PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Ecology
Telephone: 360-407-6121

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Wells
Source: Department of Health
Telephone: 360-236-3148
Group A and B well locations.

Water Well Listing
Source: Public Utility District
Telephone: 206-779-7656
A listing of water well locations in Kitsap County.

Ecology Well Logs
Source: Department of Ecology
Telephone: 360-407-7294
Point geodatabase with a record for each Ecology well report. Points are located by quarter quarter section centroid. Points contain all well report types including water wells, resource protection wells, and decommissioned wells.

OTHER STATE DATABASE INFORMATION

Oil and Gas Well Listing
Source: Department of Natural Resources
Telephone: 360-902-1450
Locations that represent oil and gas test well sites in Washington State from 1890 to present.

RADON

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Parametrix, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

CERTIFICATION

The technical material and data contained in this document were prepared under the supervision and direction of the undersigned. We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the *all appropriate inquiries* in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

Parametrix was retained by the Washington State Department of Transportation to perform a Phase I Environmental Site Assessment (ESA) on two contiguous commercial (movie theater and restaurant) and multi-family residential (apartment complex) properties located to the west of Interstate 5, south of E. 8th Street, and east of C Street in Vancouver, Washington (Figure 1). The Phase I ESA focused on partial areas of the properties that may be acquired as part of the Interstate Bridge Replacement (IBR) Program. The subject property consists of the parcels identified as IBR-38820000, and IBR-38840000. Based on the findings of this investigation, Parametrix concluded the following:

1. The subject property is located at 318 E. 7th Street and 801 C Streets in Vancouver, Washington, and includes Clark County parcels 38820000 and 38840000. The subject property encompasses an area of 2.29 acres and includes one commercial building and one residential building (a theater and apartment complex). The vicinity of the subject property is developed with residential and commercial properties.
2. A review of Sanborn maps and historical aerial photographs indicated that an apartment complex has existed on tax lot 38820000 since at least 1936. A Regal Cinema was constructed on tax lot 38840000 in 1998. Prior to that, a hospital was located at the site from at least 1888 through the mid-1920s. The vicinity of the subject property transitioned from residential land to industrial/commercial in the 1940s and continued to see significant development until present day. No evidence of recognized environmental conditions (RECs) were identified on the subject property during the historical information review.
3. Based on the age of the building located on tax lot 38820000 (prior to 1936), there is potential that hazardous building materials (asbestos, lead-based paint, or polychlorinated biphenyls) are present in the building. However, no impacts to the building are expected with the potential partial acquisition of the property.
4. The subject property is not listed on any regulatory database that would indicate a past or current release or storage of hazardous materials. A review of regulatory information indicated that several adjacent or nearby sites were identified in the regulatory record databases. However, based on regulatory status and distance from the subject property, none of the sites identified represent a REC to the subject property.
5. No evidence of significant use or storage of hazardous substances or petroleum products was noted on or near the subject property. One unidentified drum was observed on the property, the use of which could not be confirmed. However, the drum appeared to be intact and no leaks or adverse conditions were observed. No evidence of distressed vegetation, spills or releases, dry wells, or other indications of environmental concern was identified during the site reconnaissance.

[redacted]

[redacted]

Based on the conclusions of this investigation of the subject property, Parametrix offers the following recommendations:

1. No further assessment of environmental conditions on the subject property, including the partial areas of the parcels that may be acquired as part of the IBR Program, is recommended.

1. INTRODUCTION

Parametrix was retained by the Washington State Department of Transportation (WSDOT) to perform a Phase I Environmental Site Assessment (ESA) on two contiguous commercial (movie theater and restaurant) and multi-family residential (apartment complex) properties located to the west of Interstate 5 (I-5), south of E. 8th Street, and east of C Street in Vancouver, Washington (herein referred to as the *subject property*) (Figure 1). The subject property is located in Clark County, Washington, and is comprised of two parcels included in the Interstate Bridge Replacement (IBR) Program. The property identifiers, tax lot IDs, and street addresses for both of the parcels are listed below, and the configuration of the properties is shown in Figure 2.

- IBR-38820000 38820000 318 E. 7th Street
- IBR-38840000 38840000 801 C Street

It is our understanding that WSDOT may pursue acquisition of a portion of the parcels making up the subject property as part of the IBR Program. The proposed acquisition areas are shown on Figure 2. The Phase I ESA focused primarily on the partial areas of each parcel that may be acquired as part of the IBR Program and assessed the potential for recognized environmental conditions on the acquisition areas from the larger property and adjacent or nearby properties.

This Phase I ESA includes a review of available documentation pertaining to the subject property, a site reconnaissance, and a review of pertinent public agency documents. The Phase I ESA consisted of two distinct tasks: (1) a review of documents and of oral information (if available), and (2) a site examination. Conclusions and recommendations within this report are based solely on observed evidence and data collected during the performance of this assessment.

1.1 Purpose

The Phase I ESA was conducted in general accordance with ASTM Standard E1527-21, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*, which defines the generally accepted industry practices and procedures currently applicable at the time and place of this study (ASTM 2021). The Phase I ESA is intended to permit the user to satisfy the requirements to qualify for the bona fide prospective purchaser limitation under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), and as such constitutes "all appropriate inquiries in the previous ownership and uses of the property consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601 (35)(B).

The purpose of this Phase I ESA is to identify recognized environmental conditions (RECs) on or near the subject property. The term *recognized environmental conditions* is defined in ASTM Standard E1527-21 as:

> "…(1) the presence of *hazardous substances* or *petroleum products* in, on, or at the *subject property* due to a *release* to the *environment*; (2) the likely presence of *hazardous substances* or *petroleum products* in, on, or at the *subject property* due to a *release* or likely *release* to the *environment*; or (3) the presence of *hazardous substances* or *petroleum products* in, on, or at

> the *subject property* under conditions that pose a *material threat* of a future *release* to the *environment*."

In accordance with ASTM Standard E1527-21, some RECs may be further defined as historical recognized environmental conditions (HRECs) or controlled recognized environmental conditions (CRECs).

An HREC is defined as:

> "…*a past release* of any *hazardous substances* or *petroleum products* that has occurred in connection with the *property* and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the *property* to any required controls."

A CREC is defined as:

> "…*a recognized environmental condition* resulting from a past *release of hazardous substances* or *petroleum products* that has been addressed to the satisfaction of the applicable regulatory authority, with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls."

This Phase I ESA endeavors to identify RECs, HRECs, and/or CRECs at the subject property.

1.2 Significant Assumptions

This assessment was conducted in accordance with generally accepted industry practices and procedures within the scope of work authorized at the time and place of this study. Parametrix's observations are limited to those areas to which it had access on the subject property.

Phase I ESA methodology included viewing accessible areas of the subject property from the public right-of-way; interior of the buildings on the subject property were not accessible. Unless otherwise stated, no other exceptions to the guidelines presented in ASTM E1527-21 were made during completion of this Phase I ESA.

1.3 Limitations

The findings, conclusions, and recommendations presented in this report are based on site conditions and the best available information known or made available by regulators, other consultants, or other sources at the time of the investigation. Parametrix conducted a diligent search and investigation in compliance with prevailing standards of the profession; however, certain adverse conditions may exist at the site not detected at the time of the investigation.

