TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Ecology
Telephone: 360-407-6121

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Wells
Source: Department of Health
Telephone: 360-236-3148
Group A and B well locations.

Water Well Listing
Source: Public Utility District
Telephone: 206-779-7656
A listing of water well locations in Kitsap County.

Ecology Well Logs
Source: Department of Ecology
Telephone: 360-407-7294
Point geodatabase with a record for each Ecology well report. Points are located by quarter quarter section centroid. Points contain all well report types including water wells, resource protection wells, and decommissioned wells.

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Listing
Source: Department of Natural Resources
Telephone: 360-902-1450
Locations that represent oil and gas test well sites in Washington State from 1890 to present.

RADON

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Parametrix, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Phase I ESA Site Visit Guide

Project: 274.1585.058.AE.06.06

Subject Property Location

Facility/Name	
Address	Officers Way, Vancouver, WA 98661
Property Description	Commercial & residential

Site Layout Description

Parcel#/Building Name 22 total Parcels	Purpose:
Other Structures and Improvements	☐Tanks ☐Railroad tracks/railroad spur ☐Detention/retention pond ☐Storage shed(s) ☐Boneyard/junkyard ☐ Agricultural area ☐ Other: ☐ Other:
Are any areas paved?	If Yes – **Paving Material** **Location** Asphalt Concrete Gravel

Physical Setting

Topography of subject property	
Are there any bodies of water on property?	

Are there any man-made bodies of water on the property?	
Are there any wetlands on the property?	
Are there are any water wells on the property?	

Utilities (meters, transformers, access covers, etc.)

Electricity	
Natural Gas	
Water	
Sanitary sewer	Septic systems? If yes, where?
Storm sewer	
Are there back-up power supplies?	Emergency generator(s)- how many, location? Fuel type: ☐ Batteries ☐ Diesel ☐ Natural Gas

Heating and Cooling (if observed)

Equipment Type	**Area(s)**	**Equipment Type**
☐ Central HVAC		☐ Chillers
☐ Boilers		☐ Cooling Towers
☐ Electric Heaters		☐ Window A/C Units
☐ Other		☐ Refrigeration

Operations

Operation of Property (commercial, residential, etc.)		
What ancillary (support) operations are performed at the property?	☐ Administration (office) ☐ Building Maintenance ☐ Equipment Maintenance ☐ Vehicle Washing	☐ Supply Water Treatment ☐ Wastewater Treatment ☐ Other: ☐ Other:
Are there any outdoor storage areas?	If Yes -	

Aboveground Storage Tanks

Are any ASTs currently located at the property? ☐ Yes (fill out table below) ☐ No

Location	Contents/Tank Mtl	Size	Secondary Containment

* Describe any visual evidence of spills or releases around the AST.

Underground Storage Tanks

Are any USTs currently located at the property? ☐ Yes (fill out table below) ☐ No

Location	Size/Contents	Installation Date	Overfill Protection

Any visible evidence that there were USTs previously on the property that had been removed? ☐ Yes ☐ No

Other Material Handling and Storage

Does any equipment on the property contain hydraulic oil? ☐ Yes ☐ No

Type of Equipment	# of Units/Location	Reservoir Size	Any evidence of spills/releases?
Process Equipment			
Hydraulic Lifts			

Elevators			
Trash Compactors			
Balers (i.e., cardboard)			
Other:			
Other:			

Describe other materials handled and store on property. Consider oils, propane, compressed gases including refrigerants, glycol, maintenance chemicals, boiler chemicals, cleaning products, etc.

Material	**Contain Capacity**	**Container Type**	**Material Purpose/Use**	**Storage Location(s)**	**Secondary Containment**	**Evidence of Spills/Releases**
Process Equipment						
Hydraulic Lifts						
Elevators						
Trash Compactors						
Balers (i.e., cardboard)						
Other:						
Other:						

Air Emissions

Are there any sources of air emissions at the property? (e.g., natural gas and oil-fired boilers and ovens, other combustion equipment, welding, coating and painting operations, solvent use)

Source (equipment or process)	**Pollutants**	**Emissions control device(s)**

Hazardous Waste

Does the property generate any hazardous waste? Consider waste products, pharmacy wastes, off-spec chemicals, maintenance chemicals, solvent wastes, and others.

Does the property have an RCRA identification number? ☐ Yes ☐ No

Waste Material	Generating Process	Container Size and Type, Condition	Amounts Present

Does the property accumulate hazardous waste in a central accumulation area (aka 90-day or 180-day accumulation area? ☐ Yes (describe condition of area and containers) ☐ No

Does the property accumulate hazardous wastes in any satellite accumulation areas?
☐ Yes (describe condition of area and containers) ☐ No

Other Regulated Waste

Universal Waste?	☐ Lamps ☐ Batteries ☐ Mercuy-containment equipment ☐ Pesticides ☐ Aerosol cans ☐ Other – _____
Location of Universal Waste	
Does facility generate used oil?	☐ Yes ☐ No Yes – describe type, size, location:

Other Regulated Wastes? (e.g., medical waste, PCB, laboratory, etc.)	☐ Yes ☐ No Yes – describe type, generation process, container sizes, location:

Non-hazardous Wastes

Consider non-hazardous parts washer solvent, oily rags, scrap metal, empty containers, wood, paper and cardboard, and general refuse.

Waste Material	Container Size and Type, Condition	Accumulation Location

Wastewater

Are there any wastewater features such as sumps, pits, ponds, or lagoons on the property? ☐ Yes ☐ No

Are there any oil-water separators, grease traps? ☐ Yes ☐ No

Is there evidence of septic tanks systems or drain fields at the property? ☐ Yes ☐ No

If yes, describe feature, location, wastewater discharged, an destination (if known):

Stormwater

Describe stormwater runoff and where it appears to flow (Consider features such as roof drains, catch basins, storm drains, drainage	

ditches, ponds, containment structures, and dry wells)	
Are any materials stored outside?	☐ Vehicles or trailers ☐ Pallets or packaging ☐ Scrap metal ☐ Uncovered dumpsters ☐ Other: ☐ Other:

Per-and Polyfluoroalkyl Substances (PFAS)

Does the property have a fire suppression systems? What type(s)? Please write down the type of foam or chemicals present in any chemical system, if on a nameplate or sticker on the equipment.	☐ Aqueous Film Forming Foam (AFFF) ☐ Wet sprinkler system (uses water) ☐ Dry pipe system (uses air or nitrogen under pressure) ☐ Dry chemical system (uses dry chemicals under pressure) ☐ Carbon Dioxide (typically in places where people aren't present) ☐ Fire extinguishers ☐ No fire suppression system is present ☐ Unknown

Appendix F. Staff Resumes

Kelly Carini

SCIENTIST

Years of Experience: 10 ■ Years with Parametrix: 6 ■ Education: Bachelor of Arts, Environmental Studies, UNC Chapel Hill, 2009

Kelly is an environmental scientist with the ability to address a broad range of environmental site and subsurface investigation tasks. She is proficient in regulatory compliance and due diligence, with experience conducting Phase I and II ESAs, visual site inspections, and sampling and analysis of subsurface soil and groundwater. She also has experience with climate change analysis, state and federal level permit documentation, and species surveys that support NEPA and Endangered Species Act work.

Select Project Experience

Interstate Bridge Replacement Program | Portland, OR–Vancouver, WA

Oregon/Washington Department of Transportation

Kelly conducted Phase I environmental site assessments in accordance with ASTM E1527-21 and regulatory guidelines. The work required specialized historic research, regulatory database reviews, site reconnaissance, and environmental risk evaluation to identify potentially recognized environmental concerns.

Data Centers | Eastern OR

Confidential Client

Kelly conducted this Phase I environmental site assessment as part of due diligence efforts for large tracts of land being considered for future development. Additionally, she completed soil sampling to assess the presence of pesticides because of historical agricultural activity on the site. The investigation included collecting soil samples using a direct-push probe and hand auguring. Kelly also performed air corrosion testing to assess the amount of corrosive materials in the ambient air onsite.

Southwest Corridor Final EIS Phase 2 | Portland, OR

Metro Regional Government

Kelly performed hazardous materials surveys and contributed to the hazardous materials technical report for the final EIS. She assessed impacts of the project on existing soil and groundwater contamination in the area, as well as the risk of property acquisition, based on historical use of each full or partial property acquisition for the project.

Earthquake Ready Burnside Bridge NEPA | Portland, OR

Multnomah County

Kelly performed hazardous materials surveys for properties in Oregon and contributed to the hazardous materials technical report for the draft EIS. The impacts of the project on existing soil and groundwater contamination in the area and how the impacts differed by alternative were assessed. In addition, Kelly assessed potential climate change impacts of various alternatives and summarized them in a technical report.

TCE Cleanup Project | Vancouver, WA

Port of Vancouver

As a project scientist, Kelly has performed an array of tasks including sampling (soil, groundwater), data collection and analysis, remedial system maintenance, and performance assessment and reporting.

Phase 1 ESA Chevron | Portland, OR

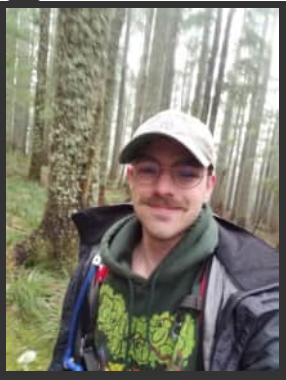
TriMet

Kelly performed a Phase I ESA for completion of due diligence a high-risk developed property for acquisition. Kelly assessed the risk associated with the acquisition of the property based on historical land use, environmental database research, and on-site reconnaissance and developed a plan for subsurface investigation.

Phase I Environmental Assessments | Covington, WA

City of Covington

Kelly performed Phase I ESAs for completion of due diligence for several tracts of land for future development. Kelly assessed the risk associated with the acquisition of the properties based on historical land use, environmental database research, and on-site reconnaissance.



