4. Based on the age of the buildings, hazardous building materials (asbestos, lead-based paint, or polychlorinated biphenyls) are potentially present in some buildings. However, none of the buildings are located within the partial areas of the properties that may be acquired as part of the IBR Program.
5. The subject property is not listed on any regulatory database that would indicate a past or current release or storage of hazardous materials. A review of regulatory information indicated that several nearby sites were identified in the regulatory record databases. However, based on regulatory status and distance from the subject property, none of the sites identified represent a REC to the subject property.
6. A review of regulatory information indicated that several nearby sites are identified in the regulatory record databases. However, based on regulatory status and distance from the subject property, none of the sites identified appear to present a REC to the subject property.
7. No evidence of significant use or storage of hazardous substances and/or petroleum products was noted on or near the subject property. No evidence of distressed vegetation, spills or releases, dry wells, or other indications of environmental concern was identified during the site reconnaissance. Several *de minimis* conditions were identified, but they are not considered RECs for the subject property.
8. An on-site reconnaissance and interview were not conducted with a property representative to identify potential environmental conditions and to address information data gaps during the Phase I ESA process. The lack of a property owner or representative interview and the lack

of a full on-site reconnaissance represent data gaps in accordance with ASTM Standard E1527-21. However, the information obtained for the Phase I ESA, including regulatory database and historical documentation, was deemed sufficient.

8. RECOMMENDATIONS

Based upon the conclusions of this investigation of the subject property, Parametrix offers the following recommendations.

1. No further assessment of environmental conditions on the subject property, including the partial areas of the parcels that may be acquired by the IBR Program, is recommended at this time.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal Delisted NPL sites

Delisted NPL: The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may deleted from the NPL where no further response is appropriate.

A review of the Delisted NPL list, as provided by EDR, and dated 12/19/2024 has revealed that there are 2 Delisted NPL sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/19/2024 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 09/16/2024 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 09/16/2024 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 09/16/2024 has revealed that there are 2 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Lists of state- and tribal (Superfund) equivalent sites

WA HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM). As of 2024 this data is no loinger being updated.

A review of the WA HSL list, as provided by EDR, and dated 08/24/2023 has revealed that there is 1 WA HSL site within approximately 1 mile of the target property.

Lists of state- and tribal hazardous waste facilities

WA CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the WA CSCSL list, as provided by EDR, and dated 10/07/2024 has revealed that there are 24 WA CSCSL sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal landfills and solid waste disposal facilities

WA SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Ecology's Solid Waste Facilities Handbook.

A review of the WA SWF/LF list, as provided by EDR, has revealed that there are 2 WA SWF/LF sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

WA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Ecology's Statewide UST Site/Tank Report.

A review of the WA UST list, as provided by EDR, has revealed that there are 12 WA UST sites within

approximately 0.25 miles of the target property.

State and tribal institutional control / engineering control registries

WA INST CONTROL: The Environmental Covenants Registry is a list of sites that have implemented institutional controls as part of the remedy. Institutional controls are administrative or legal measures used to prevent activities that may compromise the integrity of a cleanup action. They are meant to prevent exposure to contamination remaining on site. Institutional controls may include environmental covenants (also known as "deed restrictions"), zoning restrictions, public health advisories, or other administrative tools. The most common institutional control is an environmental covenant. Environmental covenants are legal recorded documents that typically limit certain uses of the property, such as: Drilling a water supply well on the property. Disturbing pavement covering contaminated areas. Residential use of the property.

A review of the WA INST CONTROL list, as provided by EDR, and dated 10/07/2024 has revealed that there are 3 WA INST CONTROL sites within approximately 0.5 miles of the target property.

WA PTAP: A list of sites accepted into the Petroleum Technical Assistance Program. The Petroleum Technical Assistance Program (PTAP) expands the state's ability to respond to the high customer demand to clean up petroleum contaminated sites. Under the PTAP, the Pollution Liability Insurance Agency (PLIA) may provide informal site-specific technical consultations and issue written opinion letters to persons conducting independent remedial actions at qualifying petroleum cleanup sites. PLIA may provide these services under the authority of RCW 70.149.040(9) and the Model Toxics Control Act (MTCA), Chapter 70.149 RCW and Chapter 173-340 WAC.

A review of the WA PTAP list, as provided by EDR, and dated 11/04/2024 has revealed that there is 1 WA PTAP site within approximately 0.5 miles of the target property.

WA CSCSL NFA: The data setcontains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the WA CSCSL NFA list, as provided by EDR, and dated 10/07/2024 has revealed that there are 14 WA CSCSL NFA sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 09/16/2024 has revealed that there are 12 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 08/13/2024 has revealed that there is 1 FINDS site within approximately 0.001 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 12/30/2024 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 2 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 9 UST FINDER sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Environmental Interest/Information System:
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:
Registry ID: 110071410301

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Registry ID: 110015497853

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.

FINDS:
Registry ID: 110071182075

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
Registry ID: 110015461784

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.

Environmental Interest/Information System:

The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:
Registry ID: 110070744772

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database

Registry ID: 110005318851

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the

BILL COPPS INC (Continued) **1000274037**

Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Tank Closure Date:	Not reported

VA BLDG 1 COMMUNITY LIVING CENTER CLC (Continued) **U004340575**

Capacity Range:	1,101 to 2,000 Gallons
Tank Permit Expiration Date:	06/30/2024
Tank Upgrade Date:	05/02/1998
Tank Spill Prevention:	Single Wall Spill Bucket
Tank Overfill Prevention:	Overfill Alarm
Tank Material:	Steel
Tank Construction:	Single Wall Tank
Tank Corrosion Protection:	Sacrificial Anode
Tank Manifold:	Non-Manifolded Tank
Tank Release Detection:	Automatic Tank Gauging
Tank SFC Type:	Galvanic Anode
Pipe Material:	Steel
Pipe Construction:	Single Wall Pipe
Pipe Primary Release Detection:	Safe Suction (No Leak Detection)
Pipe Second Release Detection:	Not reported
Pipe Corrosion Protection:	Sacrificial Anode
Pipe Pumping System:	Safe Suction
Responsible Unit:	Headquarters
Dispencer/Pump SFC Type:	Galvanic Anode
Region:	Southwest
Is Active:	Yes
Actual Capacity:	1500
Pipe Install Date:	Not reported

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS)

VANCOUVER AVIATION (Continued) **1007070837**

provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many

VANCOUVER MEDICAL OFFICE (Continued) **1001031548**

types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Registry ID: 110070725152

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.