The services provided under this contract, as described in this report, include professional opinions and judgments based on data collected. These services have been provided according to generally accepted engineering practices. The opinions and conclusions contained in this report are typically based on information obtained from the following:

- Observations and measurements made by Parametrix field staff.
- Contacts and discussions with regulatory agencies and others.
- Review of available hazardous substance or solid waste lists.
- Opinions and judgments of Parametrix based on the information available.

In the professional judgment of Parametrix, the services performed pursuant to the scope of services are an adequate basis to collect data for a preliminary evaluation of the site and upon which to draw the conclusions stated in this report.

2. SUBJECT PROPERTY DESCRIPTION

The following sections summarize the location, characteristics, and physical setting of the subject property.

2.1 Location

The subject property includes two contiguous commercial/multi-family residential parcels located west of I-5, south of E. 8th Street, and east of C Street in Vancouver, Washington. The Phase I ESA focused on the subject property, which consists of partial areas of the two parcels that may be acquired as part of the IBR Program, as detailed in the table below. The site location is shown on Figure 1, the Site Vicinity Map. The boundary of the subject property is shown on Figure 2.

2.2 Site and Vicinity Characteristics

The subject property is fully developed and currently occupied by an apartment complex and a movie theater, and associated parking lots and infrastructure. Characteristics of the subject property, including the partial areas of the parcels that may be acquired as part of the IBR Program, are summarized in Table 1.

Table 1. Subject Property Characteristics

IBR ID	Address	Owner	Total Area (acres)	Potential Acquisition Area (square feet)	Current Use (determined through visual observations)
IBR-38820000	318 E. 7th Street	The Normandy LLC	0.68	705	Apartment complex
IBR-38840000	801 C Street	WPC Broadway LLC	1.61	4,242	Theater and restaurant

The subject property is bounded to the north by vacant vegetated property, to the east and south by I-5, and to the west by commercial development (see Figure 2).

2.3 Physical Setting

The subject property is located in the Portland Basin, which marks the northern terminus of the Willamette Lowland in Oregon (DNR 2023). The northern portion of the basin is known for its low topographic relief, with the subject property at an elevation of approximately 69 feet above mean sea level. The Portland Basin is bounded by the Cascade Range to the east and the Coast Range to the west.

Geologic processes in the Portland Basin consist of volcanism, sedimentation, and cataclysmic flood deposits in both fluvial and marine depositional environments. The subject property lies on what is mapped as coarse-grained Missoula flood deposits, cobbly, sandy gravel deposited by the Missoula floods (Wells et al. 2020). Surface soils consist of gravelly loam.

The topography in the vicinity of the subject property is a consistent slope, rising with distance from the Columbia River. Depth to groundwater is expected to vary seasonally, and the anticipated groundwater gradient is to the south toward the Columbia River. A Phase II ESA on the Metro Buick Olds Vancouver site (0.24 miles northwest of the subject property) indicated that groundwater was noted between 50 to 60 feet in geotechnical borings (AECOM 2020).

2.4 Current Use of the Subject Property

The subject property includes one residential building and one commercial building currently utilized as an apartment complex and a movie theater and restaurant. The proposed acquisition area includes the eastern edge of the parcels identified as IBR-38820000 and IBR-38840000 (see Figure 2).

2.5 Descriptions of Improvements on the Subject Property

A restaurant and cinema with 12 theaters currently occupies the site of IBR-38820000. The building is two stories, with 52,967 square feet of space on the main floor and 6,276 square feet on the second level. The building was constructed in 1998 as a cinema. An apartment complex currently occupies the site of IBR-38840000. Hardscaping such as sidewalks and an asphalt parking lot border the buildings to the west and north. No buildings or other significant structures are located on the partial areas of the parcels that may be acquired as part of the IBR Program.

2.6 Environmental Liens

An environmental lien is defined by ASTM as a charge, security, or encumbrance upon title to a property to secure the payment of a cost, damage, obligation, or duty arising out of response actions, cleanup, or other remediation of hazardous substances or petroleum products. No evidence of environmental liens was identified during the course of the Phase I ESA process. However, a formal title search was not completed as part of the scope of work.

3. RECORDS REVIEW

The purpose of the records review task was to gather environmental data on the subject property prior to the site examination. The information review consisted of two subtasks: (1) a review of regulatory databases to find sites, including and close to the subject property, listed by federal and State of Washington agencies and (2) a compilation of historical uses of the subject property and site vicinity properties to determine if past operations pose an environmental risk to the subject property.

The Environmental Data Resources (EDR) report is a summary of state and federal database searches for sites of possible environmental concern. The information review enabled Parametrix personnel to characterize the types of activities performed at the site, identify data gaps prior to the site examination, and facilitate recognition of discrepancies between reported and observed data. Data gaps identified during the document review were addressed by interviewing knowledgeable personnel, observations during the site examination, or by additional detailed investigation.

It should be noted that the information supplied by EDR is reported as Parametrix received it. EDR, in turn, reports information as it is provided in various government databases. It is not possible for either Parametrix or EDR to verify the accuracy or completeness of information contained in these databases. However, the use of and reliance on this information is a generally accepted practice in the conduct of environmental due diligence. The following sections present information from the document review.

3.1 Standard Environmental Record Sources

The following section summarizes information collected from records maintained by the U.S. Environmental Protection Agency (EPA) and the Washington State Department of Ecology (Ecology). The information includes details on sites identified in regulatory databases within recommended ASTM search distances. A complete listing of the databases reviewed is included in the EDR Radius Map™ Report (Appendix A) (EDR 2023a).

3.1.1 Review of Washington State Department of Ecology Databases

The following sections summarize the most relevant information obtained from the EDR report regarding sites identified within the ASTM E1527-21 search radii from the following databases. Additional information regarding these sites was reviewed on Ecology's Integrated Site Information System (ISIS) website to supplement data gaps in the EDR report. Relevant database listings from Ecology include the following:

- Underground Storage Tank (UST) List
- Leaking Underground Storage Tank (LUST) List
- Confirmed and Suspected Cleanup Site List (CSCSL)
- Confirmed and Suspected Cleanup Site List – No Further Action (CSCSL-NFA)
- SPILLS

- Voluntary Cleanup Program (VCP)
- Independent Cleanup Report (ICR)
- Landfill and/or Solid Waste Disposal Site Lists (SWF/LF)
- Brownfields

3.1.1.1 Underground Storage Tank List

The Ecology UST List identifies registered USTs, which are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data were obtained from Ecology's UST Site/Tank Report database.

Information contained in the EDR report indicates that the subject property is not listed as a UST site. Seven UST sites are located within 0.25 miles of the subject property. Sites not discussed below are either addressed later in this document or do not represent a REC based on distance from the subject property:

- The Bill Copps site (901 C Street) is located 496 feet northwest of the subject property. This site is listed on the UST, CSCSL-NFA, and RCRA NonGEN/NLR databases and is reported as having three decommissioned tanks (used to store unleaded gasoline). No active tanks are reported. The tanks were removed in August 1996. The site is listed as "No Further Action" on Ecology's Cleanup and Tank Search site. Based on the current regulatory status of the site and lack of evidence of a hazardous materials release, the facility is not a REC to the subject property.
- The Academy site (400 East Evergreen Blvd) is located 638 feet north of the subject property. The facility is listed on the UST and SPILLS databases as having one UST. The UST was installed in December 1964 and removed in August 1996. No indication of release from the underground storage tanks was found. A small oil spill (approximately 5 gallons) was reported in 2017; however, this incident did not require listing in a cleanup database. Based on the current regulatory status of the site and the lack of evidence of a significant hazardous materials release, the facility is not a REC to the subject property.
- The Hannah Motor Company site (114 East Sixth Street) is located approximately 0.16 miles southwest of the subject property. This site is listed on the UST and SPILLS databases and is reported as having two tanks (used to store used/waste oil). The site is listed with having two tanks removed in December 1999, and one tank closed in April 1992. Based on the current regulatory status of the site and the lack of evidence of a significant hazardous materials release, the facility is not a REC to the subject property.
- The City of Vancouver Row site (101 5th Street) is located approximately 0.2 miles southwest of the subject property. This site is listed on the UST database and is reported as having three inactive USTs (used to store leaded gasoline). The site is listed as "Closure in Process". Based on the current regulatory status of the site and the lack of evidence of a significant hazardous materials release, the facility is not a REC to the subject property.