Kevin Kuester

SCIENTIST I

Years of Experience: 4 ■ Years with Parametrix: 1 ■ Education: BA, Biology, University of Portland, 2021

Kevin is a biologist and wetland scientist with 4 years of experience in environmental sciences. His work has included environmental monitoring of various sites, including manufacturing, distribution, transportation, and mining facilities. He has conducted environmental sampling of both groundwater and air to monitor environmental compliance.

Selected Project Experience

Interstate Bridge Replacement Program | Portland, OR–Vancouver, WA

Oregon/Washington Department of Transportation

Kevin conducted Phase I environmental site assessments in accordance with ASTM E1527-21 and regulatory guidelines. The work required specialized expertise in historic research, regulatory database reviews, site reconnaissance, and environmental risk evaluation to identify potentially recognized environmental concerns.

Wetland Delineation

City of Troutdale, OR

Kevin conducted an on-site wetland delineation to comply with United States Army Corps of Engineers guidelines. He prepared all relevant reports for submittal to state and federal agencies, and prepared similar reports for other clients in Washington and Oregon.

Stormwater Monitoring

Confidential Clients

Kevin conducted on-site stormwater compliance assessments for various sites throughout Oregon. He tested stormwater discharge for environmental compliance, applying his certification as erosion and sedimental control lead for the states of Washington and Oregon.

Emissions Testing

Confidential Clients

Kevin conducted emissions testing to maintain manufacturing air quality standards in the states of Oregon and New Mexico.

Groundwater Monitoring

Various Clients

At various contaminated sites throughout Oregon, Kevin conducted groundwater sampling. He prepared reports with contamination levels for submittal to state and federal agencies.

Biological Surveys

Various Clients

Kevin conducted baseline biological surveys to assess the presence of state and federally listed species in the states of Oregon, Washington, Arizona, and Nevada. He prepared reports for submittal to federal and state agencies.

Marissa Ward

Environmental Planner II

Years of Experience: 5 ■ Years with Parametrix: 1 ■ Education: Environmental Studies, Boise State University, 2019 ■ Licenses and Certifications: 40-Hour HAZWOPER, Basic Wetland Delineation, Highway Traffic Noise: Basic Acoustics - National Highway Institute

Marissa is an experienced NEPA professional. She specializes in compliance regulations, traffic noise analysis, wetland delineations, GIS mapping, GPS operations, technical writing, and conducting field surveys including research, sampling, photography, and documentation. Marissa also coordinates with local, state, and federal agencies. Her project experience includes public infrastructure, including the Washington Department of Transportation Department, Idaho Transportation Department, and local highway districts, as well as private enterprise.

Selected Project Experience

Interstate Bridge Replacement Program | Portland, OR–Vancouver, WA
Oregon/Washington Department of Transportation
Marissa conducted Phase I environmental site assessments in accordance with ASTM E1527-21 and regulatory guidelines. This work required specialized expertise in historic research, regulatory database reviews, site reconnaissance, and environmental risk evaluation to identify potentially recognized environmental concerns.

Airport Way Phase 2-2 | Kitsap County, WA
Port of Bremerton
Marissa completed a categorical exclusion for this new roadway construction project for the Washington Department of Transportation (WSDOT). She oversaw all figures, documented agency coordination, and ensured that technical reports and related materials were well-organized and prepared for submission to WSDOT. Additionally, Marissa conducted a hazardous materials assessment following WSDOT guidelines. This included completing historic and regulatory database reviews and performing an environmental risk evaluation to identify potential recognized environmental concerns.

SH-44 Corridor Preservation Study | Ada County, ID
Idaho Transportation Department
Marissa collaborated with a team to complete a categorical exclusion for improvements along a 5.6-mile corridor. Her responsibilities included managing all figures, documenting coordination with agencies, and ensuring that the technical reports and related materials were organized and ready for submission to the Idaho Transportation Department.

Access to Opportunity | Ada County, ID
Idaho Transportation Department
Collaborating with a team, Marissa completed a categorical exclusion for roadway and pedestrian improvements along 12 roads. Her specific responsibilities included field survey and wetland delineation documentation. She also oversaw all figures, documented coordination with agencies, and ensured that the technical reports and related materials were organized and ready for submission to the Idaho Transportation Department.

Bennett Road Landfill | Elmore County, ID
Elmore County, Idaho
Marissa collaborated with a team to complete a conditional use permit as well as a SEPA checklist reviewing the existing environmental conditions at an expanding landfill within the Elmore County area.

Eastside Arterial Progressive Design-Build Improvements | Deschutes County, OR
City of Redmond, OR
This project is developing alternatives and final design of a new arterial road to increase connectivity and safety for expected future growth. The route traverses an area alongside Redmond's airport. Marissa prepared documentation for a NEPA categorical exclusion that met Federal Aviation Administration requirements.

Ustick; Can ADA to Owyhee Storm | Canyon County, ID
City of Nampa
Marissa completed an environmental scan memo for a document reviewing the National Wetland Inventory, Underground Storage Tank Database, Idaho National Register of Historic Places, and current Threatened and Endangered Species list. A memo will be prepared to document the results of the scan and identify any potential concerns.

Marty Marrs

STAFF ROLE

Years of Experience: 3 ■ Years with Parametrix: 1 ■ Education: BS, Natural Resource, 2022 | AS, Business Administration, 2007 ■ Certifications: Certified Erosion and Sediment Control Lead, 40-Hour HAZWOPER

Marty believes that everyone, regardless of socioeconomic status, should have access to clean water. To live this passion through her work, she pursued a degree in natural resources, choosing a focus on the human dimensions of natural resource management. This includes considering both how socioeconomic factors influence our natural resources, and how our natural resources play a role in the lives of individuals from different backgrounds. Marty's passion for clean water has led to a career focus in stormwater management and permitting. Her superpower is her ability to step back and truly listen to her clients to understand their "why" – how they see the issue at hand – and collaborating with them to develop solutions that empower them. For example, when a client is fined by a governing body, Marty helps the client consider options that are within their control. She helps clients and regulators find common ground and meet in the middle. Another way that Marty applies her passion for balancing the needs of people and nature is by addressing environmental justice during NEPA- and SEPA-related analyses.

Select Project Experience

Interstate Bridge Replacement Program | Portland, OR–Vancouver, WA

Washington State Department of Transportation

This bi-state program will result in a new I-5 bridge across the Columbia River between Washington and Oregon and includes multiple connected transportation facilities. Marty is assisting with writing environmental site assessment phase II reports and public comment coding, which involves replying to comments related to hazardous material concerns.

South Fork Avenue Extension | North Bend, WA

City of North Bend

For this roadway extension project, Parametrix evaluated the potential for the project to encounter hazardous materials during construction. Marty wrote the hazardous materials technical report for this project, summarizing field findings and complying with applicable regulatory requirements.

Tillamook Co Stormwater Compliance

County of Tillamook

The Parametrix team is providing support for the county's stormwater 1200Z permit requirements. Marty communicates directly with the client on stormwater-related issues, assists in sampling coordination events, and ensures project discharge monitoring reports (DMRs) are submitted on time.

Data Center Siting Study | Eastern OR

Confidential Client

The Parametrix team is providing technical due diligence services for a number of data center siting studies across the western US. Marty is working as part of the team that is preparing Phase I environmental site assessments for this client.

Stormwater Management for Shipping Centers | Various OR Locations

Confidential Client

In previous employment, Marty served as the Oregon State stormwater lead for her firm's major confidential shipping client. She communicated directly with the client on stormwater-related issues and ensured the project discharge monitoring reports, or DMRs, complied with Oregon DEQ requirements.

NEPA and FERC Resource Reports | Various North America Locations

Confidential Client

In previous employment, Marty assisted in writing various resource reports for NEPA and FERC clients. Her experience includes resource reporting for both Socioeconomics and Land Use.

Monitoring and Engineering for Closed Landfill | Tillamook, OR

Tillamook County

Parametrix has been providing monitoring and reporting services to the county for more than 10 years to support solid waste and stormwater permits. Since joining Parametrix, Marty has focused on the stormwater permitting aspects of the project, including data management, reporting to the Oregon DEQ, and writing the Scope of Practice, or SOP, for the state's 1200-Z stormwater permit. Marty also helped facilitate communications between the county and DEQ. She met with the DEQ representative to let them know that the county is working with us to meet permit requirements and to find out what DEQ needs to see in upcoming actions and documentation.

Shira DeGrood, RG

PHASE I/PHASE II ENVIRONMENTAL SITE ASSESSMENTS

Years of Experience: 20 ■ Years with Parametrix: 2 ■ Education: BS, Microbiology, MS, Soils and Biogeochemistry ■ Registrations: Registered Geologist, ID, OR ■ Certifications: 40-hour OSHA, Transportation Worker Identification Credential

Shira is experienced in environmental work and project management including due diligence (Phase I and Phase II assessments), contaminated site assessment and remediation. She has provided technical allocation for complex sediment superfund sites and has performed assessment, source control, and remediation of soil, groundwater, and sediment. Shira has diverse experience in project and site management of remedial investigations in soil, groundwater, and sediment, soil vapor characterization, in-situ and ex-situ remediation of soil and groundwater, feasibility studies, storm water/sediment source control evaluations, aquifer flow tests, and NPDES permitting.

Select Project Experience

Interstate Bridge Replacement Program | Portland, OR–Vancouver, WA)

Oregon/Washington Department of Transportation

Shira led a team in performing Phase I environmental site assessments (ESAs) for 136 properties to support the proposed replacement of the I-5 bridge. She performed assessments and delivered reports within 2 months of kick-off. This programmatic effort included development of site-specific templates, standardization of practices between authors, technical review of reports, and consistency review between reports, health and safety planning, and site access planning. Each Phase I ESA included a site visit, review of environmental databases and historical records, assessments of previous site investigation/remediation activities, and owner interviews.

Data Center Technical Due Diligence | Boardman, OR

Confidential Client

Shira provided technical review and oversight of the Phase I ESA for this project. The ESA involved a site visit, a review of environmental databases and historical records, and an owner interview.

Data Center Campus | Hermiston, OR

Kimley-Horn and Associates

Shira provided technical review and oversight of the Phase I ESA for this project. Work included a site visit, review of environmental databases and historical records, historical air quality review and owner interview. Shira also provided additional review and oversight related to adjacent sites with gravel quarries and unknown surface impacts.

Lakeland Hills Pump Station Facility Replacement | Auburn, WA

King County

Shira provided technical oversight of a Phase I ESA for a pump station expansion. The ESA involved a site visit, a review of environmental databases and historical records, and an owner interview.

Remedial System Evaluation and Further Site Investigation at Former Bulk Terminal | McMinnville, OR

Confidential Client

Shira led technical services on this former bulk. As the primary contact with the ODEQ project manager, she implemented a 5-year review to evaluate the current remedial action. Site investigation activities included drilling using MIHPT and UVOST technologies and groundwater monitoring. Shira identified that LNAPL was still present in areas outside of the treatment area and developed a conceptual site model to assess direct contact and vapor intrusion risks to adjacent residential properties. She identified an adjacent site as a source of remaining LNAPL in the western portion of the site.

Reeder Road Culvert Replacement Services | Portland, OR

Multnomah County

Shira performed a clean fill determination and a hazardous material corridor survey for a road reconstruction/culvert replacement project. She reviewed construction documents and coordinated with engineers to develop decision units, a sampling plan, and an analytical program. She collected samples from each unit and coordinated with the laboratory. Shira also assessed laboratory and field data and wrote a memorandum describing methods, results, conclusions, and recommendations.

Source Identification of Sediment Contamination | Portland, OR

Confidential Clients

Shira wrote expert reports to support allocation of cleanup efforts in the Willamette River. The reports assessed potential sources of contamination, such as current and previous site ownership and operations, potential contaminants associated with the site operations, pathways for contaminants to reach river sediments, and mass balance calculations. Also performed fingerprinting of PCBs, dioxins/furans, and co-contaminants using multivariate statistics to provide another line of evidence of contamination sources.

Whitney Withrow, PMP

Senior Planner

Years of Experience: 11 ■ Years with Parametrix: 1 ■ Education: BA, Environmental Biology, William Penn University, 2009 | Military Geological Engineering (Grad Cert), Missouri University of Science and Technology, 2017 ■ Licenses and Certifications: Project Management Professional (PMP), OSHA-30 Construction Safety, 40-Hour HAZWOPER, eRailSafe, DOT/IATA Hazmat Shipping

Whitney is an environmental and project management professional (PMP) with over 11 years of experience in project management, process improvement, and environmental compliance. She possesses a strong background in technical requirement identification, statistical analysis, and interagency coordination, actively maintaining partnerships with local, state, federal, and international organizations. Drawing from her extensive military experience, she offers expertise in operational planning, organizational change management, and strategic development. Her environmental qualifications include in-depth knowledge of the National Environmental Policy Act (NEPA) process, as well as conducting Phase I and Phase II environmental site assessments (ESAs) and environmental assessments (EAs).

Selected Project Experience

Interstate Bridge Replacement Program | Portland, OR–Vancouver, WA)

Oregon/Washington Department of Transportation

Whitney is the task manager responsible for leading and coordinating a technical team through the Phase I ESA process, ensuring compliance with ASTM E1527-21 and relevant regulatory guidelines. She has provided technical review, feedback, and support to maintain quality and consistency throughout the assessment process.

Phase II Site Investigations | Multiple Locations in the U.S.

Private Clients

Whitney managed drilling subcontractors during subsurface investigations using Direct Push Technology (DPT), overseeing the collection and field screening of continuous-core soil samples for volatile organic compounds (VOCs), as well as groundwater and soil-gas sampling. She provided technical guidance and on-site supervision for vapor pin installations and sub-slab assemblies to support TO-15 indoor/ambient air sampling and acrylate (PV2011/PV2026) air and sub-slab sampling. Whitney also conducted senior-level review of a site management plan for a Point of Entry Treatment (POET) system, with an emphasis on PFAS analysis and adherence to regulatory compliance standards.

Incident Response and Recovery Team | Multiple Locations in the U.S.

Private Clients

Whitney contributed to emergency response operations for train derailments, oil spills, and pipeline releases. She documented incident details, coordinated on-site activities, managed contractors, and oversaw first responder operations. Whitney also ensured regulatory compliance through waste tracking and safety oversight. Additional responsibilities included installing monitoring wells and collecting soil and groundwater samples for environmental assessment.

CERCLA Project Coordinator / On-Site Field Operations Manager | Stibnite, ID

Perpetua Resources

Whitney led field operations under the Administrative Settlement Agreement and Order on Consent for TCRA Round 1, overseeing remediation activities at four project sites during the summer of 2023. She managed project submittal schedules to ensure compliance with directives from the U.S. Environmental Protection Agency (EPA) and U.S. Forest Service (USFS). Whitney directed removal actions involving the excavation and on-site disposal of over 350,000 tons of contaminated sediment and mine waste from streambanks and floodplains to reduce environmental risks and restore impacted areas.

FERC Pipeline Relocation | NV

Private Client

As deputy project manager, Whitney oversaw coordination between subcontractors and team leads throughout the FERC Section 7(c) application process. She managed a detailed project schedule and task tracker to ensure timely deliverables. She also served as a key liaison with Naval Air Station Fallon in support of the Fallon Range Training Complex modernization initiative. Finally, Whitney conducted senior-level reviews of resource reports and led stakeholder meetings to align project goals and regulatory requirements.

Community Water Storage Project EA | Ashburn, VA

Private Client

Whitney led a multidisciplinary team of technical experts through the FEMA

NEPA process to obtain a Finding of No Significant Impact (FONSI) for the transformation of a decommissioned rock quarry into a raw water storage reservoir and the construction of a high-capacity pumping station capable of storing over 1 billion gallons of water offline from the Potomac River. She oversaw the update and reissuance of outdated permits through the Joint Permit Application process, ensuring full regulatory compliance and supporting continued project progression.

Sewer Service Area Pump Station EAs | Norfolk, VA

Private Client

Whitney led and coordinated multiple teams through the Virginia Department of Environmental Quality (VDEQ) EA process, including the preparation of EA documentation, Coastal Zone Management Act (CZMA) Consistency Certification, and Endangered Species Act (ESA) consultation. She oversaw public involvement efforts, including organizing outreach activities and managing responses to public comments, ensuring regulatory compliance and effective stakeholder engagement throughout the review process.

CERTIFICATION

The technical material and data contained in this document were prepared under the supervision and direction of the undersigned. We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the *all appropriate inquiries* in conformance with the standards and practices set forth in 40 CFR Part 312.

WSDOT	Washington State Department of Transportation

EXECUTIVE SUMMARY

Parametrix was retained by the Washington State Department of Transportation (WSDOT) to conduct a Phase I Environmental Site Assessment (ESA) on the parcels located at 100 SE Columbia Way and 102 SE Columbia Way in Vancouver, Washington (Figure 1). These parcels may be acquired as part of the Interstate Bridge Replacement (IBR) Program and are known as IBR-47560000 and IBR-47580000. Based on the findings of this investigation, Parametrix concluded the following:

1. The subject property is located at 100 SE Columbia Way and 102 SE Columbia Way in Vancouver, Washington, and includes Clark County parcels 47560000 and 47580000. Both parcels are owned and operated by Clark Public Utilities. The subject property encompasses an area of 0.20 acres, including one building that previously operated as an electrical transformer substation and office space. The site also includes paved parking areas and green space containing trees and rocks. The vicinity of the subject property is primarily undeveloped.
2. A review of Sanborn Fire Insurance maps and historical aerial photographs indicated that the former transformer substation was constructed in 1916. A site interviewee stated that the electrical equipment was removed in the mid-1980s. The building is still present. Open conduits are present between operational areas on the second and third floors and a water infiltration area on the first floor. The historical use of electrical equipment containing oils along with the potential for uncontrolled spills to ground surface is a recognized environmental condition (REC).
3. The building was constructed in 1916. Based on the age of the building, there is potential for hazardous building materials (asbestos, lead-based paint, and/or polychlorinated biphenyls [PCBs]) are present in the building is high.
4. The subject property is not listed on any regulatory database that would indicate a past or current release or storage of hazardous materials. A review of regulatory information indicated that several adjacent or nearby sites were identified in the regulatory record databases. However, based on regulatory status and distance from the subject property, none of the sites identified represent a REC to the subject property.
5. Multiple transformers were present in exterior areas of the subject property. No other evidence of current use or storage of hazardous substances and/or petroleum products was noted on or near the subject property. No evidence of distressed vegetation, spills or releases, dry wells, or other indications of environmental concern was identified during the site reconnaissance. Debris was present throughout the building.

[redacted]

Based upon the conclusions of this investigation of the subject property, Parametrix offers the following recommendations:

1. If the subject property building is to be removed, a demolition-level hazardous materials building survey (HMBS) should be conducted prior to any removal activities. The HMBS should quantify any hazardous materials that could impact removal activities such as lead-based paint, asbestos-containing material, and/or PCBs. Due to the presence of the former substation equipment, the HMBS should be expanded to include sampling of any suspected materials, including floors and rubble for the presence of oil and/or PCBs.
2. A subsurface investigation is recommended for the soil underlying the drainage holes within the second-story bays. Soil should be assessed for the presence of PCBs and petroleum products.
3. If the bridge-mounted and pole-mounted transformers are to be removed, they should be handled and decommissioned in accordance with state and federal regulations. It is recommended that oil within the transformers be sampled for the presence of PCBs prior to initiating decommissioning activities. The transformers should be disposed of in accordance with state and federal regulations.