Unless otherwise noted, the mere presence of a UST near a site does not, in itself, constitute a REC. Where available, other information was reviewed regarding the presence of a UST including the age of

the facility, proximity to the subject property, and known releases or spills. UST sites which have had known releases are discussed in Section 3.1.1.2 below.

3.1.1.2 Leaking Underground Storage Tank List

The LUST Incident Report contains an inventory of reported leaking UST incidents. The data were obtained from Ecology's LUST Database List. The subject property is not listed as a LUST site.

Eight LUST sites were identified within 0.5 miles of the subject property:

- The Vancouver Barracks site (Hathaway Road Bldg 404) is located approximately 487 feet southeast of the subject property and is listed in the LUST, UST, and CSCSL-NFA databases. The site is listed with having three tanks removed in July 2002. However, per communication with Mr. Paul Turner with Ecology, the cleanup report was received sometime in 1991 or 1992 and the database information is incorrect. Based on the distance from the subject property and the regulatory status of the site, this site does not represent a REC to the subject property.
- The Metro Buick Olds Vancouver site (904 Washington Street) is located approximately 0.24 miles northwest of the subject property and is listed in the LUST, UST, ICR, CSCSL-NFA, and RCRA NONGEN/NLR databases. Petroleum related soil contamination was present at the site. In 2020, a Phase II Environmental Site Assessment was conducted at the site. No on-site evidence of groundwater contamination was identified, and some soil contamination was found over a limited area (AECOM 2020). The site status is listed as "No Further Action" on the WA DOE Cleanup and Tank Search site. The site is listed with one UST that was removed in August 1996. Based on the distance from the subject property and the regulatory status of the site, the facility is not considered a REC to the subject property.
- The Chuck's Tire and Auto Service site (1416 Broadway) is located approximately 0.35 miles northwest of the subject property and is listed in the LUST, UST, ICR, and CSCSL-NFA databases. The facility received a No Further Action (NFA) determination from Ecology. The tank release date is listed as September 26, 1992. Based on the distance from the subject property and the regulatory status of the site, this site does not represent a REC to the subject property.
- The Kyungshin Choi/Matthieu's Car Care site (1505 Broadway Street) is located approximately 0.39 miles northwest of the subject property and is listed in the LUST and UST databases. There was one UST at this site (used to store unleaded gasoline), that has been removed. The tank release date is listed as February 2013. The site status is listed as "Cleanup Started" on Ecology's Cleanup and Tank Search site. No other information about this site is available. Based on the distance from the subject property, this site does not represent a REC to the subject property.

Based on the distance from the subject property, remediation, and regulatory status (NFA determinations), the remainder of the LUSTs sites do not represent potential RECs to the subject property, including the partial areas of the parcels that may be acquired as part of the IBR Program.

3.1.1.3 Confirmed and Suspected Contaminated Sites List

The state hazardous waste sites records are the states' equivalent to the Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS). These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data were obtained from Ecology's CSCSL.

Twenty-one CSCSL sites were identified within 1 mile of the subject property. Of the 21 sites, none are located within 0.25 miles of the subject property. None of the CSCSL sites identified represent potential RECs for the subject property based on distance from the subject property, understood extent of contamination, and/or regulatory status of the site.

A subset of the CSCSL is the CSCSL-NFA. The database contains information about sites previously on the CSCSL that have received an NFA determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead, a No Further Action code is entered based upon the type of NFA determination the site received.

Four CSCSL-NFA sites were identified within 0.25 miles of the subject property (three of which are discussed earlier in Section 3). Sites not discussed below are either addressed earlier in Section 3 or do not represent a REC based on distance from the subject property:

- The US DOT Federal Highway Admin Vancouver site (610 East 5th Street) is located approximately 0.22 miles southeast of the subject property. The site is listed in the LUST, UST, CSCSL-NFA, ASBESTOS, and RCRA NONGEN/NLR databases. The site is listed with having one steel tank which was removed from the site in August 1996. Petroleum related soil contamination was present at the site. The site status is listed as "No Further Action" on the Ecology's Cleanup and Tank Search site. Based on the NFA determination and the remedial activities on the site, the facility is not a REC to the subject property.

The Vancouver Barracks, Bill Copps Inc, and Metro Buick Olds Vancouver sites make up the remaining CSCSL-NFA sites within 0.25 miles of the subject property and are discussed earlier in Section 3. Six additional CSCSL-NFA sites are reported within approximately 0.5 miles of the subject property. Based on the distance from subject property, continued cleanup efforts, and NFA determinations, none of the identified sites appear to represent RECs to the subject property, including the partial areas of the parcels that may be acquired as part of the IBR Program, unless specifically noted otherwise in another section.

3.1.1.4 SPILLS Database

This database provides a comprehensive list of reported spills. The subject property is not listed as a SPILLS site.

3.1.1.5 Voluntary Cleanup Program

This database provides a listing of sites that have entered either the VCP or its predecessor, the Independent Remedial Action Program.

Two VCP sites are reported within approximately 0.5 miles of the subject property:

- The Vancouver City Brewery Blocks site (400 W 8th Street) is located approximately 0.34 miles west-northwest of the subject property and is listed in the VCP database. The facility received an NFA determination from Ecology dated August 25, 1999. Based on the distance from the subject property and the regulatory status of the site, this site does not represent a REC to the subject property.
- The Pinkertons Auto Repair site (1520 Washington Street) is located approximately 0.46 miles northwest of the subject property and is listed in the VCP database. This site has suspected petroleum contamination to soil, and the site is listed on Ecology's Cleanup and Tank Search site as "Cleanup started". A Phase II ESA proposal is also listed on the aforementioned site. However, based on the distance from the subject property, this site does not represent a REC to the subject property.

3.1.1.6 Independent Cleanup Report

These are remedial action reports Ecology has received from either the owner or operator of the site. These actions have been conducted without department oversight or approval and are not under an order or decree.

The subject property is not listed as an ICR site. Five ICR sites are reported within approximately 0.5 miles of the subject property and are either discussed above in other sections or do not represent a REC to the subject property based on distance and regulatory status.

3.1.1.7 Solid Waste Facilities/Landfill

The Solid Waste Facilities/Landfill (SWF/LF) records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data were obtained from Ecology's Solid Waste Facilities List.

The subject property is not listed as a SWF/LF site. Two SWF/LF sites are reported within 0.5 miles of the subject property:

- The Waste Connections – Vancouver site (515 W 15th Street) is located approximately 0.38 miles north-northeast of the subject property. The facility type is listed as Recycling (non-regulated). No additional information was found.
- The Service Batteries site (210 W 16th Street) is located approximately 0.5 miles northwest of the subject property. The facility type is listed as Recycling (non-regulated). No additional information was found.

Based on a review of regulatory status and/or distance from the subject property, the sites do not represent a REC to the subject property.

3.1.1.8 Brownfields List

The Brownfields List is a database of sites that Ecology considers brownfields or that have received financial or technical assistance for cleanup. A brownfield is "a real property where expansion or redevelopment is complicated by actual or perceived environmental contamination." The subject property is not listed as State Brownfields site. No State Brownfields sites were reported within 0.5 miles of the subject property.

3.1.2 Environmental Protection Agency Databases

The EPA administers several programs designed to protect the environment and monitor the generation, storage, treatment, and disposal of hazardous substances. The following sections summarize the most relevant information obtained from the EDR report regarding sites identified within the ASTM E1527-21 search radii from the following databases:

- National Priorities List (NPL)
- Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) List
- Corrective Action Report (CORRACTS) List
- Resource Conservation and Recovery Act (RCRA)
- Resource Conservation and Recovery Act Information (RCRAInfo) List
- Emergency Response Notification System (ERNS) List
- U.S. Brownfields List

3.1.2.1 NPL List

The NPL identifies priority hazardous waste sites for remedial actions under the EPA Superfund program. Information contained in the EDR report indicates that the subject property is not listed as an NPL site. No NPL sites are listed within 1 mile of the subject property.

3.1.2.2 CERCLIS List

The EPA's CERCLIS List identifies sites that may potentially pose a threat to the environment or the health of the general public.

Information contained in the EDR report indicates that the subject property is not listed as a CERCLIS site. No CERCLIS sites were identified within 0.5 miles of the subject property.

The EPA also publishes the CERCLIS-NFRAP List that identifies CERCLIS sites that have been designated "no further remedial action planned" (NFRAP) and that have been removed from the CERCLIS List. Information contained in the EDR report indicates that the subject property is not listed as a CERCLIS-NFRAP site. No CERCLIS-NFRAP sites were identified within 0.5 miles of the subject property.

3.1.2.3 CORRACTS List

The CORRACTS List identifies hazardous waste handlers with a history of RCRA corrective action activity. This list shows which corrective action events have occurred for every hazardous waste handler that has had corrective action activity due to improper procedures or handling.

Information contained in the EDR report indicates that the subject property is not listed as a CORRACTS site. No CORRACTS sites are listed within 1 mile of the subject property.

3.1.2.4 RCRA Generators List

RCRAInfo is EPA's comprehensive information system, providing access to data supporting RCRA and the Hazardous and Solid Waste Amendments of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by RCRA.

Conditionally exempt small quantity generators (CESQGs) generate less than 100 kilograms (kg) of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Very small quantity generators (VSQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate more than 1,000 kg of hazardous waste, or more than 1 kg of acutely hazardous waste per month. Non-generators (NonGen/NLR) do not presently generate hazardous waste.

Information contained in the EDR report indicates that the subject property is not listed in any RCRA database.

Four RCRA NonGen NLR sites are listed within 0.25 miles of the subject property. None of these sites are adjacent to the subject property, and based on a review of the regulatory status of these sites, none of these sites represent RECs to the subject property.

EPA also regulates the management of hazardous waste at transportation, storage, and disposal facilities (TSDF). Information contained in the EDR report indicates the subject property is not listed as a TSDF site. No TSDF sites were identified within 0.5 miles of the subject property.

3.1.2.5 ERNS List

The ERNS List is a national database containing information from spill reports made to federal authorities. Information contained in the EDR report indicates that no ERNS sites are listed within 1 mile of the subject property.

3.1.2.6 U.S. Brownfields List

The EPA's U.S. Brownfields List identifies brownfield properties addressed by Cooperative Agreement Recipients or by Targeted Brownfields Assessments. The EDR report indicates the subject property is not listed as a U.S. Brownfields site. Five U.S. Brownfields sites are listed within 0.5 miles of the subject property.

- The 400 Columbia Street and 318 W 4th Street site is located approximately 0.34 miles southwest of the subject property. The site was historically occupied by light industrial

operations and fuel dispensing facilities. A release was reported during decommissioning activities in 1992 at the Christensen Family site discussed in Section 3.1.1.2. Based on distance from the subject property, this site is not considered a REC to the subject property.

- The South of City Hall site (404 W 4th Street and 411 W 5th Street) is located approximately 0.39 miles southwest of the subject property. The site was historically developed with single-family residences by 1890 and remained residential until the 1940s. The site was in commercial use since the 1960s. Historical businesses included potato chip manufacturing, storage, auto repair, fish tackle manufacturing, and other retail and office uses. The site has been a vacant lot or used for parking since at least 2005. Based on distance from the subject property, this site is not considered a REC to the subject property.
- The Cascadia Property site (1506 Main Street) is located approximately 0.45 miles northwest of the subject property. The site was historically used as residences and a millwork facility. Based on current aerial photography, the site appears to be a vacant construction site. Based on distance from the subject property, this site is not considered a REC to the subject property.

Due to distance from the subject property the remaining Brownfield sites identified do not represent a REC to the subject property.

3.1.3 Other Databases

The following sections include other databases identified in the EDR report that may be relevant to assessing potential environmental liability or environmental issues at the subject property.

3.1.3.1 EDR Proprietary Databases

EDR has conducted research on the occurrence of historical business practices that may constitute a REC to properties. The database was developed from data found in historical city directories and contains information on over 100,000 former gas stations, manufactured gas plants, and dry cleaners. Due to the nature of these businesses, the sites have the potential for soil and groundwater contamination to have occurred.

EDR Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. The listings reviewed include, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, and/or service station.

Unless otherwise noted, the mere presence of historical auto stations near a site does not, in itself, constitute a REC.

A review of the EDR Historical Auto Stations list, as provided by, indicated that there is one EDR Historical Auto Stations site within 0.125 miles of the subject property:

- The Roberts Lawrence R site (715 Broadway) is located 619 feet southeast of the subject property. EDR records indicate operation from 1969 to at least 1975. Based on the lack of any reported releases and the more than 40 years since operations ended, this site is not considered a REC to the subject property.

EDR Manufactured Gas List

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800s to 1950s to produce a gas that could be distributed and used as fuel. Many of the by-products of the gas production, such as coal tar (oily waste containing volatile and nonvolatile chemicals), sludges, oils, and other compounds, are potentially hazardous to human health and the environment. The by-products from this process were frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

One manufactured gas site is listed within 1 mile of the subject property:

The Vancouver Gas Manufacturing site (9th and Lincoln Streets) is located approximately 0.75 miles west of the subject property. No additional information is available. Based on the lack of any reported releases and the distance from the subject property, this site is not considered a REC to the subject property.

EDR Historical Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry-cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to, dry cleaners, cleaners, laundries, laundromats, cleaning/laundry businesses, wash, and/or dry businesses.

A review of the EDR Historical Dry Cleaner list, as provided by EDR, has revealed that there are no EDR Historical Dry Cleaner sites within 0.125 miles of the subject property.