1. INTRODUCTION

Parametrix was retained by the Washington State Department of Transportation (WSDOT) to perform a Phase I Environmental Site Assessment (ESA) on the developed property located at 100 SE Columbia Way and the adjacent undeveloped property at 102 SE Columbia Way in Vancouver, Washington (herein referred to as the *subject property*) (Figure 1). The subject property includes parcels 47560000 and 47580000 in Clark County, Washington (Figure 2). It is our understanding that WSDOT may pursue acquisition of the subject property as part of the Interstate Bridge Replacement (IBR) Program. The subject property includes parcels identified as IBR-47560000 and IBR-47580000 (Figure 2).

This Phase I ESA includes a review of available documentation pertaining to the subject property, a site reconnaissance, and a review of pertinent public agency documents. The Phase I ESA consisted of two distinct tasks: (1) a review of documents and of oral information (if available), and (2) a site examination. Conclusions and recommendations within this report are based solely on observed evidence and data collected during the performance of this assessment.

1.1 Purpose

The Phase I ESA was conducted in general accordance with ASTM International (ASTM) Standard E1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, which defines the generally accepted industry practices and procedures currently applicable at the time and place of this study (ASTM 2021). The Phase I ESA is intended to permit the user to satisfy the requirements to qualify for the bona fide prospective purchaser limitation under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), and as such constitutes "all appropriate inquiries in the previous ownership and uses of the property consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601 (35)(B).

The purpose of this Phase I ESA is to identify recognized environmental conditions (RECs) on or near the subject property. The term *recognized environmental conditions* is defined in ASTM Standard E1527-21 as:

> "…(1) the presence of *hazardous substances* or *petroleum products* in, on, or at the *subject property* due to a *release* to the *environment*; (2) the likely presence of *hazardous substances* or *petroleum products* in, on, or at the *subject property* due to a *release* or likely *release* to the *environment*; or (3) the presence of *hazardous substances* or *petroleum products* in, on, or at the *subject property* under conditions that pose a *material threat* of a future *release* to the *environment*."

In accordance with ASTM Standard E1527-21, some RECs may be further defined as historical recognized environmental conditions (HRECs) or controlled recognized environmental conditions (CRECs).

An HREC is defined as:

> "…*a past release* of any *hazardous substances* or *petroleum products* that has occurred in connection with the *property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *property* to any required controls."

A CREC is defined as:

> "…*a recognized environmental condition* resulting from a past *release of hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority, with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls."

This Phase I ESA endeavors to identify RECs, HRECs, and/or CRECs at the subject property.

1.2 Significant Assumptions

Phase I ESA methodology included viewing accessible areas of the subject property on foot. Unless otherwise stated, no exceptions to the guidelines presented in ASTM E1527-21 were made during completion of this Phase I ESA.

1.3 Limitations

The findings, conclusions, and recommendations presented in this report are based on site conditions and the best available information known or made available by regulators, other consultants, or other sources at the time of the investigation. Parametrix conducted a diligent search and investigation in compliance with prevailing standards of the profession; however, certain adverse conditions may exist at the site not detected at the time of the investigation.

The services provided under this contract, as described in this report, include professional opinions and judgments based on data collected. These services have been provided according to generally accepted engineering practices. The opinions and conclusions contained in this report are typically based on information obtained from the following:

- Observations and measurements made by Parametrix field staff.
- Contacts and discussions with regulatory agencies and others.
- Review of available hazardous substance or solid waste lists.
- Opinions and judgments of Parametrix based on the information available.

In the professional judgment of Parametrix, the services performed pursuant to the scope of services are an adequate basis to collect data for a preliminary evaluation of the site and upon which to draw the conclusions stated in this report.

2. SUBJECT PROPERTY DESCRIPTION

The following sections summarize the location, characteristics, and physical setting of the subject property.

2.1 Location

The subject property includes two contiguous commercial parcels located generally to the north of SE Columbia Way, east of the Interstate Bridge, south and west of a parking lot and a BNSF Railway right of way in Vancouver, Washington. The Phase I ESA focused on the subject property, which consists of the two parcels that may be acquired as part of the IBR Program, as detailed in Table 1, below. The site location is shown on Figure 1, the Site Vicinity Map. The boundary of the subject property is shown on Figure 2.

2.2 Site and Vicinity Characteristics

Characteristics of the subject property, including the partial areas of the parcels that may be acquired as part of the IBR Program, are summarized in Table 1.

Table 1. Subject Property Characteristics

IBR ID	Address	Owner	Total Area	Current Use (determined through visual observations)
IBR-47560000	102 SE Columbia Way	Public Utility District #1 of Clark County dba Clark Public Utilities	0.05 acres	Open space with trees and bushes. Above- and belowground electrical equipment
IBR-47580000	100 SE Columbia Way	Clark Public Utilities	0.14 acres	Unused building and associated parking lot

2.3 Physical Setting

The subject property is located in the Portland Basin, which marks the northern terminus of the Willamette Lowland in Oregon. The northern portion of the basin is known for its low topographic relief, with the subject property at an elevation of approximately 34 feet above mean sea level. The Portland Basin is bounded by the Cascade Range to the east and the Coast Range to the west.

Geologic processes in the Portland Basin consist of volcanism, sedimentation, and cataclysmic flood deposits in both fluvial and marine depositional environments. The subject property lies on what is mapped as coarse-grained Missoula flood deposits, cobbly, sandy gravel deposited by the Missoula floods (Wells et al. 2020). Surface soils consist of gravelly loam.

The topography in the vicinity of the subject property is a consistent slope, rising with distance from the Columbia River. The anticipated groundwater gradient is to the south toward the Columbia River. Groundwater has been encountered at 16 to 29 feet below ground surface on a nearby property that is located a similar distance from the Columbia River (Maul Foster Alongi 2019; Appendix E).

2.4 Current Use of the Subject Property

The building and associated parking lot on the subject property are currently not in use. The open space includes multiple operational transformers, including:

- A transformer bridge containing three large transformers and three pole-mounted transformers (Figure 2).
- An additional three pole-mounted transformers adjacent to the northeast corner of the building.
- Two surface-mounted transformers near the northern property boundary.

2.5 Descriptions of Improvements on the Subject Property

The western half of the building was formerly used for office space, and the eastern half was formerly an electrical substation. The entire building is approximately 8,180 square feet (Parametrix 2012). The building is two stories and includes a western and an eastern section that are not connected by an interior door. The western section is two stories tall, with a landing between the two stories, and was used for office space until circa 2020 (see Section 6). The eastern section includes a three-story-tall former electrical substation. The second and third story are empty and unused. The first story was used by office personnel as parking (Parametrix 2012).

2.6 Environmental Liens

An environmental lien is defined by ASTM as a charge, security, or encumbrance upon title to a property to secure the payment of a cost, damage, obligation, or duty arising out of response actions, cleanup, or other remediation of hazardous substances or petroleum products. No evidence of environmental liens was identified during the course of the Phase I ESA process. However, a formal title search was not completed as part of the scope of work.

3. RECORDS REVIEW

The purpose of the records review task was to gather environmental data on the subject property prior to the site examination. The information review consisted of two subtasks: (1) a review of regulatory databases to find sites, including and close to the subject property, listed by federal and State of Washington agencies and (2) a compilation of historical uses of the subject property and site vicinity properties to determine if past operations pose an environmental risk to the subject property.

The Environmental Data Resources (EDR) report (EDR 2023a) is a summary of state and federal database searches for sites of possible environmental concern. The information review enabled Parametrix personnel to characterize the types of activities performed at the site, identify data gaps prior to the site examination, and facilitate recognition of discrepancies between reported and observed data. Data gaps identified during the document review were addressed by interviewing knowledgeable personnel, observations during the site examination, or additional detailed investigation.

It should be noted that the information supplied by EDR is reported as Parametrix received it. EDR, in turn, reports information as it is provided in various government databases. It is not possible for either Parametrix or EDR to verify the accuracy or completeness of information contained in these databases. However, the use of and reliance on this information is a generally accepted practice in the conduct of environmental due diligence. The following sections present information from the document review.

3.1 Standard Environmental Record Sources

The following section summarizes information collected from records maintained by the U.S. Environmental Protection Agency (EPA) and the Washington State Department of Ecology (Ecology). The information includes details on sites identified in regulatory databases within recommended ASTM search distances. A complete listing of the databases reviewed is included in the EDR Radius Map™ Report (Appendix A).

3.1.1 Review of Washington State Department of Ecology Databases

The following sections summarize the most relevant information obtained from the EDR report regarding sites identified within the ASTM E1527-21 search radii from the following databases. Additional information regarding these sites was reviewed on Ecology's Integrated Site Information System (ISIS) website to supplement data gaps in the EDR report. Relevant database listings from Ecology include the following:

- Underground Storage Tank (UST) List
- Leaking Underground Storage Tank (LUST) List
- Confirmed and Suspected Cleanup Site List (CSCSL)
- Confirmed and Suspected Cleanup Site List – No Further Action (CSCSL-NFA)

- SPILLS
- Voluntary Cleanup Program (VCP)
- Independent Cleanup Report (ICR)
- Landfill and/or Solid Waste Disposal Site Lists (SWF/LF)
- Brownfields

3.1.1.1 Underground Storage Tank List

The Ecology UST List identifies registered USTs, which are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data were obtained from Ecology's UST Site/Tank Report database.

Information contained in the EDR report indicates that the subject property is not listed as a UST site. Two UST sites are located within 0.25 miles of the subject property.

- The Hannah Motor Company sites (300 Washington and 400 Washington) is located 0.141 miles north of the subject property. The 300 Washington site is also listed on the LUST, CSCSL, and CSCSL-NFA databases. Two USTs, one on each property, were formerly present but have been removed (UST Site IDs 10252 and 9879, Appendix E). The UST at 300 Washington was identified as a LUST but has been identified as cleaned up and a No Further Action (NFA) determination has been issued by Ecology.

Unless otherwise noted, the mere presence of a UST near a site does not, in itself, constitute a REC. Where available, other information was reviewed regarding the presence of a UST, including the age of the facility, proximity to the subject property, and known releases or spills. UST sites that have had known releases are discussed in Section 3.1.1.2.

3.1.1.2 Leaking Underground Storage Tank List

The LUST Incident Report contains an inventory of reported LUST incidents. The data were obtained from Ecology's LUST Database List. The subject property is not listed as a LUST site.

Five LUST sites were identified within 0.5 miles of the subject property. The following LUST sites were located within 0.25 miles of the subject property:

- The Hannah Motor Company site (300 Washington) is located 0.141 miles north of the subject property. This site is also listed on the LUST, CSCSL, CSCSL-NFA, and ASBESTOS databases and has been assigned Ecology Facility Site ID 12126843. One LUST was formerly present but has been removed. Ecology identifies that this LUST has been cleaned up and an NFA has been issued (Appendix E). Based on the distance from the subject property and the regulatory status of the site, the facility does not represent a potential REC to the subject property.

Based on the distance from the subject property (over 0.25 miles from the subject property), remediation, and regulatory status (NFA determinations), the remainder of the LUST sites do not represent potential RECs to the subject property.

3.1.1.3 Confirmed and Suspected Contaminated Sites List

The state hazardous waste sites records are the states' equivalent to the Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS). These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified, along with sites where cleanup will be paid for by potentially responsible parties. The data were obtained from Ecology's CSCSL.

Nineteen CSCSL sites were identified within 1 mile of the subject property. Of the 19 sites, two are located within 0.25 miles of the subject property. The remainder of the sites do not represent potential RECs for the subject property based on distance from the subject property, understood extent of contamination, and/or regulatory status of the site.

- The Hannah Motor Company site (300 Washington) is located 0.141 miles north of the subject property. This site is also listed on the UST, LUST, CSCSL-NFA, and ASBESTOS databases and has been assigned Ecology Facility Site ID 12126843. A site investigation in 2015 identified petroleum contaminated soil (diesel and oil-range) at estimated depths of up to 15 feet below ground surface due to former hydraulic oil releases from vehicle hoists and residual diesel impacts within an on-site drywell. Lead and polychlorinated biphenyls (PCBs) were also detected in soil at concentrations less than the Model Toxics Control Act (MTCA) screening levels. Based on these soil data, the site was assigned Facility Site ID Number 12126843 (Cleanup Site IDs 7922 and 13035). Based on the distance, the shallow depth of impacts, and the lack of evidence of a major hazardous materials release, the facility is not a REC to the subject property.
- The Vancouver Red Lion Hotel site (100 Columbia Street) is located approximately 0.125 miles west of the subject property. The EDR Report mis-mapped the Vancouver Red Lion Hotel site at the subject property, rather than the known address of 100 Columbia Street, Vancouver, Washington. This site is also listed on the SPILLS database. The site has confirmed total petroleum hydrocarbon, metals, and polycyclic aromatic hydrocarbon contamination due to previous industrial activities. Ecology assigned Facility Site ID 15891 to this site. Site remediation is currently underway. Based on the distance and understood groundwater flow direction at the site, the facility is not considered a REC to the subject property.

A subset of the CSCSL is the CSCSL-NFA. The database contains information about sites previously on the CSCSL that have received an NFA determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead, a No Further Action code is entered based upon the type of NFA determination the site received.

One CSCSL-NFA site was identified within 0.25 miles of the subject property, and an additional four CSCSL-NFA sites were identified within 0.5 miles of the subject property. Based on the distance from subject property and NFA determinations, none of the identified sites appear to represent RECs to the subject property, including the partial area of the parcel that may be acquired as part of the IBR Program, unless specifically noted otherwise in another section.

3.1.1.4 SPILLS Database

This database provides a comprehensive list of reported spills. The subject property is not listed as a SPILLS site.

3.1.1.5 Voluntary Cleanup Program

This database provides a listing of sites that have entered either the VCP or its predecessor, the Independent Remedial Action Program.

One VCP site is reported within approximately 0.5 miles of the subject property. The site has received an NFA opinion. Based on distance from the subject property and current regulatory status, this VCP site does not represent a REC to the subject property.

3.1.1.6 Independent Cleanup Report

ICRs are remedial action reports that Ecology has received from either the owner or operator of the site. These actions have been conducted without department oversight or approval and are not under an order or decree.

The subject property is not listed as an ICR site. Three ICR sites are reported within approximately 0.5 miles of the subject property and are either discussed above in other sections or do not represent a REC to the subject property based on distance and regulatory status.

3.1.1.7 Solid Waste Facilities/Landfill

The SWF/LF records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data were obtained from Ecology's Solid Waste Facilities List.

The subject property is not listed as an SWF/LF site. No SWF/LF sites were reported within 0.5 miles of the subject property.

3.1.1.8 Brownfields List

The Brownfields List is a database of sites that Ecology considers to be brownfields or that have received financial or technical assistance for cleanup. A brownfield is a real property where expansion or redevelopment is complicated by actual or perceived environmental contamination. The subject property is not listed as a State Brownfields site. No State Brownfields sites were reported within 0.5 miles of the subject property.

3.1.2 Environmental Protection Agency Databases

The EPA administers several programs designed to protect the environment and monitor the generation, storage, treatment, and disposal of hazardous substances. The following sections summarize the most relevant information obtained from the EDR report regarding sites identified within the ASTM E1527-21 search radii from the following databases:

- National Priorities List (NPL)
- CERCLIS List
- Corrective Action Report (CORRACTS) List
- RCRA
- Resource Conservation and Recovery Act Information (RCRAInfo) List
- Emergency Response Notification System (ERNS) List
- U.S. Brownfields List

3.1.2.1 National Priorities List

The NPL identifies priority hazardous waste sites for remedial actions under the EPA Superfund program. Information contained in the EDR report indicates that the subject property is not listed as an NPL site. No NPL sites are listed within 1 mile of the subject property.

3.1.2.2 CERCLIS List

The EPA's CERCLIS List identifies sites that may potentially pose a threat to the environment or the health of the general public.

Information contained in the EDR report indicates that the subject property is not listed as a CERCLIS site. No CERCLIS sites were identified within 0.5 miles of the subject property.

The EPA also publishes the CERCLIS-NFRAP List that identifies CERCLIS sites that have been designated "no further remedial action planned" (NFRAP) and that have been removed from the CERCLIS List. Information contained in the EDR report indicates that the subject property is not listed as a CERCLIS-NFRAP site. No CERCLIS-NFRAP site were identified within 0.5 miles of the subject property.

3.1.2.3 CORRACTS List

The CORRACTS List identifies hazardous waste handlers with a history of RCRA corrective action activity. This list shows which corrective action events have occurred for every hazardous waste handler that has had corrective action activity due to improper procedures or handling.

Information contained in the EDR report indicates that the subject property is not listed as a CORRACTS site. No CORRACTS sites are listed within 1 mile of the subject property.

3.1.2.4 RCRA Generators List

RCRAInfo is EPA's comprehensive information system, providing access to data supporting RCRA and the Hazardous and Solid Waste Amendments of 1984. The database includes selective information on sites that generate, transport, store, treat, and/or dispose of hazardous waste as defined by RCRA.

Conditionally exempt small quantity generators generate less than 100 kilograms (kg) of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Very small quantity generators generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators generate more than 1,000 kg of hazardous waste, or more than 1 kg of acutely hazardous waste per month. Non-generators (NonGen)/No Longer Regulated (NLR) do not presently generate hazardous waste.

Information contained in the EDR report indicates that the subject property is not listed in any RCRA database.

Five RCRA NonGen NLR sites are listed within 0.25 miles of the subject property. One of the sites, the Port of Vancouver Terminal 1 site, is mis-mapped in the EDR Report. The Terminal 1 site is located to the west of the Interstate Bridge, approximately 0.125 miles west of the subject property. None of these sites are adjacent to the subject property, and, based on a review of the regulatory status of these sites, none of these sites represent RECs to the subject property. The Hannah Motor Company and Red Lion sites were listed for compliance violations, as further explained in Section 3.1.1.3.

The EPA also regulates the management of hazardous waste at transportation, storage, and disposal facilities (TSDF). Information contained in the EDR report indicates the subject property is not listed as a TSDF site. No TSDF sites were identified within 0.5 miles of the subject property.

3.1.2.5 Emergency Response Notification System List

The ERNS List is a national database containing information from spill reports made to federal authorities. Information contained in the EDR report indicates that no ERNS sites are listed within 1 mile of the subject property.

3.1.2.6 U.S. Brownfields List

The EPA's U.S. Brownfields List identifies brownfield properties addressed by Cooperative Agreement Recipients or by Targeted Brownfields Assessments. The EDR report indicates that the subject property is not listed as a U.S. Brownfields site. Four U.S. Brownfields sites are listed within 0.5 miles of the subject property. Of these sites, three are located within 0.25 miles of the subject property. The remainder of the sites do not represent potential RECs for the subject property, based on distance from the subject property, understood extent of contamination, and/or regulatory status of the site (see EPA brownfield summary, Appendix E).