3.1.4 Orphan Site List

Orphan sites are those for which mapping information is not detailed enough to plot the location of the site, or for which there is no known responsible party, or the responsible party is unwilling or unable to pay for cleanup. Based on a review of the information for and location of the orphan sites, none appear to represent a potential REC to the subject property.

3.1.5 Vapor Encroachment

ASTM Standard E1527-21 defines vapor migration as "the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface." The recognition of vapor migration as a possible REC may require incorporation of new types of controls and restrictions to address this contamination pathway.

The subject property and adjacent sites were reviewed in an effort to determine if vapor migration has, or has the potential to have, occurred at the site, from adjacent properties. Based on the information reviewed, the subject property is not identified as a potential vapor intrusion site. There is no known presence of USTs, volatile organic compound contamination, or other conditions that would suggest potential vapor intrusion issues on the subject property.

3.2 Historical Use Information

The objective of the historical use information review is to develop a history of the previous uses of the subject property and surrounding area to help identify the likelihood that past uses have led to RECs in connection with the subject property. Parametrix researched the historical land use, occupancy, and ownership of the subject property and adjacent properties to evaluate historical uses that are known to be associated with RECs. Historical records reviewed include the EDR Certified Sanborn® Map Report and the EDR Aerial Photo Decade Package (EDR 2023b, 2023c).

3.2.1 Certified Sanborn® Map Report

Fire insurance maps in the EDR Certified Sanborn Map Report showing the vicinity of the subject property were requested to establish historical business operations at the subject property and adjacent properties. This report (Appendix B) certifies that the complete holdings of the Sanborn Library, LLC collection were searched based on client-supplied target property information and fire insurance maps covering the target property were found for 1888, 1890, 1892, 1907, 1911, 1928, 1949, and 1966. Observations are listed below.

1888 The subject property is not completely depicted on this Sanborn Map. Sisters Hospital is located in the northeastern corner, and Holy Angels College is located in the northwestern corner of the subject property. There also appear to be two buildings on the southwestern portion of the subject property. East C Street is located to the west of the subject property, and Reserve Street is located along the east side. An Episcopal church is located to the west, and a school is located to the northwest of the subject property. The area appears to be predominantly residential.

1890 The subject property and much of the surrounding area appear not to have changed significantly. The Holy Angels College is no longer located in the northwestern corner of the subject property.

1892 The subject property and much of the surrounding area appear not to have changed significantly. The school building to the northwest of the subject property appears to have been demolished, and a new building constructed.

1907 The subject property and much of the surrounding area appear not to have changed significantly. The hospital is now called St. Joseph's Hospital (Catholic), and it is noted that the building is heated with an electric boiler. A garden has been planted to the west of the hospital. Two dwellings are now apparent on the southern portion of the subject property. The school building to the northwest of the subject property appears to have added onto and is now St. Luke's Hall.

1911 The subject property and much of the surrounding area appear not to have changed significantly. A new dwelling is located on the southern portion of the subject property.

1928 The subject property and much of the surrounding area appears not to have changed significantly. St. Joseph's Hospital is now the (Formerly) Blanchet Home for the Aged, and St. Luke's Hall, located to the northwest, is now St. Luke's Parish House.

1949 The Blanchet Home has been demolished, and a dwelling is now in its place. The northwestern portion of the subject property now houses a portion of a bowling alley, and the southern portion of the subject property now has several more dwellings, including a boarding house, and an apartment building. A machine shop and vocational school are located north of the subject property. An apartment building has been constructed directly south of the subject property. St. Luke's Episcopal Church has been demolished, and the Rectory to the west of the building has become a dwelling. St. Luke's Parish House has also been demolished and is now an auto repair and sales lot. The surrounding area is becoming more commercialized, with many new stores located to the west.

1966 The subject property appears not to have changed significantly. The dwelling in the northeastern corner of the subject property has been demolished. Located directly north of the bowling alley is now a tire sales & service shop. Beyond that is an auto sales and service shop, and to the northeast, parking and auto and general storage. The block directly to the northwest of the subject property is now mainly auto services: sales (new and used), painting, repairing. A service station (gas and oil) has been constructed on the corner of Broadway and E. 8th Streets, approximately one block west of the subject property.

Historical businesses identified near the subject property with potential to impact the subject property include a machine shop, auto sales and repair shop, tire service shop, and a gasoline and oil service station. However, based on the length of time since the facilities have been present, their location, and no known releases, the potential to have impacted the subject property is low.

3.2.2 Historical Aerial Photograph Review

Historical aerial photographs of the subject property area were obtained from EDR in the EDR Aerial Photo Decade Package. Aerial photographs for the years 1936, 1948, 1951, 1960, 1970, 1975, 1981, 1990, 1994, 2000, 2006, 2011, 2015, and 2019 were examined. Copies of the aerial photographs are included in Appendix C. Observations are listed below.

1936 The subject property appears residentially developed. The vicinity is primarily residential, with several houses visible in all directions from the subject property. A road is visible to the west of the subject property (present-day C Street) and a road is visible along the northern border of the subject property (present-day E. 8th Street).

1948 The structure on the subject property appears similar to the 1936 aerial photograph. Residential properties are visible to the adjacent south and east of the subject property. Commercial development is visible west of the subject property.

1951–1975 I-5 is visible east of the subject property in the 1960 aerial photograph. The subject property and adjacent area appear similar to the previous photograph. Additional development is

visible in the area, and it appears that some residential properties are transitioning to commercial.

1981–2000 A paved parking lot is visible north of the commercial building on the subject property in the 1990 aerial photograph. By the time of the 2000 aerial photograph, a commercial building replaces the paved parking lot. Additional commercial development is visible to the west of the subject property.

2006 The subject property appears similar to the 2000 historical aerial photograph. Additional commercial development is visible southwest of the subject property.

2011–2019 The subject property appears similar to present day aerial photographs. The property to the adjacent north is vacant by the 2011 aerial photograph. The direct vicinity appears very similar to present day aerial photographs.

Based on the aerial photograph history of the subject property, one building occupied the site of the subject property from at least 1936 to present. An additional building was built north of the first building by 2000. No buildings have been located on the partial areas of the parcels that may be acquired as part of the IBR Program. The area transitioned from residential to residential and industrial/commercial in the 1940s and continued to see significant development until present day. No evidence of RECs was identified on the subject property, including the partial areas of the parcels that may be acquired as part of the IBR Program, during the historical photograph review.

3.2.3 Local Agency Records

Information from local agencies was reviewed for environmental significance as described in the following sections.

3.2.3.1 Clark County

Based on information from the Clark County Tax Assessor's Office, the subject property consists of the following tax lots:

- IBR-38820000 38820000 318 E 7th Street
- IBR-38840000 38840000 801 C Street

IBR-38820000 is currently owned by The Normandy LLC. IBR-38840000 is currently owned by WPC Broadway LLC.

Clark County property records do not indicate an age for either of the commercial buildings on the subject property, however, the current building on IBR-38820000 is visible on the 1936 aerial photograph and the current building on IBR-38840000 is visible on the 2000 aerial photograph. A review of permits for environmental significance (i.e., septic tank, stormwater, dry wells, and/or USTs or aboveground storage tanks [ASTs]) was completed. No permits of environmental significance were identified.

3.3 Additional Environmental Information

The following sections provide a summary of additional environmental information obtained for the site.

3.3.1 Asbestos

The manufacture of most asbestos-containing materials (ACM) was banned by the EPA by 1979. Prior to this, asbestos was a common constituent of numerous building materials, including floor and ceiling tiles, caulking, pipe insulation, roofing materials, and exterior siding.

Based on the age of the building identified in IBR-38820000 (constructed prior to 1936), there is potential for ACM to have been used in the construction of the building. However, this building is not located within the partial areas of the parcels that may be acquired as part of the IBR Program.

3.3.2 Lead-Based Paint

Before 1977, paint commonly contained lead, which is considered to cause human health problems if ingested. Based on the age of the building identified in IBR-38820000 (constructed prior to 1936), there is potential for lead-based paint (LBP) to have been used in the construction of the building. However, this building is not located within the partial areas of the parcels that may be acquired as part of the IBR Program.

3.3.3 Polychlorinated Biphenyls

Transformers can potentially contain polychlorinated biphenyls (PCBs). One pad-mounted transformer is located on the eastern edge of the subject property. However, no visible leaks or signs of a release were observed.

Based on the age of the building identified in IBR-38820000 (constructed prior to 1936), there is potential for PCBs to have been used in the construction of the buildings (primarily used in lighting and electrical equipment). However, this building is not located within the partial areas of the parcels that may be acquired as part of the IBR Program.

3.3.4 Radon

Radon is a naturally occurring radioactive gas formed by the decay of uranium in some rocks and soil. The adverse health effects associated with radon gas depends upon various factors such as the concentration of the gas and exposure duration. The potential concentration of radon gas within a building depends on subsurface soil conditions, the integrity of the building's foundation, the existence of a basement or crawl space (primary areas of concern), and the building's ventilation.

Clark County ZIP code 98660 is located in the Federal EPA Radon Zone 1, indicating that the indoor average radon level is greater than 4 picocuries per liter. The Washington Department of Health has identified the radon risk in the area of the subject property as High. Based on this limited information,

there is potential that radon is an environmental concern at the property. However, none of the buildings are located within the partial areas of the parcels that may be acquired as part of the IBR Program.

4. FILE REVIEW

In accordance with ASTM Standard E1527-21, inquiries and review of previous investigations for the subject property and a review of regulatory files for the subject property or adjacent properties may be conducted to further evaluate environmental conditions on the property or adjacent properties and to fill in data gaps where applicable. Previous investigations and file reviews are summarized below.

4.1 Previous Investigations

Based on regulatory information from EDR and Ecology, the subject property is not listed on any regulatory database. A Phase I ESA was conducted by Parametrix in 2012 for tax lot ID 38840000. No further environmental investigation was recommended in this report. The report did, however, note that two monitoring wells are located on the I-5 embankment east of the subject property. At that time, neither the Site Manager, nor the representative of the property owner had knowledge of the wells, and no information could be found on Ecology's Water Resources Explorer website. The use of the monitoring wells is unknown (Parametrix 2012). Photos are included in Appendix D. The wells were not observed during the current site visit conducted in 2023. However, a fence between the subject property and the I-5 embankment prevented access such that they may be present but could not be confirmed.

4.2 Adjacent and Nearby Properties File Review

Several adjacent and nearby properties were listed on environmental databases, as described in Section 3. Sufficient site-specific information was available through review of the EDR report, as well as online Ecology files, to develop an opinion on the potential for these properties to have affected the subject property. Therefore, a specific file review (physical review at Ecology) was not required beyond those completed during the course of this Phase I ESA. Specific information on the nature of release, types of contaminants, media impacted, and the potential to have affected the subject property or otherwise caused environmental concern is provided in Section 3.

5. SITE EXAMINATION

Parametrix conducted a site examination of the subject property from public right-of-way on September 21, 2023. The site examination consisted of observing the areas immediately surrounding the subject property, providing observations of the general environmental conditions on the subject property, and visually assessing the subject property and adjacent properties for evidence of hazardous materials. The site examination focused on partial areas of the parcels that may be acquired as part of the IBR Program. Photographs of the subject property taken during the site walk are included in Appendix D.

5.1 Subject Property

The subject property includes two building complexes (one commercial and one residential), as well as asphalt parking lots. Hardscaping such as sidewalks are located adjacent to the buildings to the north, west, and south. I- 5 lies east of the subject property. The partial areas of the parcels that may be acquired as part of the IBR Program are limited to landscaped areas situated between the subject property and I-5.

All observations were taken from the public right-of-way. No evidence of USTs, ASTs, or other indications of environmental significance were observed on the exterior portions of the property. One unidentified drum was observed on the eastern portion of the subject property, between the subject property and I-5 (see Appendix D). Parametrix reached out to a representative familiar with the subject property on October 4, 2023; however, they had no knowledge of the unidentified drum and suspected it may be related to theater operations. The drum appeared to be intact, and no leaks or adverse conditions were observed during the site examination.

No additional evidence of significant storage or spills of hazardous substances and/or petroleum products was observed on the subject property. No evidence of staining, adverse odors, or other indications of potential releases was observed. In general, no RECs or other adverse environmental conditions were identified associated with the subject property. Table 2 summarizes the observed conditions.

Table 2. Subject Property Observed Conditions

IBR ID	Address	Area	Current Use (determined through visual observation)	Site Examination Observations
IBR-38820000	318 E. 7th Street	0.68 acres	Apartment complex	No signs of adverse environmental conditions were observed.
IBR-38840000	801 C Street	1.61 acres	Restaurant and theater	One unidentified drum was observed on the eastern portion of the subject property.

5.2 Adjacent Properties

The vicinity of the subject property is significantly developed with residential properties and commercial buildings. Adjacent properties were examined from public areas for the presence of environmental conditions which have the potential to impact the subject property.

The subject property is bounded to the north by commercial/industrial property, to the east and south by I-5, and to the west by commercial development. No evidence of significant staining or stressed vegetation was noted on the ground surface on assessable properties adjacent to the site. No evidence of the storage of chemical or hazardous materials was identified on visible areas of adjacent properties.

7. CONCLUSIONS

Based on the findings of this investigation, Parametrix concluded the following:

1. The subject property is located at 318 E. 7th Street and 801 C Streets in Vancouver, Washington, and includes Clark County parcels 38820000 and 38840000. The subject property encompasses an area of 2.29 acres and includes one commercial building and one residential building (a theater and apartment complex). The vicinity of the subject property is developed with residential and commercial properties.
2. A review of Sanborn maps and historical aerial photographs indicated that an apartment complex has existed on tax lot 38820000 since at least 1936. A Regal Cinema was constructed on tax lot 38840000 in 1998. Prior to that, a hospital was located at the site from at least 1888 through the mid-1920s. The vicinity of the subject property transitioned from residential land to industrial/commercial in the 1940s and continued to see significant development until present day. No evidence of RECs were identified on the subject property during the historical information review.
3. . Based on the age of the building located on tax lot 38820000 (prior to 1936), there is a potential that hazardous building materials (ACM, LBP, or PCBs) are present in the building. However, no impacts to the building are expected with the potential partial acquisition of the property.
4. The subject property is not listed on any regulatory database that would indicate a past or current release or storage of hazardous materials. A review of regulatory information indicated that several adjacent or nearby sites were identified in the regulatory record databases. However, based on regulatory status and distance from the subject property, none of the sites identified represent a REC to the subject property.
5. No evidence of significant use or storage of hazardous substances or petroleum products was noted on or near the subject property. One unidentified drum was observed on the property, the use of which could not be confirmed. However, the drum appeared to be intact and no leaks or adverse conditions were observed. No evidence of distressed vegetation, spills or releases, dry wells, or other indications of environmental concern was identified during the site reconnaissance.