- The South of Railroad site (tax lot 48850000 and 48840000) is located 0.160 miles northwest of the subject property. The property was occupied by an asphalt paving plant from the 1940s through the early 1970s, causing petroleum contaminated soil. Based on the distance and understood groundwater flow direction at the site, the facility is not considered a REC to the subject property.
- The 400 Columbia St and 318 W 4th St site is located 0.207 miles northwest of the subject property. No evidence of significant petroleum or hazardous substance releases was observed

on site. Based on the distance and understood groundwater flow direction at the site, the facility is not considered a REC to the subject property.

- The South of City Hall site is located 0.247 miles northwest of the subject property. A Phase I and a Phase II ESA were performed at this site in 2016 and 2017, respectively. Benzene and 1,3-butadiene were detected above the MTCA Method B sub-slab soil gas screening levels (Appendix E). Based on the distance and understood groundwater flow direction at the site, the facility is not considered a REC to the subject property.

3.1.3 Other Databases

The following sections include other databases identified in the EDR report that may be relevant to assessing potential environmental liability or environmental issues at the subject property.

3.1.3.1 Environmental Data Resources Proprietary Databases

EDR has conducted research on the occurrence of historical business practices that may constitute a REC to properties. The database was developed from data found in historical city directories and contains information on over 100,000 former gas stations, manufactured gas plants, and dry cleaners. Due to the nature of these businesses, the sites have the potential for soil and groundwater contamination to have occurred.

EDR Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. The listings reviewed include, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, and/or service station.

Unless otherwise noted, the mere presence of historical auto stations near a site does not, in itself, constitute a REC.

A review of the EDR Historical Auto Stations list, as provided by, indicated that there are no EDR Historical Auto Stations sites within 0.125 miles of the subject property.

EDR Manufactured Gas List

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800s to 1950s to produce a gas that could be distributed and used as fuel. Many of the by-products of the gas production, such as coal tar (oily waste containing volatile and nonvolatile chemicals), sludges, oils, and other compounds, are potentially hazardous to human health and the environment. The by-products from this process were frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

One manufactured gas site is listed 0.694 miles west of the subject property. Based on the distance and understood groundwater flow direction at the site, the facility is not considered a REC to the subject property.

EDR Historical Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry-cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to, dry cleaners, cleaners, laundries, laundromats, cleaning/laundry businesses, wash and/or dry businesses.

Unless otherwise noted, the mere presence of a historical dry cleaner near a site does not, in itself, constitute a REC. The identified sites do not appear to represent a REC to the subject property.

A review of the EDR Historical Dry Cleaner list, as provided by EDR, indicated that there are no EDR Historical Dry Cleaner sites within 0.125 miles of the subject property.

3.1.4 Orphan Site List

Orphan sites are those for which mapping information is not detailed enough to plot the location of the site, or for which there is no known responsible party, or the responsible party is unwilling or unable to pay for cleanup. Based on a review of the information for and location of the orphan sites, none appear to represent a potential REC to the subject property.

3.1.5 Vapor Encroachment

ASTM Standard E1527-21 defines vapor migration as "the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface." The recognition of vapor migration as a possible REC may require incorporation of new types of controls and restrictions to address this contamination pathway.

The subject property and adjacent sites were reviewed in an effort to determine if vapor migration has, or has the potential to have, occurred at the site, from adjacent properties. Based on the information reviewed, the subject property is not identified as a potential vapor intrusion site. There is no known presence of USTs on the subject property or adjacent properties.

3.2 Historical Use Information

The objective of the historical use information review is to develop a history of the previous uses of the subject property and surrounding area to help identify the likelihood that past uses have led to RECs in connection with the subject property. Parametrix researched the historical land use, occupancy, and ownership of the subject property and adjacent properties to evaluate historical uses that are known to be associated with RECs. Historical records reviewed include the EDR Certified Sanborn® Map Report (EDR 2023b) and the EDR Aerial Photo Decade Package (EDR 2023c).

3.2.1 Certified Sanborn® Map Report

Parametrix requested Sanborn Fire Insurance maps from EDR to help identify past land uses. Sanborn Fire Insurance maps from the years 1884, 1888, 1890, 1892, 1907, 1911, 1928, 1949, and 1966 were examined. A copy of the Certified Sanborn Map Report is included in Appendix B. Observations are listed below.

1884	No structures are noted on the subject property. A wharf for the Vancouver City Flour Mills is present immediately east of the subject property. The Vancouver City Flour Mills included several machines, four elevators, and a steam pump. Several small structures are located north of 1st Street.
1888–1892	No structures are noted in the subject property. A ferry landing and platform is located to the south of the subject property, and the Vancouver City Flour Mill is located to the east. Minor changes in structures are present at parcels north of 1st Street.
1907–1911	No structures are noted in the subject property. A planked incline to the ferry and a hotel have been constructed on the shoreline of the western adjacent parcel. The eastern adjacent flour mill has been removed.
1928	A P.E.P Co. electrical substation and associated structures have been constructed on the western portion of the subject property. The eastern portion of the subject property includes part of a sand and gravel dock for the Minsinger Sand & Gravel Co. The adjacent hotel and ferry landing have been removed, and the eastern span of the Interstate Bridge has been constructed to the west of the subject property. Two houseboats are noted south of the subject property.
1949	A road (current SE Columbia Way) has been constructed immediately south of the subject property, separating the eastern portion of the subject property from the sand and gravel dock. No other changes are noted on the subject property or adjacent parcels.
1966	No change is evident on the subject property. A comment on the Sanborn map states that the substation was constructed in 1916. A second span of the Interstate Bridge and an off-ramp has been constructed. No other changes are evident in adjacent properties.

Based on the Sanborn Fire Insurance maps, the subject property was undeveloped until an electrical substation was constructed in 1916. The eastern portion of the subject property was also part of a sand and gravel dock beginning sometime between 1911 and 1928 until sometime between 1928 and 1949. PCBs were used in transformers, capacitors, and other electrical equipment manufactured between 1929 and 1977. Operation of the substation coincides with the presence of PCBs in transformer oils and may present a REC on the subject property.

3.2.2 Historical Aerial Photograph Review

Historical aerial photographs of the subject property area were obtained from EDR in the EDR Aerial Photo Decade Package. Aerial photographs for the years 1936, 1948, 1951, 1960, 1970, 1975, 1981, 1990, 1994, 2000, 2006, 2011, 2013, 2017, and 2020 were examined. Copies of the aerial photographs are included in Appendix C. Observations are listed below.

1936	The substation and disturbed soils are present at the subject property. A dock and structures are present on the southern adjacent properties, and the adjacent railroad is present. Additional structures are present on the northern adjacent property. The Interstate Bridge is present directly west of the subject property.
1948	The substation is still present at the subject property, and potential vegetation is present in the western portion of the subject property. Current SE Columbia Way has been constructed directly south of the subject property.
1951	Little to no change is evident on the subject property. New development is present at the parcel north of the subject property.
1960	Little to no change is evident on the subject property. The western span of the Interstate Bridge has been constructed, and a cloverleaf off-ramp have been constructed that surrounds the subject property.
1970–1975	Little to no change is evident on the subject property or surrounding properties.
1981	On the southeastern adjacent parcel, previous structures have been removed and new structures have been constructed. Little to no change is evident on the subject property.
1990	The cloverleaf surrounding the subject property has been removed.
1994–2011	Little to no change is evident on the subject property or surrounding properties.
2013	Little to no change is evident on the subject property. An access road to the railroad has been constructed north of the subject property.
2017–2020	Little to no change is evident on the subject property or surrounding properties.

Based on the aerial photograph history of the subject property, the electrical substation was constructed prior to 1936. The eastern portion was part of the adjacent sand and gravel stevedoring operation until SE Columbia Way was constructed (sometime between 1936 and 1948). After construction of SE Columbia Way, the eastern portion of the subject property was vegetated and vacant. Operation of the substation coincides with the presence of PCBs in transformer oils and may present a REC on the subject property.

3.2.3 Local Agency Records

Information from local agencies was reviewed for environmental significance as described in the following sections.

3.2.3.1 Clark County

Based on information from the Clark County Property Information Center, the subject property is comprised of tax lots 47560000 and 47580000 and is approximately 0.19 acres in size. The subject property is currently owned by Clark Public Utilities.

A review of permits for environmental significance (i.e., septic tank, stormwater, dry wells, and/or USTs or aboveground storage tanks) was completed. No permits of environmental significance were identified.

3.3 Additional Environmental Information

The following sections provide a summary of additional environmental information obtained for the site.

3.3.1 Asbestos

The manufacture of most asbestos-containing materials (ACM) was banned by the EPA by 1979. Prior to this, asbestos was a common constituent of numerous building materials, including floor and ceiling tiles, caulking, pipe insulation, roofing materials, and exterior siding.

Based on the age of the building (constructed in 1916), there is potential for ACM to have been used in the construction of the building.

3.3.2 Lead-Based Paint

Before 1977, paint commonly contained lead which is considered to cause human health problems if ingested. Based on the age of the building (constructed in 1916), there is potential for lead-based paint to have been used in the construction of the building.

3.3.3 Polychlorinated Biphenyls

Transformers can potentially contain PCBs. Electrical substations generally consist of one or more transformers to convert high voltage electricity to low-voltage electricity. Transformers and capacitors constructed prior to 1978 likely contained PCBs in transformer oil. Based on the age of the building (constructed in 1916) and previous operations, it is likely that PCB-containing electrical equipment was formerly present within this building.

Four pole-mounted transformers, three larger bridge-mounted transformers, and two ground-mounted electrical boxes are present outside the former substation building. Based on the condition of the exterior transformers, they were likely installed more recently than 1977. Therefore, there is limited potential for PCBs to be present in these current transformers.