8. RECOMMENDATIONS

Based upon the conclusions of this investigation of the subject property, Parametrix offers the following recommendations.

1. No further assessment of environmental conditions on the subject property, including the partial areas of the parcels that may be acquired as part of the IBR Program, is recommended.

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, LLC. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. This Report is provided on an "AS IS", "AS AVAILABLE" basis. **NO WARRANTY EXPRESS OR IMPLIED IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, LLC AND ITS SUBSIDIARIES, AFFILIATES AND THIRD PARTY SUPPLIERS DISCLAIM ALL WARRANTIES, OF ANY KIND OR NATURE, EXPRESS OR IMPLIED, ARISING OUT OF OR RELATED TO THIS REPORT OR ANY OF THE DATA AND INFORMATION PROVIDED IN THIS REPORT, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES REGARDING ACCURACY, QUALITY, CORRECTNESS, COMPLETENESS, COMPREHENSIVENESS, SUITABILITY, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT, MISAPPROPRIATION, OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, LLC OR ITS SUBSIDIARIES, AFFILIATES OR THIRD PARTY SUPPLIERS BE LIABLE TO ANYONE FOR ANY DIRECT, INCIDENTAL, INDIRECT, SPECIAL, CONSEQUENTIAL OR OTHER DAMAGES OF ANY TYPE OR KIND (INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, LOSS OF USE, OR LOSS OF DATA) INFORMATION PROVIDED IN THIS REPORT.** Any analyses, estimates, ratings, environmental risk levels, or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only an assessment performed by a qualified environmental professional can provide findings, opinions or conclusions regarding the environmental risk or conditions in, on or at any property.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of state- and tribal (Superfund) equivalent sites

WA HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

A review of the WA HSL list, as provided by EDR, and dated 02/23/2023 has revealed that there is 1 WA HSL site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
VANCOUVER PORT 05872	***1501 W 8TH ST***	***W 1/2 - 1 (0.945 mi.)***	***109***	***794***

Facility Type: Hazardous Sites List
FSID Number: 5922991
Facility Status: Awaiting Cleanup

Lists of state- and tribal hazardous waste facilities

WA CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the WA CSCSL list, as provided by EDR, and dated 04/10/2023 has revealed that there are 21 WA CSCSL sites within approximately 1 mile of the target property.

State and tribal institutional control / engineering control registries

WA INST CONTROL: The Environmental Covenants Registry is a list of sites that have implemented institutional controls as part of the remedy. Institutional controls are administrative or legal measures used to prevent activities that may compromise the integrity of a cleanup action. They are meant to prevent exposure to contamination remaining on site. Institutional controls may include environmental covenants (also known as "deed restrictions"), zoning restrictions, public health advisories, or other administrative tools. The most common institutional control is an environmental covenant. Environmental covenants are legal recorded documents that typically limit certain uses of the property, such as: Drilling a water supply well on the property. Disturbing pavement covering contaminated areas. Residential use of the property.

A review of the WA INST CONTROL list, as provided by EDR, and dated 04/10/2023 has revealed that there is 1 WA INST CONTROL site within approximately 0.5 miles of the target property.

WA PTAP: A list of sites accepted into the Petroleum Technical Assistance Program. The Petroleum Technical Assistance Program (PTAP) expands the state's ability to respond to the high customer demand to clean up petroleum contaminated sites. Under the PTAP, the Pollution Liability Insurance Agency (PLIA) may provide informal site-specific technical consultations and issue written opinion letters to persons conducting independent remedial actions at qualifying petroleum cleanup sites. PLIA may provide these services under the authority of RCW 70.149.040(9) and the Model Toxics Control Act (MTCA), Chapter 70.149 RCW and Chapter 173-340 WAC.

A review of the WA PTAP list, as provided by EDR, and dated 01/31/2023 has revealed that there is 1 WA PTAP site within approximately 0.5 miles of the target property.

WA CSCSL NFA: The data setcontains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the WA CSCSL NFA list, as provided by EDR, and dated 04/10/2023 has revealed that there are 10 WA CSCSL NFA sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/06/2023 has revealed that there are 4 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EXECUTIVE SUMMARY

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
VANCOUVER GAS MANUFA	9TH AND LINCOLN STS	W 1/2 - 1 (0.747 mi.)	103	629

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:
Registry ID: 110000896950

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA

WOLF SUPPLY CO VANCOUVER (Continued) **1000838183**

program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

HCM Label:	Not reported
Map Scale:	Not reported
Point of Reference:	Not reported

Highlights: Former Use: The 1.53-acre Property is comprised of four tax lots located in downtown Vancouver.. A 10,625 square-foot commercial building, known as the Webber Machine Works building, is located in the northeast corner of the Property. The remainder of the Property is in use as an asphalt paved parking lot. The Property is zoned for commercial use. REC #1: Records show that the Property was historically occupied by light industrial operations and fuel dispensing facilities. No evidence of a significant release associated with these historical Property uses was identified. REC #2: A release was reported during decommissioning activities (Cleanup Site ID 11159, LUST ID 2453) in 1992. No evidence of significant petroleum or hazardous substance releases was observed during the drilling of soil or soil vapor borings or reflected in laboratory testing of soil samples collected. REC #3: Ecology records indicate

400 COLUMBIA ST AND 318 W 4TH ST (Continued) **1024079349**

	the presence of a gasoline UST on the site. It is unknown if this UST has been removed. No evidence of significant petroleum or hazardous substance releases was observed during drilling or reflected in laboratory testing of soil or soil vapor samples collected. REC #4: Historical city directory information indicates the Interstate Fuel Company was located adjacent south of the Property (north of the railroad right-of-way) in 1966. No evidence of significant petroleum or hazardous substance releases was observed or reflected in laboratory testing of soil samples collected.

operty Description:	The 1.53-acre Property is comprised of four tax lots located in downtown Vancouver.. A 10,625 square-foot commercial building, known as the Webber Machine Works building, is located in the northeast corner of the Property. The remainder of the Property is in use as an asphalt paved parking lot. The Property is zoned for commercial use. REC #1: Records show that the Property was historically occupied by light industrial operations and fuel dispensing facilities. No evidence of a significant release associated with these historical Property uses was identified. REC #2: A release was reported during decommissioning activities (Cleanup Site ID 11159, LUST ID 2453) in 1992. No evidence of significant petroleum or hazardous substance releases was observed during the drilling of soil or soil vapor borings or reflected in laboratory testing of soil samples collected. REC #3: Ecology records indicate the presence of a gasoline UST on the site. It is unknown if this UST has been removed. No evidence of significant petroleum or hazardous substance releases was observed during drilling or reflected in laboratory testing of soil or soil vapor samples collected. REC #4: Historical city directory information indicates the Interstate Fuel Company was located adjacent south of the Property (north of the railroad right-of-way) in 1966. No evidence of significant petroleum or hazardous substance releases was observed or reflected in laboratory testing of soil samples collected.

SOUTH OF CITY HALL (Continued) **1024079555**

HCM Label: Address Matching-House Number
Map Scale: Not reported
Point of Reference: Entrance Point of a Facility or Station
Highlights: A geophysical survey of the South Site did not identify any underground structures or USTs, except for concrete/rebar debris. Soil borings GP-S-1 and GP-S-4, located on the western boundary of the South Site, did not contain elevated petroleum constituent concentrations. Lead and PAH TEQ detected in sample GP-S-2-0 -3 at the South Site exceeded their MTCA Method A CUL. Benzene was detected in soil vapor sample SV-3 in exceedance of MTCA Method B Sub-Slab Soil Gas Screening Levels. Further evaluation is necessary to determine whether or not this screening level exceedance presents an actual risk to human health. 1,3-Butadiene was detected above the MTCA Method B Sub-Slab Soil Gas Screening Level in two of three soil vapor samples collected at the South Site. Further evaluation is necessary to determine whether or not this screening level exceedance presents an actual risk to human health. This potential risk could be mitigated through the installation of vapor mitigation systems beneath newly constructed buildings. The source of the 1,3 butadiene remains unknown. Former Use: Historical documents indicate that the Property was developed with single-family residences by 1890 and remained exclusively in residential use until the 1940s, with the exception of the southeastern corner of the Property, which was occupied by the Vancouver Soda Water Works by 1907. The northwestern area of the Property was in commercial use as a welding shop by 1949. The Property was in exclusively commercial use since at least the 1960s, with historical businesses including potato chip manufacturing, storage, auto repair, fishing tackle manufacturing, and other retail and office uses. The Property has been in use as a parking lot or has been a vacant lot with no structures since at least 2005. The City of Vancouver purchased the Property in 2010.

Property Description:	Historical documents indicate that the Property was developed with single-family residences by 1890 and remained exclusively in residential use until the 1940s, with the exception of the southeastern corner of the Property, which was occupied by the Vancouver Soda Water Works by 1907. The northwestern area of the Property was in commercial use as a welding shop by 1949. The Property was in exclusively commercial use since at least the 1960s, with historical businesses including potato chip manufacturing, storage, auto repair, fishing tackle manufacturing, and other retail and office uses. The Property has been in use as a parking lot or has been a vacant lot with no structures since at least 2005. The City of Vancouver purchased the Property in 2010.

Point of Reference:	Entrance Point of a Facility or Station
Highlights:	A geophysical survey of the South Site did not identify any underground structures or USTs, except for concrete/rebar debris. Soil borings GP-S-1 and GP-S-4, located on the western boundary of the South Site, did not contain elevated petroleum constituent concentrations. Lead and PAH TEQ detected in sample GP-S-2-0 -3 at the South Site exceeded their MTCA Method A CUL. Benzene was detected in soil vapor sample SV-3 in exceedance of MTCA Method B Sub-Slab Soil Gas Screening Levels. Further evaluation is necessary to determine whether or not this screening level exceedance presents an actual risk to human health. 1,3-Butadiene was detected above the MTCA Method B Sub-Slab Soil Gas Screening Level in two of three soil vapor samples collected at the South Site. Further evaluation is necessary to determine whether or not this screening level exceedance presents an actual risk to human health. This potential risk could be mitigated through the installation of vapor mitigation systems beneath newly constructed buildings. The source of the 1,3 butadiene remains unknown. Former Use: Historical documents indicate that the Property was developed with single-family residences by 1890 and remained exclusively in residential use until the 1940s, with the exception of the southeastern corner of the Property, which was occupied by the Vancouver Soda Water Works by 1907. Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

cility Address 2:	Not reported
acility ID:	23482
EPA ID:	WAH000035022
AICS:	491110
te Waste Code Desc:	Not reported
Federal Waste Code Desc:	D008
Form Comm:	One time generation of lead paint containing exterior window frames that failed TCLP for lead. The facility is usually a XQG. When the USPS filed for an EPA ID in July 2007 it was thought that one time generation would generate over 2200 lbs of dangerous waste and the facility would subsequently be a LQG. Actual quantity was 1700 lbs and therefore facility is actually a MQG.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

FINDS:
Registry ID: 110071182075

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Registry ID: 110015461784

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Parcel size: 0.75
Latitude: 45.623235
Longitude: -122.674823
HCM Label: Not reported
Map Scale: Not reported
Point of Reference: Not reported
Highlights: Former Use: The Property is in a commercial area at the southern edge of downtown Vancouver. It is bounded by Columbia Street to the east, Esther Street to the west, Columbia Way to the south and an active BNSF right-of-way to the north. The center of the Property is located approximately 600 feet north of the Columbia River, 700 feet west of Interstate Highway 5, and 500 feet south of Vancouver City Hall. The Property includes portions of two tax lots as well as interlaying property to which no tax number has been assigned. The Property was occupied by an asphalt paving plant from the 1940s through the early 1970s. Since the late 1970s, the Property has been vacant, or used for surface parking. The asphalt paving plant is the suspected source of petroleum contamination observed in soil during a recent sewer force main installation project on the Property. Asphalt plant operations ended nearly 20 years prior to current (City of Vancouver) and most recent previous (ANT, LLC) ownership of Property.

Relative: US BROWNFIELDS:
Lower
Actual: Name: WEST OF CITY HALL
39 ft Address: 503 AND 615 W 6TH STREET AND 400 ESTHER STREET
Recipient Name: City of Vancouver
Grant type: Assessment
Region: 10
Property Number: Not reported
Parcel size: 3.1
Latitude: 45.624711
Longitude: -122.676451
HCM Label: Address Matching-House Number
Map Scale: Not reported
Point of Reference: Entrance Point of a Facility or Station
Highlights: Soil and soil vapor samples were collected from the West Site to evaluate the potential for human health risk from historical operations on and in the vicinity of the site. No soil sample concentrations detected on the West Site exceeded MTCA Method A CULs for soil. Former Use: Historical documents indicate that the Property was developed with single-family residences by 1890 and remained in residential use until approximately 1907 when commercial development began. Records show that historical Property uses included offices and commercial development, including an automotive repair shop in the early 1990s. Since approximately 2000, a warehouse in the western area of the Property has been the only building on the Property. The eastern area of the Property has been a paved parking lot since the late 2000s. The City of Vancouver acquired the Property through bankruptcy in 2010.

Tank Name: Not reported
Tag Number: A7829
Tank Status: Removed
Tank Status Date: 11/23/2015
Tank Install Date: 1/1/1977
Tank Closure Date: 9/19/2017
Capacity Range: 111 TO 1,100 Gallons
Tank Permit Expiration Date: Not reported
Tank Upgrade Date: 12/20/1994
Tank Spill Prevention: Single Wall Spill Bucket
Tank Overfill Prevention: Overfill Alarm
Tank Material: Fiberglass Reinforced Plastic
Tank Construction: Double Wall Tank
Tank Tightness Test: Every 5 Years
Tank Corrosion Protection: Corrosion Resistant
Tank Manifold: Not reported
Tank Release Detection: Automatic Tank Gauging
Tank SFC Type: Not reported
Pipe Material: Flexible Piping
Pipe Construction: Secondary Containment
Pipe Primary Release Detection: Interstitial Monitoring (or Sump Sensor)
Pipe Second Release Detection: Not reported
Pipe Corrosion Protection: Corrosion Resistant
Pipe Pumping System: Gravity Delivery System (No Pump)
Responsible Unit: Southwest
Dispencer/Pump SFC Type: Not reported
Region: Southwest
Is Active: True