3.3.4 Radon

Radon is a naturally occurring radioactive gas formed by the decay of uranium in some rocks and soil. The adverse health effects associated with radon gas depend upon various factors such as the concentration of the gas and exposure duration. The potential concentration of radon gas within a building depends on subsurface soil conditions, the integrity of the building's foundation, the existence of a basement or crawl space (primary areas of concern), and the building's ventilation.

Clark County ZIP code 98663 is located in the Federal EPA Radon Zone 1, indicating that the indoor average radon level is greater than 4 picocuries per liter. The Washington Department of Health has identified the radon risk in the area of the subject property as High. Based on this limited information, there is a high potential that radon is an environmental concern at the property. However, none of the buildings are located within the partial areas of the parcels that may be acquired as part of the IBR Program.

4. FILE REVIEW

In accordance with ASTM Standard E1527-21, inquiries and review of previous investigations for the subject property and a review of regulatory files for the subject property or adjacent properties may be conducted to further evaluate environmental conditions on the property or adjacent properties and to fill in data gaps where applicable. Previous investigations and file reviews are summarized below.

4.1 Previous Investigations

Based on regulatory information from EDR and Ecology, the subject property is not listed on any regulatory database. A previous Phase I ESA was conducted in April 2012 and is cited in relevant sections of this Phase I ESA (Parametrix 2012).

4.2 Adjacent and Nearby Properties File Review

Several adjacent and nearby properties were listed on environmental databases, as described in Section 3. Sufficient site-specific information was available through review of the EDR report, as well as online Ecology files, to develop an opinion on the potential for these properties to have affected the subject property. Therefore, a specific file review (physical review at Ecology) was not required beyond those completed during the course of this Phase I ESA. Specific information on the nature of release, types of contaminants, media impacted, and the potential to have affected the subject property or otherwise caused environmental concern is provided in Section 3.

[redacted]

7. CONCLUSIONS

Based on the findings of this investigation, Parametrix concluded the following:

1. The subject property is located at 100 SE Columbia Way and 102 SE Columbia Way in Vancouver, Washington, and includes Clark County parcels 47560000 and 47580000. Both parcels are owned and operated by Clark Public Utilities. The subject property encompasses an area of 0.20 acres, including one building that previously operated as an electrical transformer substation and office space. The site also includes paved parking areas and green space containing trees and rocks. The vicinity of the subject property is primarily undeveloped.
2. A review of Sanborn Fire Insurance maps and historical aerial photographs indicated that the former transformer substation was constructed in 1916. A site interviewee stated that the electrical equipment was removed in the mid-1980's. The building is still present. Open conduits are present between operational areas on the second and third floors and a water infiltration area on the first floor. The historical use of electrical equipment containing oils along with the potential for uncontrolled spills to ground surface is a REC.
3. The building was constructed in 1916. Based on the age of the building, there is potential for hazardous building materials (asbestos, lead-based paint, and/or PCBs) are present in the building is high.
4. The subject property is not listed on any regulatory database that would indicate a past or current release or storage of hazardous materials. A review of regulatory information indicated that several adjacent or nearby sites were identified in the regulatory record databases. However, based on regulatory status and distance from the subject property, none of the sites identified represent a REC to the subject property.
5. No evidence of current use or storage of hazardous substances and/or petroleum products was noted on or near the subject property. No evidence of distressed vegetation, spills or releases, dry wells, or other indications of environmental concern was identified during the site reconnaissance. Debris was present throughout the building and may represent RECs for the subject property.

[redacted]

8. RECOMMENDATIONS

Based upon the conclusions of this investigation of the subject property, Parametrix offers the following recommendations.

1. If the subject property building is to be removed, a demolition-level hazardous materials building survey (HMBS) should be conducted prior to any removal activities. The HMBS should quantify any hazardous materials that could impact removal activities such as lead-based paint, ACM, and/or PCBs. Due to the presence of the former substation equipment, the HMBS should be expanded to include sampling of any suspected materials, including floors and rubble for the presence of oil and/or PCBs.
2. A subsurface investigation is recommended for the soil underlying the drainage holes within the second-story bays. Soil should be assessed for the presence of PCBs and petroleum products.
3. If the bridge-mounted and pole-mounted transformers are to be removed, they should be handled and decommissioned in accordance with state and federal regulations. It is recommended that oil within the transformers be sampled for the presence of PCBs prior to initiating decommissioning activities. The transformers should be disposed of in accordance with state and federal regulations.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of state- and tribal (Superfund) equivalent sites

WA HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

A review of the WA HSL list, as provided by EDR, and dated 02/23/2023 has revealed that there is 1 WA HSL site within approximately 1 mile of the target property.

WA CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the WA CSCSL list, as provided by EDR, and dated 04/10/2023 has revealed that there are 18 WA CSCSL sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal leaking storage tanks

WA LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Ecology's Leaking Underground Storage Tanks Site List.

A review of the WA LUST list, as provided by EDR, has revealed that there are 5 WA LUST sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

WA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Ecology's Statewide UST Site/Tank Report.

A review of the WA UST list, as provided by EDR, and dated 02/06/2023 has revealed that there are 3 WA UST sites within approximately 0.25 miles of the target property.

WA CSCSL NFA: The data setcontains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the WA CSCSL NFA list, as provided by EDR, and dated 04/10/2023 has revealed that there are 5 WA CSCSL NFA sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/06/2023 has revealed that there are 4 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 03/30/2023 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Name: SOUTH OF RAILROAD
Address: TAX LOT 48850000 & 48840000 & INTERLAYING AREA
Recipient Name: City of Vancouver
Grant type: Assessment
Region: 10
Property Number: 48850000, 48840000
Parcel size: 0.75
Latitude: 45.623235
Longitude: -122.674823
HCM Label: Not reported
Map Scale: Not reported
Point of Reference: Not reported
Highlights: Former Use: The Property is in a commercial area at the southern edge of downtown Vancouver. It is bounded by Columbia Street to the east, Esther Street to the west, Columbia Way to the south and an active BNSF right-of-way to the north. The center of the Property is located approximately 600 feet north of the Columbia River, 700 feet west of Interstate Highway 5, and 500 feet south of Vancouver City Hall. The Property includes portions of two tax lots as well as interlaying property to which no tax number has been assigned. The Property was occupied by an asphalt paving plant from the 1940s through the early 1970s. Since the late 1970s, the Property has been vacant, or used for surface parking. The asphalt paving plant is the suspected source of petroleum contamination observed in soil during a recent sewer force main installation project on the Property. Asphalt plant operations ended nearly 20 years prior to current (City of Vancouver) and most recent previous (ANT, LLC) ownership of Property.

nlights: Former Use: The 1.53-acre Property is comprised of four tax lots located in downtown Vancouver.. A 10,625 square-foot commercial building, known as the Webber Machine Works building, is located in the northeast corner of the Property. The remainder of the Property is in use as an asphalt paved parking lot. The Property is zoned for commercial use. REC #1: Records show that the Property was historically occupied by light industrial operations and fuel dispensing facilities. No evidence of a significant release associated with these historical Property uses was identified. REC #2: A release was reported during decommissioning activities (Cleanup Site ID 11159, LUST ID 2453) in 1992. No evidence of significant petroleum or hazardous substance releases was observed during the drilling of soil or soil vapor borings or reflected in laboratory testing of soil samples collected. REC #3: Ecology records indicate the presence of a gasoline UST on the site. It is unknown if this UST has been removed. No evidence of significant petroleum or hazardous substance releases was observed during drilling or reflected in laboratory testing of soil or soil vapor samples collected. REC #4:

400 COLUMBIA ST AND 318 W 4TH ST (Continued) **1024079349**

	Historical city directory information indicates the Interstate Fuel Company was located adjacent south of the Property (north of the railroad right-of-way) in 1966. No evidence of significant petroleum or hazardous substance releases was observed or reflected in laboratory testing of soil samples collected.

REC #1: Records show that the Property was historically occupied by light industrial operations and fuel dispensing facilities. No evidence of a significant release associated with these historical Property uses was identified. REC #2: A release was reported during decommissioning activities (Cleanup Site ID 11159, LUST ID 2453) in 1992. No evidence of significant petroleum or hazardous substance releases was observed during the drilling of soil or soil vapor borings or reflected in laboratory testing of soil samples collected. REC #3: Ecology records indicate the presence of a gasoline UST on the site. It is unknown if this UST has been removed. No evidence of significant petroleum or hazardous substance releases was observed during drilling or reflected in laboratory testing of soil or soil vapor samples collected. REC #4: Historical city directory information indicates the Interstate Fuel Company was located adjacent south of the Property (north of the railroad right-of-way) in 1966. No evidence of significant petroleum or hazardous substance releases was observed or reflected in laboratory testing of soil samples collected.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Address:	404 W 4TH STREET AND 411 W 5TH STREET
Recipient name:	City of Vancouver
Grant type:	Assessment
Region:	10
perty Number:	48860000, 48900000, 48852000, 48890000
Parcel size:	1.54
Latitude:	45.6235367
Longitude:	-122.5003208

Actual:
38 ft.

SOUTH OF CITY HALL (Continued) **1024079555**

HCM Label:	Address Matching-House Number
Map Scale:	Not reported
Point of Reference:	Entrance Point of a Facility or Station
Highlights:	A geophysical survey of the South Site did not identify any underground structures or USTs, except for concrete/rebar debris. Soil borings GP-S-1 and GP-S-4, located on the western boundary of the South Site, did not contain elevated petroleum constituent concentrations. Lead and PAH TEQ detected in sample GP-S-2-0 -3 at the South Site exceeded their MTCA Method A CUL. Benzene was detected in soil vapor sample SV-3 in exceedance of MTCA Method B Sub-Slab Soil Gas Screening Levels. Further evaluation is necessary to determine whether or not this screening level exceedance presents an actual risk to human health. 1,3-Butadiene was detected above the MTCA Method B Sub-Slab Soil Gas Screening Level in two of three soil vapor samples collected at the South Site. Further evaluation is necessary to determine whether or not this screening level exceedance presents an actual risk to human health. This potential risk could be mitigated through the installation of vapor mitigation systems beneath newly constructed buildings. The source of the 1,3 butadiene remains unknown. Former Use: Historical documents indicate that the Property was developed with single-family residences by 1890 and remained exclusively in residential use until the 1940s, with the exception of the southeastern corner of the Property, which was occupied by the Vancouver Soda Water Works by 1907. The northwestern area of the Property was in commercial use as a welding shop by 1949. The Property was in exclusively commercial use since at least the 1960s, with historical businesses including potato chip manufacturing, storage, auto repair, fishing tackle manufacturing, and other retail and office uses. The Property has been in use as a parking lot or has been a vacant lot with no structures since at least 2005. The City of Vancouver purchased the Property in 2010.

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Name: WEST OF CITY HALL
Address: 503 AND 615 W 6TH STREET AND 400 ESTHER STREET
Recipient Name: City of Vancouver
Grant type: Assessment
Region: 10
Property Number: Not reported
Parcel size: 3.1
Latitude: 45.624711
Longitude: -122.676451
HCM Label: Address Matching-House Number
Map Scale: Not reported
Point of Reference: Entrance Point of a Facility or Station
Highlights: Soil and soil vapor samples were collected from the West Site to evaluate the potential for human health risk from historical operations on and in the vicinity of the site. No soil sample concentrations detected on the West Site exceeded MTCA Method A CULs for soil. Former Use: Historical documents indicate that the Property was developed with single-family residences by 1890 and remained in residential use until approximately 1907 when commercial development began. Records show that historical Property uses included offices and commercial development, including an automotive repair shop in the early 1990s. Since approximately 2000, a warehouse in the western area of the Property has been the only building on the Property. The eastern area of the Property has been a paved parking lot since the late 2000s. The City of Vancouver acquired the Property through bankruptcy in 2010.

Highlights:	Soil and soil vapor samples were collected from the West Site to evaluate the potential for human health risk from historical operations on and in the vicinity of the site. No soil sample concentrations detected on the West Site exceeded MTCA Method A CULs for soil. Former Use: Historical documents indicate that the Property was developed with single-family residences by 1890 and remained in residential use until approximately 1907 when commercial development began. Records show that historical Property uses included offices and commercial development, including an automotive repair shop in the early 1990s. Since approximately 2000, a warehouse in the western area of the Property has been the only building on the Property. The eastern area of the Property has been a paved parking lot since the late 2000s. The City of Vancouver acquired the Property through bankruptcy in 2010.

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

SOUTHWEST DELIVERY CO INC (Continued) **1000411117**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:
Registry ID: 110005345233

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D005
Waste Description: Barium

Waste Code: D006
Waste Description: Cadmium

Waste Code: D008
Waste Description: Lead

Waste Code: D009
Waste Description: Mercury

Waste Code: D011
Waste Description: Silver

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F004
Waste Description: The Following Spent Nonhalogenated Solvents: Cresols, Cresylic Acid, And Nitrobenzene; And The Still Bottoms From The Recovery Of These Solvents; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: P105
Waste Description: Sodium Azide

Waste Code: U001
Waste Description: Acetaldehyde (I) (Or) Ethanal (I)

BOISE WHITE PAPER LLC (Continued) **1000378977**

Waste Code: U037
Waste Description: Benzene, Chloro- (Or) Chlorobenzene

Waste Code: U151
Waste Description: Mercury

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U217
Waste Description: Nitric Acid, Thallium(1+) Salt (Or) Thallium(I) Nitrate

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

COLUMBIAN PUBLISHING CO (Continued) **1000108261**

corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Decode for NarcdID: Contamination
NARR Comments: This unregulated landfill was located in a seasonal lake basin and probably operated between 1950 and 1970, when it was covered by a 7 to 8-foot layer of clean fill. An ARCO facility that opened in 1971 at the eastern edge of the former landfill initiated an investigation in 1989 that showed gasoline contamination in groundwater. Borings also revealed a layer of landfill debris beneath clean fill. DEQ's LUST program (file #26-89-0149) requested a Corrective Action Plan from ARCO, leading to pump-and-treat remediation that began operating 8/90. Groundwater samples from eight monitoring wells contained dissolved metals, which are most likely a result of leachate percolating through unknown solid wastes in the unsaturated zone. Because of system fouling from these metals, the treatment program was shut down in May 1991.

NARR Comments: In June 1993, ARCO concluded that it was not possible to remediate benzene in groundwater without first removing dissolved metals. ARCO maintained that it had no responsibility for the metals. The LUST section may continue to require regular monitoring as a part of

HAYDEN ISLAND LANDFILL (Continued) **S103842510**

<quot>conditional closure.<quot> Potential pathways of exposure appear limited to groundwater and surface water. Because more information is needed about the landfill and its levels of contamination, Site Assessment recommends that affected property owners characterize contamination in and below the former landfill. Otherwise, a PA should be completed to investigate the site's history and to evaluate potential exposure pathways, under a low priority. Confined space methane testing was performed by PBS for the Hayden's Corner property. The only significant methane was found at two bathroom floor drains where the likely source was sewer gas. Three soil gas samples were collected from borings around the former ARCO site as part of the investigation of the Hayden's Corner property (ECSI #5711). Methane at 2% was found near the former waste oil but this could have been from residual petroleum contamination. Other samples showed only trace methane.

NARR Comments: [April 2017] This unregulated landfill was located in a seasonal lake basin and probably operated between 1950 and 1970, when it was covered by a 7 to 8-foot layer of clean fill. An ARCO facility that opened in 1971 at the eastern edge of the former landfill initiated an investigation in 1989 that showed gasoline contamination in groundwater. High concentrations of metals were also found. Borings revealed a layer of landfill debris beneath clean fill. The Hayden's Corner property (former ARCO site) was split off from the greater landfill site with a separate ECSI number (#5711). Another site was investigated in the Hayden Island Landfill area in 2016/17 (1445 and 1463 N. Hayden Island Drive). These properties' recent use was commercial, and not expected to lead to contamination. Groundwater below the properties is contaminated with TPH and metals, particularly arsenic, barium, lead, silver, and mercury.

NARR Comments: Methane and other atmospheric gases were measured in confined spaces inside the site buildings using a handheld meter in May 2011. Methane at levels from 1.5 to 5.5% was detected at the drains of two restrooms. This could be related to sewer gas from leaking drain traps. Little or no methane was detected in any other confined space locations within the buildings. In May 2012 three borings were arrayed around the property and one included the location of a former leaking waste oil tank from the prior gas station. Borings were sampled for methane using a handheld meter as well as summa canister sampling. VOCs samples were also collected using a summa. The maximum methane detection was around 2% in one hole (near the former waste oil tank) and near zero in other holes. Various VOCs (largely associated with petroleum) were found at generally low concentrations. No VOCs were found at concentrations greater than commercial risk-based concentrations. In July 2012 a plumber was hired by site owner to inspect and correct any problems with the bathroom drains/traps. No Further Action determination in August 2012. The determination applies only to the immediate Hayden's Corner site and not to the greater Hayden Island Landfill (ECSI #1559).

NARR Comments: An ARCO service station that operated on the property starting in 1971 initiated an investigation in 1989 that showed gasoline contamination in groundwater. Borings also revealed a layer of landfill debris beneath clean fill. The property is apparently located within the footprint of the former Hayden Island Landfill, an unregulated landfill that was located in a seasonal lake basin and probably operated between 1950 and 1970, when it was covered by a 7 to 8-foot layer of clean fill. DEQ's LUST program (file #26-89-0149) requested a Corrective Action Plan from ARCO, leading to pump-and-treat remediation that began operating 8/90. Groundwater samples from eight monitoring wells contained dissolved metals, which are most likely a result of landfill leachate percolating through unknown solid wastes in the unsaturated zone. Because of system fouling from these metals, the treatment program was shut down in May 1991. The ARCO station recieved a No Further Action determination in 1998 with the exception that the determination did not apply to other contaminants found at the site related to the greater Hayden Island Landfill.

NARR Comments: The site is just north of the center of Hayden Island in the Columbia River. The topography is flat and the elevation is approximately 20 feet above of sea level. The main channel of the Columbia River is just over 500 feet north of the site. Subsurface material encountered below asphalt and base gravel was medium-grained sand. At depths as little as 5 feet below ground surface (bgs) fill material consisting of paper, glass, wood, brick, plastic and metal, was encountered and found at depths up to 18 feet bgs.

NARR Comments: (November 2016 RKW) Phase II investigation including sampling of soil and shallow groundwter. Minor diesel and oil contamination was found in soil on the 1445 lot. Groundwater below the site contains widespread petroleum, metals (arsenic, barium, cadmium, lead, silver, and mercury), minor VOCs and PAHs. Follow-up investigation for methane (landfill gas) was undertaken in January 2017 using handheld Landtec instrument. Samples from two boring on each property and from interior confined spaces in the 1463 building. No significant levels

HAYDEN ISLAND - UMATILLA PROPERTY (Continued) **S118869506**

of methane were detected. NFAs for both properties were dated April 4, 2017.

NARR Comments: This site, the location of a former US Bank branch (since demolished) is situated on top of the abandoned Hayden Island Landfill (ECSI #1559). The site is currently owned by Umatilla, Inc. Belmar Properties, the owners of an adjacent property, are proposing to purchase the site. Belmar has applied to DEQ's Voluntary Cleanup Program to obtain a No Further Action determination for the site. These properties recent landuse was commercial and not expected to lead to contamination. Groundwater below the properties is contaminated with TPH and metals, particularly arsenic, barium, lead, silver, and mercury. Groundwater contaminatinon is thought to be associated with the former landfill.

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
